

Education

APPLICATION BROCHURE

Keeping Students Energised with Charging Solutions

CMS is able to supply power solutions and charging technology, giving students the ability to work and charge their devices easily, without having to stop and look for a power outlet. One of the fastest growing trends, at all levels of education, is the increased use of laptops, tablets and other mobile devices. From primary schools to universities, most students are provided with their own laptop and all require power solutions to keep them energised while completing their studies.

ECHO SERIES

Powerfully Minimal

The CMS Echo module delivers the latest charging technology while still being presented in a minimalistic surface design. It provides the perfect addition with the ability to be integrated into personal workstations, soft-seating and collaborative spaces.

With the ability to be equipped with multiple combinations including USB C+A Charging, Wireless Charging and Standard Power, it provides a perfect addition to any work area.

NOVA & VIVA

Stylish & Elegant

Our Nova & Viva Power Rails are the perfect addition to any work area, enabling versatile mounting beneath or above the desk.

Utilising the latest in electronics, plastic moulding design and new finishing materials, we have achieved a profile and fascia that uniquely blends textures and technology into something stylish and unique. We also offer the option of soft-touch fabric to deliver contrast or concealment within your application space.

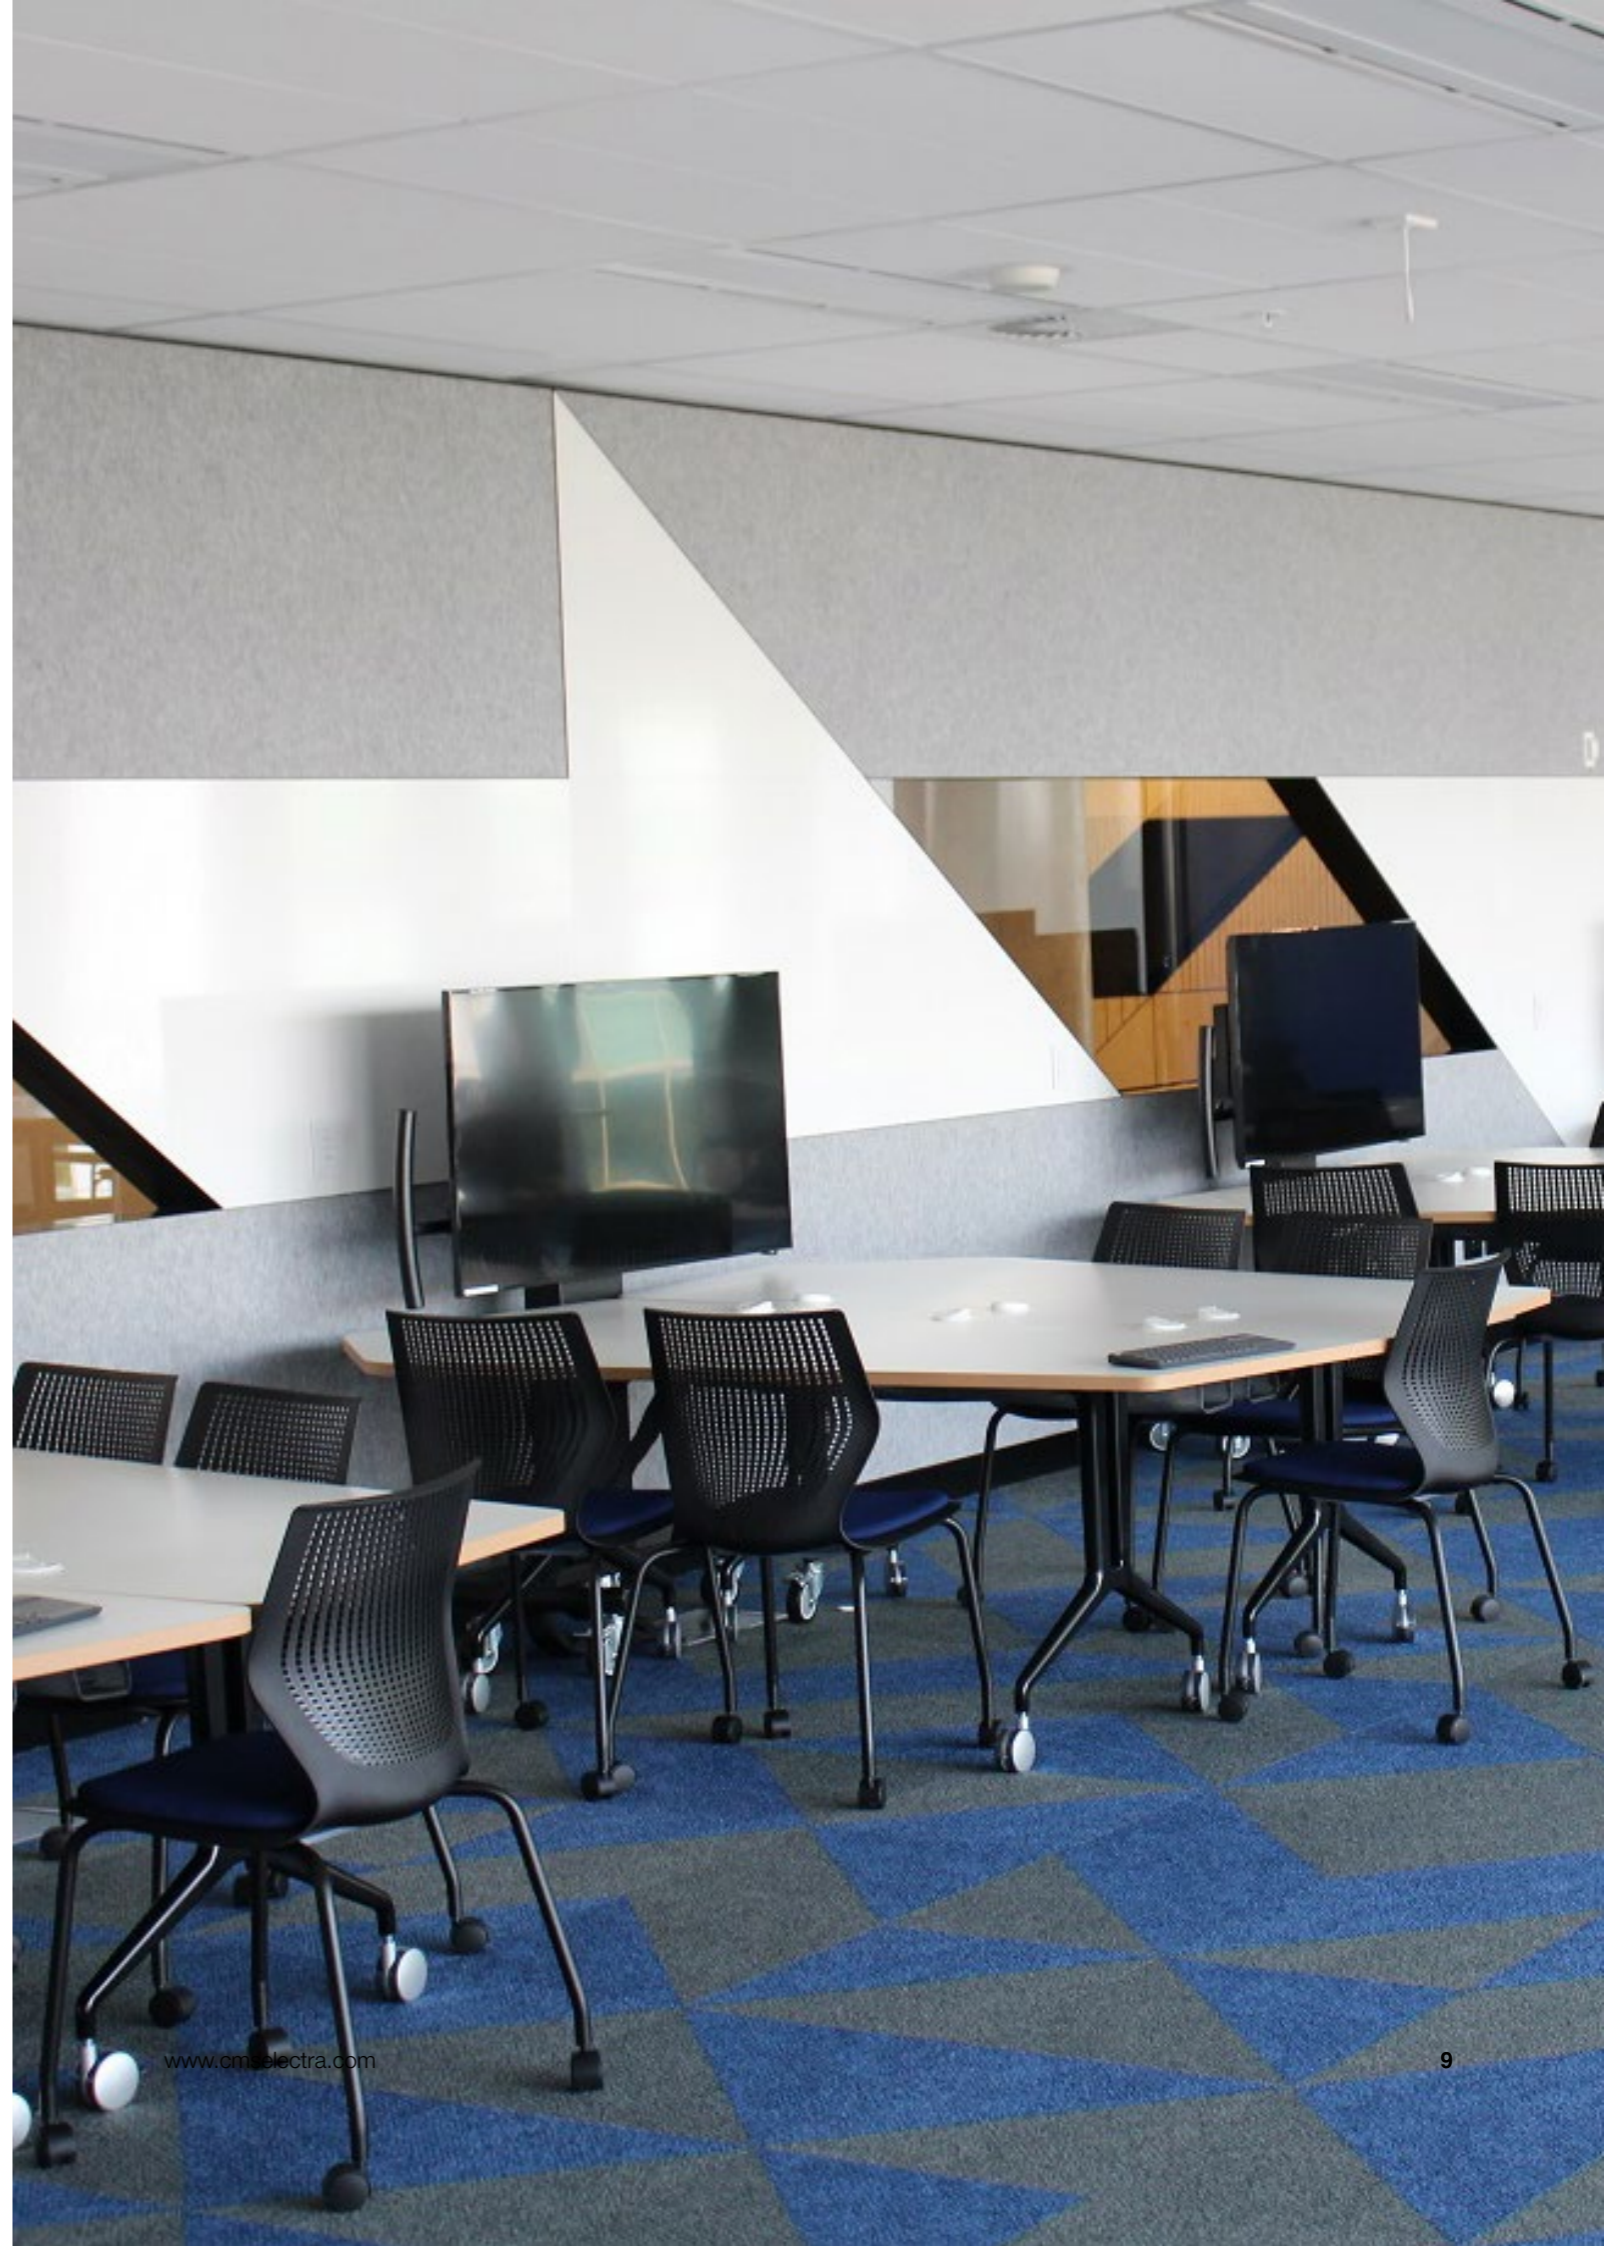

KONEXUS

Fingertip Access to Power & Charging Technology

KonexUS is a fit-out favourite, combining auto-switched power with charging options like USB-C 100W PD fast-charging in a simple yet ergonomic module. Installation is easy with a low install profile of 76.5mm, making it ideal for soft seating and collaborative spaces with requirements for power, charging and AV.

ELEVATE

Retractable Ceiling Power & Charge Module

Elevate is one of the latest innovations in power solutions by CMS - a retracting power module summoned easily via a switch or remote. Elevate delivers unprecedented access to power and USB charging into spaces subject to changing configuration by simply retracting into the ceiling when not in use.

ATOM

Tiny, Versatile & Powerful

ATOM delivers USB Fast Charging in a minimalistic housing, designed to integrate seamlessly into loose furniture, personal workstations and collaborative/shared areas.

It features an intuitive self-fastening paddle design allowing installers to surface-fit the unit without the need for a bottom fastening ring, reducing installation time on-site.

BLINKY

Access Power from All Angles

This circular module recesses into the surface providing 360° access to three shuttered GPOs with the option of 30W USB Type-C/A PD fast-charging for tablets, smartphones and even some laptops.

It can be placed in the centre of any table and provide power to multiple users from different seating positions. As a result, Blinky credits the innovation specifically suited to shared, open and meeting space.
