MINI CHEFLAMME INSTRUCTIONS

OPERATING INSTRUCTIONS

Gas Filling/Refilling:
* Prior to filling with butane, make sure the gas fill valve (6) is tight.
* Use only high quality butane gas.
* Shake gas container a few times to warm fuel up.
* Move flame adjustment slide (2) to "-" position.
* Insert container nozzle vertically down into the gas fill valve (6).
* Use a pumping action for best results. (Figure A)
* After fueling, allow a few minutes for gas to stabilize.

Igniting:
* Move flame adjustment slide (2) to "+" position.
* Push down the safety lock (5) until it clicks in place. (Figure B)
* Press ignition button (5). The flame will Ignite Instantly. (Figure C)
* For safety reasons, the ignition button (5) will not depress unless safety lock (5) is locked in place.

Flame Adjustment:
* Adjust the flame length during use by moving flame adjustment slide (2). Sliding towards the "-" symbol will make the flame longer.
* Sliding towards the "+" symbol will make the flame shorter. For best results, keep the flame length at about 1/2" - 1" (10-25mm). Don't make the flame too long as it will only waste fuel and make the flame unstable.
* At higher altitudes, torch may not operate on maximum flame length setting (with slide pushed all the way to "+"). For best results, adjust the slide (2) to the mid-range between "-" and "+".
* Note: If the ignition button is not fully pressed in, the safety lock will immediately click up and you will not be able to press the ignition button or light the torch. If this occurs, start the igniting procedure again. (See Figures B & C)

Turning Off:
* To turn the flame off, simply release ignition button.

Using Continuous Flame Feature:
* CAUTION: Use extreme caution when flame is locked on, as flame will be continuous and will not turn off until the continuous flame lock lever (4) is MANUALLY disengaged!!!
* While holding down the ignition button (5), slide the continuous flame lock lever (4) up. (Figure D)
* Release the ignition button (5), the flame will remain on. (Figure E)
* To turn off the flame, slide the continuous flame lock lever (4) down. (Figure F)

Warning: When torch is filled with butane, contents are under pressure. Use extreme caution as unit is highly flammable!

Caution:
* Read directions before use.
* Keep out of reach of children.
* After use, the flame guard will be hot. Do not touch!
* Keep nozzle clean from dust and do not drop the torch, as these are the normal causes of malfunction.
* Always point away from face, body, clothing and others when ignited and operating.
* Do not store under direct sunlight or any place where temperatures will exceed 104°F (40°C).
* Butane gas is extremely flammable. Handle with care.
* After use, allow the torch to cool down before storing.
* Do not continually use torch for over 1 hour.
* Never puncture or place torch near heat or open flame.
* Follow all instructions and cautions on the fuel canister.

CA PROPOSITION 65 WARNING:
Warning: This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm.
