## Cut to Shape vs. Square Cut?

We often get asked what the difference is between a Neon which is 'Cut to shape' & 'Square Cut'. It's really simple;

## Cut to Shape

With a 'Cut to shape' Neon, the acrylic is laser cut around the design. This minimises the acrylic used and focusses entirely on the design

## **Square Cut**

With a 'Square Cut' Neon, the acrylic is laser cut in a square/rectangular shape around the design. This makes more of a feature of the acrylic and looks more traditional
