

You only need one hand to operate the new Go Cruise

First put on the silicon ring

Slip Go Cruise on top of ring

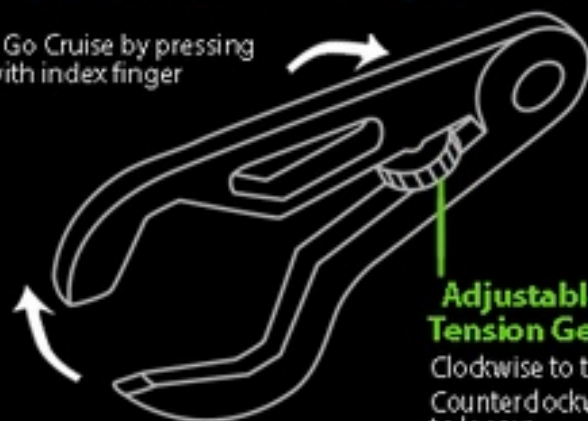

Turn the tension gear, the clamp will open or close both sides simultaneously

Two easy ways to set cruising speed

1) engage Go Cruise by pressing down with index finger

2) engage Go Cruise by rotating down with thumb

Adjustable Tension Gear

Clodwise to tighten
Counterclockwise to loosen

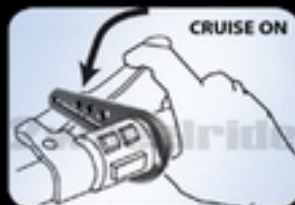

Push down to against the brake lever.
Ready to cruise...

How it Works

Reach the speed you want, the device is in high position

Holding the throttle still, using index finger push down to against brake lever
Twist throttle forward to fully disengage
