X Ltd. holds $60 \%$ of the paid-up capital of Y Ltd. and the balance is held by a foreign company.

A memorandum of understanding has been entered into with the foreign company by X Ltd. to the following effect:
(a) The shares held by the foreign company will be sold to X Ltd. at a price per share to be calculated by capitalizing the yield at $15 \%$. Yield, for this purpose, would mean $50 \%$ of the average of pre-tax profits for the last 3 years, which were `12 lakhs, 18 lakhs and 24 lakhs respectively. (Average tax rate was 40\%). (b) The actual cost of shares to the foreign company was` $4,40,000$ only. Gains accruing to the foreign company are taxable at $20 \%$. The tax payable will be deducted from the sale proceeds and paid to government by X. 50\% of the consideration (after payment of tax) will be remitted to the foreign company by X Ltd. and also any cash for fractional shares allotted.
(c) For the balance of consideration, X Ltd. would issue its shares at their intrinsic value.

It was also decided that X Ltd. would absorb Y Ltd. Simultaneously by writing down the Fixed assets of Y Ltd. by 10\%. The Balance Sheet figures included a sum of `1,00,000 due by Y Ltd. to X Ltd. and stock of X Ltd. included stock of` $1,50,000$ purchased from Y Ltd., who sold them at cost plus 20\%.

## Solution

I. Calculation of amount of equity shares issued to Roshni and Jyoti

## Question 19

May Paper - 2011
A Ltd. agreed to absorb B Ltd. on 31st March, 2010, whose balance sheet stood as follows:

| Liabilities | - | Assets | - |
| :---: | :---: | :---: | :---: |
| Share capital <br> 80,000 shares of '. $10 /-$ each fully paid Reserves and surplus General reserve Secured loan Unsecured loan Current liabilities and provisions Sundry creditors | $\begin{array}{r} 8,00,000 \\ \text { 1,00,000 } \\ - \\ \text { 1,00,000 } \end{array}$ | Fixed assets Investments <br> Current assets, loans and advances Stock in trade Sundry debtors | 7,00,000 $\begin{aligned} & \text { 1,00,000 } \\ & \text { 2,00,000 } \end{aligned}$ |
|  | 10,00,000 |  | 10,00,000 |

The consideration was agreed to be paid as follows:
a. A payment in cash of `5 per share in B Ltd. and b. The issue of shares of` 10 each in A Ltd., on the basis of 2 equity shares (valued at ${ }^{\text {1 }} 15$ ) and one $10 \%$ cumulative preference share (valued at ${ }^{`} 10$ ) for every five shares held in $B$ Ltd.
c. It was agreed that A Ltd. will pay in cash for fractional shares equivalent at agreed value of shares in B Ltd. i.e. `65 for five shares of` 50 paid.

The whole of the share capital consists of shareholdings in exact multiple of five except the following holding.
A
116

B 76
C 72
D
28
Other individuals
8 (eight members holding one share each)

$$
300
$$

Prepare a statement showing the purchase consideration receivable by above shareholders in shares and cash and a statement of total purchase consideration.

## Solution

For Every 5 Shares $\quad=2$ Equity shares of ${ }^{15}$ each $=2 \times 15$
$=30$

$$
\begin{aligned}
& =1 \text { Preference shares of }{ }^{\wedge} 10 \text { each }=1 \times 10=10 \\
& =` 5 \text { cash for each share } \quad=5 \times 5=25
\end{aligned}
$$

So for the block of 5 shares (FV 50) $=$ Total payment will be ` 65 So for every share \(=\frac{65}{5}=` 13\) per Share
Note : Any person holding fractional shares he will paid `. 13 in cash

Contingent liability not provided:

Preference dividend is in arrears for three years including the year ended 31st March, 2011

The funds of the Company are sufficient to discharge its liabilities including Preference Dividends in arrears. However, the Company does not want to deplete its resources. It would also like to reflect the values of some of its assets in a realistic manner. The Board of Directors of the Company decided and proposed the following scheme of reconstruction to be effective from 1st April, 2011.
(i) The cumulative preference shareholders are to be issued, in exchange of their holdings, $13 \%$ Debentures of the face value of `100 each at a premium of \(10 \%\). Fractional holdings are to be paid off in cash. (ii) Arrears in preference dividends to be converted into equity shares of` 100 , `50 per share paid-up (iii) After the issue of the shares mentioned in (ii) above, the paid-up value of all the equity shares is to be reduced to` 25 each.
(iv) The face value of all the equity shares to be reduced to `50 each and the balance of the unpaid portion is to be called up fully. (v) Goodwill has lost its value and has to be written off. Market value of other fixed assets is determined, as at 31st March, 2011 at`2,50,000.
(vi) Investments have no market value and have to be written off.
(vii) Stock-in-trade is to be valued at $110 \%$ of its book value and Sundry Debtors are to be discounted by $5 \%$.
The scheme, as approved by the Directors, is duly accepted by all the authorities and put into effect. During the working for the half-year ended 30th September, 2011 it is noticed that the trading for the period has resulted in an increase of bank balances by

