## Overall size of your neon

The height of your neon will depend on the font you choose and the width of the sign that you choose, as well as the number of characters which affect the overall scale of the neon.

As an example if you select the 100crn widesize option and have lots of letters e.g.
'The Garden Bar', your neon is likely to be 100 cm wide * 25 cm in height

If you picked purely the word 'Bar' at 100cm, your sign is likely to be around 100cm wide and 85 cm in height (depending on the font you choose). Any questions then please ask us.
