Electromagnetic Compatibility
IEEE-299 Test Report

I. Overview

Spartan SAS
WaveTech

Electromagnetic Compatibility
IEEE-299 Test Report

A. Overview

Model(s) Tested:	WaveTech
Model(s) Covered:	WaveTech
EUT Specifications:	Primary Power Tested: NA
Analysis:	The results obtained relate only to the item(s) tested.
Prepared by:	Jesse Trawinski

B. References

IEEE-299: 2006	Measuring the Effectiveness of Electromagnetic Shielded Enclosures
ISO/IEC 17025: 2005	General Requirements for the Competence of Testing and Calibration Laboratories

Spartan SAS
WaveTech

Electromagnetic Compatibility
IEEE-299 Test Report

II. Equipment Configuration

A. Overview

MET Laboratories, Inc. was contracted by Spartan SAS to perform testing on the WaveTech.

This document describes the test setups, test methods, required test equipment, and the test limit criteria used to perform compliance testing of the Spartan SAS, WaveTech.

In accordance with §2.955(a) (3), the following data is presented in support of the verification of the Spartan SAS, WaveTech. Spartan SAS should retain a copy of this document which should be kept on file for at least two years after the manufacturing of the WaveTech has been **permanently** discontinued, as per §2.955(b).

The results obtained relate only to the item(s) tested.

B. Test Site

All testing was performed at MET Laboratories, Inc., 914 West Patapsco Ave. Baltimore, MD 21230. All equipment used in making physical determinations is accurate and bears recent traceability to the National Institute of Standards and Technology.

C. Description of Test Sample

The WaveTech, is the Equipment Under Test (EUT).

D. Equipment Configuration

All equipment incorporated as part of the EUT is included in the following list.

Ref. ID	Name / Description	Model Number	Part Number	Serial Number	Revision
-	WaveTech	-	-	-	-

Table 2. Equipment Configuration

E. Support Equipment

No support equipment was necessary for the operation and testing of the EUT

F. Modifications

i. Modifications to the EUT

No modifications were made to the EUT.

ii. Modifications to the Test Standard

No modifications were made to the test standard.

G. Disposition of EUT

The test sample including all support equipment (if any), submitted to the Electro-Magnetic Compatibility Lab for testing was returned to Spartan SAS upon completion of testing.