27,550, Sundry Debtors by - 20,000, Trade creditors by
${ }^{`} 13,000$ and a decrease in stock by ` 4,000. Depreciation for the half year on fixed assets at $10 \%$ per annum is to be provided. The increase in the bank balances was prior to the company paying the half yearly interest on the debentures and redeeming one half of the debentures on 30th September, 2011.

From the above information you required to prepare the Balance Sheet of Sick Ltd. as on 30th September, 2011.

## Question 25

May RTP - 2012
Major Ltd. has a subsidiary X Ltd. holding 76\% of the later's paid-up-capital. The balance of shares in X Ltd. is held by a foreign collaborating company. A memorandum of understanding has been entered into with the foreign company providing for the following:
(a) The shares held by the foreign company will be sold to Major Ltd. The price per share will be calculated by capitalising the yield at $15 \%$. Yield, for this purpose, would mean $40 \%$ of the average of pre-tax profits for the last 3 years which were `15 lakhs,` 20 lakhs and ` 32.5 lakhs. (b) The actual cost of the shares to the foreign company was \({ }^{`} 1,20,000\) only. The profit that would accrue to them would be taxable at an average rate of $30 \%$. The tax payable will be deducted from the proceeds and Major Ltd. will pay it to the Government.
(c) Out of the net consideration, $50 \%$ would be remitted to the foreign company immediately and the balance will be an unsecured loan repayable after one year.
Major Ltd. decided to absorb X Ltd. simultaneously. It decided to write down fixed assets of X Ltd. by $5 \%$. The Balance Sheet figures included a sum of ` 75,000 due by X Ltd. to Major Ltd.

The entire arrangement was approved by all concerned for being given effect to on 1.4.2011.

## Solution

I. Yield of X Ltd $=\frac{15,00,000+20,00,000+32,50,000}{3} \times 40 \%={ }^{`} 9,00,000$
II. Capitalized Value of Yield $=\frac{9,00,000}{15 \%}=` 60,00,000$
III. Value per Share $=\frac{60,00,000}{10,00,000} \times 10=` 60$

Purchase Consideration $24 \%(100-76)$ held by Outside Share Holders $14,40,000$ (60,00,000 x 24\%)

Sun Limited.agreed to absorb Moon Limited on $31^{\text {st }}$ March 2012 whose Summarized
Balance Sheet stood as follows:

| Equity and Liabilities |  | Assets |  |
| :---: | :---: | :---: | :---: |
| Share Capital <br> $1,20,000 s h a r e s$ of ' .10 each full paid <br> Reserve \& Surplus <br> General reserve <br> Secured Loan <br> Unsecured Loan <br> Current Liabilities \& Provisions <br> Sundry Creditors | $12,00,000$ 1,50,000 $1,50,000$ | Fixed Assets <br> Investments <br> Current Assets. <br> Loans \& Advances <br> Stock in Trade <br> Sundry Debtors | $10,50,000$ $\begin{aligned} & \text { 1,50,000 } \\ & \text { 3,00,000 } \end{aligned}$ |
|  | 15,00,000 |  | 15,00,000 |

The consideration was agreed to be paid as follows:
(a) A payment in cash of ${ }^{5} 5$ per share in Moon Ltd. and
(b) The issue of shares of `10 each in Sun Ltd. on the basis of two equity shares (valued at` 15 ) and one $10 \%$ cum. preference share (valued at ` 10 ) for every five shares held in Moon Ltd.

The whole of the share capital consists of shareholdings in exact multiple of five except the following holding:

| P | 174 |
| :--- | :--- |
| Q | 114 |
| R | 108 |
| S | 42 |
| Other Individuals | 12 (Twelve members holding one share each) |

It was agreed that Sun Ltd. will pay in cash for fractional shares equivalent at agreed value of shares in Moon Ltd. i.e. `65 for five shares of` 50 paid.

