What's in the Box

(The above pictures of accessories are for reference only)

Structure of T45

Instruction for wearing

Wearing earbuds and adjust the right angle as the picture shows. It's OK when we feel comfortable and stable.

According to the auricle size of users,users can choose the suitable ear cap,which will be more comfortable.

Power on

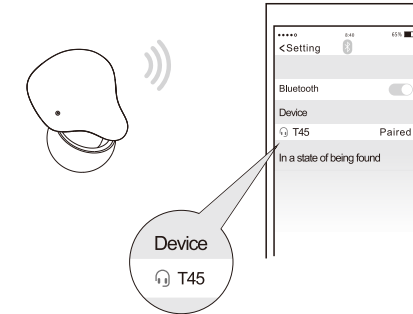

Method 1:Open the charging case,and both earbuds will turn on automatically. Left and right earbuds will connect to each other. Take out earbuds, and then orange and white light of main earbud (left earbud is tacitly approve as main earbud) flickers alternately.

Method 2:When neither of earbud is in the charging case or charging case is out of battery, and the earbuds are power off, please long press multifunction key of both earbuds for 2 seconds to turn on . And then the left and right earbuds finish auto paring. Orange and white light of main earbud (left earbud is tacitly approve as main earbud) will flicker alternately.(Master earbud will be switched according to the actual demand).

Connecting wireless of mobile phone

When using T45 at the first time, please turn on according to method 1 or 2.The orange and white light of master earbud willflicker alternately.Turn on the bluetooth function of mobile phone to search nearby bluetooth devices,and connect the devices " T45" ,When the device shows "connected" , it means the earbuds and mobile phone

connect successfully; after first time using,only turn on the earbuds according to method 1 or 2. When earbuds turn on, they will automatically attempt re-connect with the last connected mobile phone. If last connected mobile phone is not near to the earbuds or bluetooth function is not open , the earbuds will get into searching status.(The LED light of earbuds will flicker orange and white alternately).

Notice

1. The paring mode will last about 10mins at most,if they can not be paired ,the earbuds will turn off automatically. If you need to be connect again,please operate as "Power on"or "Connecting bluetooth mobile phone"steps.
2. They will be disconnected if the distance between earbud and mobile phone is beyond transmission distance.It can be connected automatically if the earbuds go into phone's connection range within 10 minutes.

Power off

Method 1:Put the earbuds into the charging case, close the upper cover of charging case,the earbuds will turn off automatically.If the electricity of charging case is out of power, the earbuds will not turn off automatically.
Method 2:Long press (either one of earbuds) multi-functional key for 6 seconds,the orange light will be on for 1 second and then it is off. Earbuds turn off successfully.

Note: If the earbuds are disconnected and not connect again within 10 minutes,the earbuds will turn off automatically.

Technical solution

If your earbuds can not be paired with your phone,try the following steps:
Please make sure the earbuds are with electricity;
Please make sure the earbuds are power on;
Please make sure the earbuds is not connected with other devices;
Please make sure the bluetooth function of mobile phone is normal,and turn on the bluetooth function;
Please make sure the distance between earbuds and mobile is connectable;
If the above operations can not help you solve the problem, Pls try to reset the earbuds:
Take out either of the eabud, double press multifunction-key to enter the orange and white light flickers alternately mode, and then treble press until the orange and white light flicker at the same time for 1s, and then the earbuds turn off.
Operate the other earbud in the same way. And then turn on the earbuds, after 2s, double press both of the multi-functional keys to pair two earbuds. After they pair successfully, the orange and white light of left earbud will flicker

alternately. After reset the earbuds, pls connect the Bluetooth device according to the last steps.
When the earbuds can not work, put them into the charging case and close the cover. And then take out again.

Thank you
