

# Full Keratin Straightening Treatment.

*Lasts up to 12 - 16 weeks*

**1**

Shampoo hair twice with STEP 1. The first shampoo should be concentrated on the scalp, providing a light massage. Shampoo and rinse as usual. The second shampoo should be concentrated on hair length and tips. STEP 1 must remain in hair for 10 minutes before being rinsed out. Ensure hair is rinsed out at 100%.

**4**

Blow dry hair 100% (an aggressive blow dry is not needed). Follow by flat ironing hair. Divide the hair into small sections of hair and flat iron each section at 230°C and at a moderate and continuous velocity, 10-12 times each section.

*Note: For weak and brittle hair, use a lower flat iron temperature. Keep in mind that hair may not straighten at 100% if a lower temperature is used.*

**2**

Blow dry hair to 80%. Divide hair into sections. Starting from 1/2 cm from the scalp, apply STEP 2 to hair from roots to tips comb thoroughly. STEP 2 must remain in hair for 20 minutes. Follow by rinsing hair out 100%. It is important to ensure that hair is thoroughly rinsed.

**3**

Apply STEP 3 on wet towel dried hair at the basin as you would apply treatment, from roots to end. STEP 3 must remain in hair for 10 minutes. Follow by rinsing hair out 100%. It is important to ensure that hair is thoroughly rinsed.

**5**

Finish and style hair as usual.

*Note: Proceed to do colour, tint, semi or highlight if needed (bear in mind that the hair might be resistant more than usual)*