Prepare a statement showing the purchase consideration receivables in shares and cash.

## Solution

For Every 5 Shares $\quad=2$ Equity shares of ${ }^{`} 15$ each $=2 \times 15$
$=30$

$$
\begin{aligned}
& =1 \text { Preference shares of }{ }^{`} 10 \text { each } \quad=1 \times 10=10 \\
& =` 5 \text { cash for each share } \quad=5 \times 5=25
\end{aligned}
$$

So for the block of 5 shares (FV 50) $=$ Total payment will be ` 65 So for every share \(=\frac{65}{5}=` 13\) per Share
Note : Any person holding fractional shares he will paid ` 13 in cash

## 2015

## Question 40

May RTP - 2015
AB Ltd. and CD Ltd. two private companies, decide to amalgamate their business into a new holding company EF Ltd., which was incorporated on 1st August, 2014 with an authorised capital of `\(40,00,000\) in equity shares of` 10 each. The new company plans to commence operations on 1st October, 2014.

From the information given below, and assuming that all transactions are completed by 31st March, 2015, you are required to:
(a) Prepare Projected Statement of Profit \& Loss of EF Ltd. for the six months ending 31st March, 2015.
(b) Prepare Projected Balance Sheet of EF Ltd. as on 31st March, 2015.
(c) Show the computation of number of shares to be issued to the former shareholders of AB Ltd. and CD Ltd.

## Information

(1) EF Ltd. will acquire the whole of the Equity share capital of AB Ltd. and CD Ltd. by issuing its fully paid own shares.
(2) The number of shares to be issued is to be calculated by multiplying the future annual maintainable profits available to the Equity shareholders in each of the two companies by agreed price earnings ratios.
The following information is relevant:

|  | AB Ltd. (`) & CD Ltd. (`) |  |
| :--- | ---: | ---: |
| Equity Shares of `10 each fully paid | $10,00,000$ | $4,00,000$ |
| $8 \%$ Cumulative Preference shares |  | $1,00,000$ |
| $10 \%$ Debentures | $2,00,000$ |  |
| Future annual maintainable pre tax profits (before | $2,30,000$ | $1,12,000$ |
| interest/dividend) |  | 10 times |

(3) Shares in the holding company are to be issued to the shareholders in subsidiary companies at a premium of $20 \%$ and thereafter these shares will be marketed on the stock exchange.
(4) It is expected that the Group profits of the new company in 2014-15 will be at least
$4,50,000$ but that will be required as additional working capital to facilitate expansion. Accordingly it is planned to make a further issue of 37,500 Equity shares to the public for cash at a premium of $30 \%$ on 1st February, 2015. The new shares will not rank for interest/dividend to be paid on 31st March, 2015.
(5) Out of the proceeds of the right issue EF Ltd. will advance `\(2,50,000\) to \(A B\) Ltd. and 2,00,000 to CD Ltd. on 1st February, 2015 for working capital. These advances will carry interest @ 15\% p.a. to be paid monthly. (6) Preliminary Expenses are estimated at` 8,000 and Administrative Expenses for the half-year ended 31st March, 2015 at `16,000 but this expenditure will be covered by temporary overdraft facility. It is estimated that Interest on Bank Overdraft cost will be 1,600 in the first six months. (7) A provision for` 7,500 should be made for Directors Fee for the half-year.
(8) On 31st March, 2015, Interim Dividends on Equity Shares, will be paid by AB Ltd. @ 5\%, by CD Ltd. @ $4.4 \%$ and by EF Ltd. @ $4 \%$.
(9) Income tax is to be taken @ $50 \%$ for calculation of number of shares. However, ignore tax effect while preparing Projected Statement of Profit and Loss.

(ii) The balance in Profit and Loss A/c of Birat on 1.4.2007 was ` \(3,20,000\) out of which dividend of \(16 \%\) p.a. on the then Equity capital of \({ }^{`} 6,00,000\) was paid for the year 2006-07.
(iii)The dividend in respect of preference shares of Birat Ltd. for the year 2007-08 was still payable as on 31.3.2008.
(iv) Astha Ltd. credited its Profit and Loss A/c for the dividend received by it from Birat Ltd. for the year 2006-07.
(v) Sundry creditors of Astha Ltd. included an amount of `\(1,20,000\) for purchases from Birat Ltd. on which the later company made a loss of` 10,000 .
(vi) Half of the above goods were still with the closing stock of Astha Ltd. as at 31.3.2008.
(vii) At the time of acquisition by Astha Ltd. while determining the price to be paid for the shares in Birat Ltd. it was considered that the value of Plant and Machinery was to be increased by $25 \%$ and that of Furniture and Fixtures reduced to $80 \%$. The company made the following changes in its accounting policies:

1. Switched over to FIFO basis of Stock Valuation after 2010
2. Switched over to WDV method of Depreciation after 2011

Earlier the company was recognizing the gain/loss on the basis of difference between collection rate and exchange rate. However, the company now decided to generate exchange on sundry debtors at the year end.

