goggle®

DESIGNED & ENGINEERED IN AUSTRALIA

- The 4 leg goggle incorporates a Nylon P6 Graphite linking glide as a standard on all chairs.
- The linking glide allows chairs to be quickly linked together or used individually. The link process allows for chairs to be disengaged simply for emergency or safety reasons.
- Blow moulded shell cushions users with a pocket of air.
- Dynamic movement is built into every Goggle chair promoting active seating.
- Built in bag hook on the handle.
- Ergonomically designed in Australia for rugged use in Australian schools and institutions.

MATA SERIES

The MATA family of multi-purpose seats combines a simple yet distinctive design and efficient use of materials to offer trendy seating solutions at affordable prices. MATA's curvaceous seat shell can flex to accommodate reclining action and displays a pronounced lumbar curve, thus offering both support and flex in a very simple and low cost design. Moulded from recyclable polypropylene, it is easy to clean and resilient enough for commercial and institutional usage. Prominent ribs on the back reinforce the flexing movements and add unique style lines to the family of chairs.

Warranty

All parts & workmanship are covered for 10 years subject to warranty registration. Excludes fabric wear.

MATA CANTILEVER

The Mata Cantilever is part of the new revolution in educational seating which focuses on "dynamic seating" i.e. being able to move and adopt different postures throughout the learning day. Recent research suggests that best learning outcomes come not from a strict "sit up straight and face the front" mentality, but from a more flexible approach to both learning inputs and learning postures. In fact students show increased levels of concentration when allowed to move, stretch and flex in their seats like office workers do.

Warranty

All parts & workmanship are covered for 10 years subject to warranty registration. Excludes fabric wear.
