

INFUSIVE PEEL TECH SHEET

Skin Type	All
Skin Concern	Dehydrated, Sensitive, Irritated, Ageing, Stressed

INFUSIVE PEEL PROFILE

Alginate contains natural polysaccharides from seaweed, which locks in moisture and plumps the appearance of ageing.

This cooling mask sets on the skin, sealing in moisture, helping to constrict the capillary action, calming and soothing sensitivity and reducing redness.

Antioxidant rich raspberry, pomegranate, beetroot and vitamin C are deeply infused into the skin.