Effects of stock Valuation for different years were quantified as belows:

| Particulars for the year | $\mathbf{2 0 0 8}$ | $\mathbf{2 0 0 9}$ | $\mathbf{2 0 1 0}$ |

Amount of depreciation under two alternative methods were as below:

| Particulars | $\mathbf{2 0 0 8}$ | $\mathbf{2 0 0 9}$ | $\mathbf{2 0 1 0}$ | $\mathbf{2 0 1 1}$ |

| Straight Line | 7,12 | 8,10 | 8,25 | 8,40 |

| 31.12 .2012 | 8,200 | 57.10 | 56.95 | 57.15 |

Year end Debtors were collected in the next year. Before change in accounting policy, the entire profit and loss arising out of change in exchange rate was taken to Profit and loss account of the year of collection.

The following expenses and income were not charged in the year when they occurred. Instead they were charged in the next year as prior period adjustments:

| Year | $\mathbf{2 0 0 8}$ | $\mathbf{2 0 0 9}$ | $\mathbf{2 0 1 0}$ | $\mathbf{2 0 1 1}$ |

## Question 15 -

Nov 2014 - RTP
Apex Ltd. gives the following information about the past profits.

| Years | Profits (in 000's) |
| :---: | :---: |
| $2009-2010$ | 21,70 |
| $2010-2011$ | 22,50 |
| $2011-2012$ | 23,70 |
| $2012-2013$ | 24,50 |
| $2013-2014$ | 21,10 |

On Scrutiny it is found (i) found that 2011-12, Apex Ltd Followed FIFO method of stock valuation and thereafter adopted LIFO method, (ii) that upto 2011-2012, it followed straight line depreciation and thereafter adopted written down value method.

Given below are the details of stock valuation:
(in ‘ooos)

| YEAR | OPENING STOCK |  | CLOSING STOCK |  |
| :---: | :---: | :---: | :---: | :---: |
|  | FIFO | LIFO | FIFO | LIFO |
| $2009-10$ | 40,00 | 39,80 | 46,00 | 41,20 |

| $2010-11$ | 46,00 | 41,20 | 49,20 | 47,90 |
| :---: | :---: | :---: | :---: | :---: |
| $2011-12$ | 49,20 | 47,90 | 38,90 | 39,10 |
| $2012-13$ | 38,90 | 39,10 | 42,00 | 38,50 |
| $2013-14$ | 42,00 | 38,50 | 45,00 | 43,10 |

Straight line and written down value depreciation were as follows:

| Year | Straight Line('000) | W.D.V('000) |
| :---: | ---: | ---: |
| $2009-10$ | 12,10 | 17,00 |
| $2010-11$ | 14,15 | 18,10 |
| $2011-12$ | 15,00 | 19,25 |
| $2012-13$ | 16,70 | 19,60 |
| $2013-14$ | 18,00 | 19,40 |

Determine future maintainable profits that can be used for the valuation of goodwill.

## Solution

Past profits of Apex Ltd., showed an increasing trend except in the year 2013-14.But the effects of changes in accounting policies should be eliminated to ascertain the true nature of trend. Since the company has adopted LIFO method of stock valuation and W.D.V method of depreciation, profits shall be recomputed applying these policies consistently in all the past years.

| Year | Book <br> Profits | LIFO Effect of <br> Valuation of <br> Stock | Effect of WDV <br> depreciation | Profits after <br> elimination of the <br> effect of changes in <br> accounting policy |
| :---: | ---: | ---: | ---: | ---: |
| $2009-10$ | 21,70 | $(4,60)$ | $(4,90)$ | 12,20 |
| $2010-11$ | 22,50 | 3,50 | $(3,95)$ | 22,05 |
| $2011-12$ | 23,70 | 1,50 | $(4,25)$ | 20,95 |
| $2012-13$ | 24,50 | $(20)$ | $(2,90)$ | 21,40 |
| $2013-14$ | 21,10 | - | - | 21,10 |

