

# GEARS TRAVELEX WATERPROOF HALF COVER

(100254-6)

Congratulations on your purchase of a GEARS Motorcycle cover. Properly cared for, your cover will last for many years of service. The GEARS cover is manufactured from 100% Waterproof polyester and may be used either inside or outdoors. Your cover also contains an elastic shock cord that is sewn into the hem. This feature keeps the cover tight around the motorcycle. The following information should be used to ensure maximum longevity.

**Note :** The GEARS cover is designed to fit a variety of motorcycles. If you are uncertain that your cover fits correctly, please contact your dealer or GEARS CANADA to verify your fit before attempting first-time use.

**This cover is not designed for covering your motorcycle while it is trailered or in the back of a pick-up truck.**

## **WARNING**

This cover must be completely removed prior to starting or operating the vehicle. Failure to do so could result in serious injury and/or property damage.

**INSTALLATION :** Wait for motorcycle to cool down before installing cover!

Unfold cover. Locate "FRONT" tag at the front of the cover. Starting from the front wheel area, pull down over the windshield and 'tuck' the elastic hem under the centerline of the motorcycle.

Working toward the rear of the motorcycle, slide the cover down the sides, avoiding "snag" points. The cover should be long enough to allow the hem to fully lay below the centerline of the motorcycle. Care should also be taken to avoid placing the material against hot engine components, as burning or melting may occur. Use the elastic straps to secure the cover to the foot pegs.

**CAUTION :** Mirrors, muffler ends are common wear points. Do not allow fabric to "snag" around them. Antennas are capable of puncturing the cover - use extreme care.

**CARE AND CLEANING :** Your cover requires very little maintenance. Normal dirt and grime should be brushed off with a soft terry cloth or removed with warm water and a mild detergent using a sponge. Delicate hand wash is recommended. The cover should be thoroughly dried before storing. Although protected with UV coating, the fabric may fade in direct sunlight after continuous use. This is normal wear.

A water - repellant spray material such as 3M Scotchguard<sup>®</sup> is recommended for increasing water resistance.

**CAUTION :** Do not machine wash, machine dry or dry clean. Do not wring or twist the cover to remove moisture or dry it over the vehicle.

Failure to comply with the above directions may reduce the life of your cover. If you have any questions or comments, please contact either your dealer or GEARS CANADA.
