Natural + Australian Made + Vegan + No Animal Testing + Green Chemistry

Pimple Punch contains 7 potent actives that are clinically proven to treat breakouts by targeting three key causes; 🦠 bacteria, 🧴 excessive sebum and 🔥 inflammation. This powerful and natural formula helps to reduce sebum production, fight acne causing bacteria, heal breakouts and soothe redness for clearer and stronger looking skin.

To use shake serum before use. Apply 💧💧💧 to a clean face AM and PM. Target additional skin deficiencies by layering with more serums from the Factory. It's not recommended to mix serums from different ranges.

Key Actives in depth

ZINCIDONE: reinforces the skin's barrier function to aid healing and prevent the development of microbial infections as a result of its antiseptic properties. Scientific research has shown that zinc reduces excessive oil production.

VIT-A-LIKE: is a botanical, non-irritating alternative to retinol. It has been shown to significantly accelerate the renewal of the epidermis for rejuvenating healthy skin.
MATILOOK: this skin mattifier is obtained from the leaves of the quince tree and due to its astringent activity it reduces shine and refines skin texture by limiting the dilation and visibility of pores.

NIACINAMIDE: (vitamin B3) helps to regulate sebum production; it reduces the redness of pimples and minimises the appearance of large pores.

SANISKIN: a 4-in-1 action for acne-prone skin: balances the sebaceous gland activity, protects oils against oxidation, treatment of acne causing bacteria, and decreases skin inflammation.

TOTAROL: a naturally occurring plant extract with potent antibacterial and antioxidant properties.

FUCOCERT: relieves the spread of inflammation and allergic reactions, increases hydration by 44% one hour after application.

This formula has been boosted with nutrients from Charcoal, Probiotic (Fruit Juices), Blueberry, Eucalyptus Blue Gum, Pink Grapefruit and Bergamot.
