

# The colour of your Neon

# SPARKLED

These are the available single colours of Neon we can use to make your beautiful Neon (the left hand side shows the **neon on** and the right hand side shows the **neon off**).

To achieve some colour shades the outer material of the neon itself is coloured and other shades have a White exterior.

If you take the circled example of Orange, that shade of Orange has a white exterior where as the Light Orange neon has an Orange exterior.

If you want a neon which has a coloured neon when the sign is switched off, then please chose a colour from the left hand column.