Future Maintainable Profit is to be calculated on simple Average Method.
$\mathrm{FMP}=22,05+20,95+21,40+21,10 / 4=` 21,37.50$

1. Fixed Assets are worth above the book Value. Stock is overvalued by ` $1,00,000$. Debtors are to be reduced by 40,000. Trade Investments, which constitutes $10 \%$ of the initial investments are to be valued at 10\% below Cost.
2. Trade investments were purchased on $1 / 4 / 2009.50 \%$ of the non trade investments were purchased on 1.4.2008 and the rest on 1.4.2009. Non - trade investment yielded $15 \%$ return on cost.
3. In 2008-2009, Furniture with Book Value of `\(1,00,000\) was sold for` 50,000 . This loss should be treated as non - recurring or extra ordinary item for the purpose of calculation of Average Adjusted Profit.
4. In 2007-2008, new machinery costing `2,00,000 was purchased, but wrongly charged to revenue. This amount should be adjusted taking depreciation at $10 \%$ on reducing value method.
5. Return on capital employed is $20 \%$ in similar business.
6. Goodwill is to be valued at two years purchase of super profits based on simple average profits of last four years.
Profit of last four years are as under

RPPL wants to gain leadership in this industry and seeks to take over ACL. RPPL estimates that its goodwill will increase on the acquisition by 200 lakhs.

RPPL Has made following calculation of the economic benefits presently available and that are foreseen as a result of the acquisition
i) Projected cash flows for the next 5 years

c) Current Assets include surplus inventory of `50 Lakhs that can realize` 80 Lakhs
d) The current Liabilities are to be paid off immediately. A Sum of ' 820 Lahks are payable on account of a compensation claim awarded against ACL, which has been trated as a contingent liability in the accounts, on which $20 \%$ was provided for.
iv) RPPL has estimated the combined cash flows post mergers as follows

The Tyre Industry in the target area i.e whole of india is to grow at 5\% per annum for the next 3 years, and thereafter at $7 \%$ per annum over the subsequent seven years.

The market size in terms of unencumbered basic sales of tyres was estimated at .. 8,000 crores in the last year, dominated by medium and large players. This includes roughly $10 \%$ of fake brands and locally manufactured tyres. Market share of this segment is expected to increase by $0.5 \%$ over the decade.

Cheap Chinese imports accounted accounted for $40 \%$ of the business (bus $60 \%$ of the volume) last year. This is expected to increase by $0.25 \%$ over the next decade.

The other large players accounted roughly $34 \%$ of the business value last year, which is expected to go down by $0.5 \%$ over the next 10 years, due to expansion of Rough-use Ltd. product portfolio.

The Company is in the process of business process re-engineering, which will start yielding results in 2 years time, and increase its profitability by $3 \%$ from its existing $8 \%$.

What is the Brand Value of Rough-Use Ltd., under Market oriented, if the appropriate discount rate is $10 \%$ ?

## Solution

Market Share of Rough-Use Ltd
Last Year Market Share $=100 \%$ - Fake Brands -
Chinese Imports - Other Domestic Brands
a) Market Share of Rough-Use Ltd
= 100\%-10\%-40\%-34\%
$=16 \%$
b) Increase or Decrease in Market Share

> = Chinese Imports 0.25\% + Local Brands 0.5\% - Other Domestic Brands 0.5\%
$=0.25 \%+0.5 \%-0.5 \%$
= 0.25\% increase in Other Share
Hence Market Share of Rough Use Ltd is expected to Fall by 0.25\% Every Year over the Decade
from the Current level of $16 \%$. Therefore, this Year it will be $15.75 \%$, Next Year $15.50 \%$ \& so on

| Excise duty and other miscellaneous charges |  | 444 |

Assuming that these miscellaneous charges have to be taken for arriving at Value added (in the first part of value added statement), the excise duty will be computed as follows:

Let Excise duty be ' $x$ '
Then miscellaneous or other charges will be 444- x
Thus $\mathrm{x}=\frac{1}{10}(6240-(3,692+175+109+20+\mathrm{x}+(444-\mathrm{x})))$

$$
=\frac{1}{10}(6240-4,440)=180
$$

Therefore Excise duty ('x')=Rs. 180 thousands

The Human Resource department of the Company has come up with a new scheme to link employee incentive with 'Value Added' as per VAS. As per the scheme an Annual Index of Employee cost to Value Added annual (\% of employee cost to Value Added rounded off to nearest whole number) shall be prepared for the last 5 years and the best index out of results of the last 5 years shall be selected as the 'Target Index'. The Target Index percentage shall be applied to the figure of 'Value Added' for a given year and the target employee cost ascertained. Any saving in the actual employee cost for the given year compared to the target employee cost will be rewarded as 'Variable incentive' to the extent of $70 \%$ of the savings. (iii) CONTRIBUTION shall mean the Value Added for the year reduced by Employee costs before incentive and expressed as a percentage of Turnover for the year. The result so obtained is to be rounded off to the nearest whole number.

