Intelligent Multi-Protection & UL Listed

The Intelligent jump starter can detect the voltage of the car battery in real time and will set an alarm for any abnormal conditions. Via the built-in state-of-the-art BMS power management system, the emergency starter is provided with short-circuit protection, over-current protection, reverse connection protection, over-heat protection, over-time protection and even clip falling off protection. In addition, the Lokithor power starter is UL listed as per UL2743, providing ultimate protection and safety.

Smart Powerful Tyre Inflator

The digital air pump is manufactured with a unique turbocharged movement, which is more powerful, more stable and less noisy. Maximum pressure of 150 PSI and airflow of 35L/Min with tyre-pressure detection. You can even pre-set a desired tyre pressure. The unit can be switched between BAR or PSI and only needs 5 mins to fully inflate a 195/65/R15 car tyre from 0 to 35 PSI. Can pump up to 6 tyres on one charge. Professionally calibrated to display within 1.0% of actual.

Super Starting Current & long Standby time

The Lokithor portable jump starter has a 2000A peak starting current, it can re-start your car in 1-3 seconds and up to 40 start attempts under most normal conditions. Suitable for petrol engines under 8 litres and diesel engines under 6 litres, including: cars, motorcycles, boats, RVs, ATVs, SUVs, vans, tractors, mowers and more.

The Lokithor has a very low standby current.
