# **REJUICE** Balancing Face Oil

Rejuice is a lightweight face oil to help soothe and strengthen and bring skin back to balance. It's a concentrated mix of ultra-calming, immune-boosting ingredients to help relieve redness and regulate oil flow for healthy glowing skin.

Suitable for:

Sensitive and oily skin types.

#### **Targets:**

Redness, inflammation, breakouts and congestion

Smells like...

Herbal chai tea, with a touch of sweet chamomile.

#### Feels like...

A lightweight, non-greasy nectar that absorbs quickly.

# How to Juice:

#### Home:

Step 3 at night when using the Skin Juice Daily Diet. See retail notes for additional usage information.

- Press 1-3 drops of this lightweight oil onto the face, neck and chest and allow to absorb.
- Avoid massaging onto the skin pressing the oil onto the skin allows it to penetrate deeper and more effectively, verse massage which can 'wipe' the oils away. Pressing also reduces friction or dragging the skin, which can cause irritation and inflammation.

#### **Professional:**

- Can be applied to the appropriate skin types before applying the Infusive Peel Mask.
- Can be applied to the skin within a facial massage or used as the final moisture product in a facial treatment.

# **Retail talking points:**

• This face oil replaces a night cream. Free from emulsifiers and emollients like traditional night creams which can coat the skin and can result in blocking the pores and natural oil flow, inhibiting the skin's natural rebalancing function overnight.

▼

- Boost a morning skincare routine with a couple of drops of Rejuice applied before moisturiser. You can even try and mix a couple of drops to foundation to help achieve a healthy, dewy glow.
- Apply to damp skin to help the oil absorb faster and to also lock the water into the skin, increasing hydration.

### About this squeeze:

#### Calming:

- Chamomile and Bisabolol (a concentrated elixir obtained from chamomile) helps soothe inflammation and redness for irritated skin or breakouts.
- Anti-inflammatory and soothing oils help treat symptoms related to rosacea, eczema and psoriasis.
- Chlorophyll, a natural green plant pigment, helps to support the skin's healing process, while also soothing redness and irritation.

#### **Balancing:**

- Finer molecular structured plant oils absorb quickly to help normalise oil production for an oily skin type.
- Palmarosa essential oil helps balance oil production and reduces inflammation with its antibacterial properties.

#### **Protective:**

- Plant oils such as prickly pear, evening primrose and kiwi fruit oils contain essential fatty acids that protect the skin against irritation, dehydration and breakouts.
- Rich in jojoba, a plant oil high in ceramide content that helps strengthen the skin's barrier function, regulating and inproving the skin's hydration levels.
- Kakadu Plum seed oil, extracted from the world's highest known fruit source of vitamin C, is a super antioxidant that helps reduce collagen breakdown and cell damage.

# In the Blender:

#### Jojoba Seed Oil

Plant oil high in ceramide content that will help regulate and intensify the skin's hydration levels.

#### Kakadu Plum Seed Oil

Extracted from the world's highest known fruit source of vitamin C, this super antioxidant will help reduce collagen breakdown and cell damage.

#### **Prickly Pear Seed Oil**

Antioxidant rich plant oil that brightens the skin, stimulates new cell growth and helps restore elasticity.

#### Kiwi Seed Oil

Golden oil bursting with essential fatty acids to nourish and repair dry, cracked and rough skin.

#### **Bergamot Fruit Oil**

Cold pressed oil that contains youth boosting antioxidants and purifying antibacterial properties.

#### Roman Chamomile Flower Oil

Soothing essential oil to help reduce redness and cool sensitivity.

#### Palmarosa Oil

An essential oil that helps balance oil production and reduce inflammation with it's antibacterial properties. **CI75810 (Chlorophyll)** 

Natural green pigment that also helps to support the skin healing process while soothing redness and irritation.