The Profit \& Loss account Summary for 2012-13 is given below from which you are required to :
(I) Calculate the amount of Incentive payable to the employees
(II) Prepare Statement of Application of Value Added for the year 2012-13 after payment of the incentive.

## Question 16

Vaidant Ltd. has been consistently preparing Value Added Statement (VAS) as part of Financial Reporting. The Human Resource department of the Company has come up with a new scheme to link employee incentive with 'Value Added' as per VAS. As per the scheme an Annual Index of Employee cost to Value Added annually (\% of employee cost to Value Added rounded off to nearest whole number) shall be prepared for the last 5 years and the best index out of results of the last 5 years shall be selected as the 'Target Index'. The Target Index percentage shall be applied to the figure of 'Value Added' for a given year to ascertain the target employee cost. Any saving in the actual employee cost for the given year compared to the target employee cost will be rewarded as 'Variable incentive' to the extent of $70 \%$ of the savings. From the following given data, you are requested to ascertain the eligibility of 'Variable Incentive' for the year 2012-2013 for the employees of the Vaidant Ltd.

## 2015

Famous corporation has been preparing Value Added Statements for the past five years. The human resource manager of the company has suggested introducing a value added incentive scheme to motivate the employees for their better performance. To introduce the scheme it is proposed that the best performance (favorable to employer)i.e. Employee Costs to Added Value for the last five years, will be used as the target index for future calculations for the bonus to be paid.

After the target index is determined any actual improvement in the index will be rewarded. The employer and the employee will be sharing any such improvement in the ratio of $1: 2$. The bonus is given in the end of the year after the profit for the year is determined.

The following information is available for the last five years

## Question 5

MAY RTP - 2010
At the beginning of year 1 , an enterprise grants 300 options to each of its 1,000 employees. The contractual life (comprising the vesting period and the exercise period) of options granted is 6 years. The other relevant terms of the grant are as below:

## Vesting Period 3 years

Exercise Period 3 years
Expected Life 5 years
Exercise Price `50 Market Price `50
Expected forfeitures per year 3\%
The fair value of options, calculated using an option pricing model, is ` 15 per option. Actual forfeitures, during the year 1 , are 5 per cent and at the end of year 1 , the enterprise still expects that actual forfeitures would average 3 per cent per year over the 3- year vesting period. During the year 2, however, the management decides that the rate of forfeitures is likely to continue to increase, and the expected forfeiture rate for the entire award is changed to 6 per cent per year. It is also assumed that 840 employees have actually completed 3 years vesting period.

200 employees exercise their right to obtain shares vested in them in pursuance of the ESOP at the end of year 5 and 600 employees exercise their right at the end of year 6 . Rights of 40 employees expire unexercised at the end of the contractual life of the option, i.e., at the end of year 6 . Face value of one share of the enterprise is ` 10 .

## Question 6

NOV RTP - 2010
On 1.1.2009, Surya Kiran Ltd grants 200 stock options to each of its 300 employees, which will vest at the end of $3^{\text {rd }}$ year, provided the employees are in service at the end of $3^{\text {rd }}$ year. The exercise price per option is `60 if average annual output per employee is in the range of 100 units to 120 units,` 50 if the same is in the range of 121 units to 130 units, 40 if the same is above 130 units.

Fair value as on grant date is estimated at `50 per option if the exercise price is` 60 , 40 per option if the exercise price is `50 ,` 30 per option if the exercise price is ` 40 .

On 31.12.2009, 20 employees have left. Actual average annual output per employee is 115 till date. X Ltd. expects that it is most likely that the average output will be 122 over the 3 years and that further 30 employees will leave during next 2 years.

On 31.12.2010, further 25 employees have left. Actual average annual output per employee is 132 till date. X Ltd. expects that it is most likely that the average output will be above 130 units over the 3 years. It also estimates that a further 10 employees will leave during the $3^{\text {rd }}$ year.

## Question 7 -

## NOV PAPER - 2010

Softex Ltd. announced a Stock Appreciation Right (SAR) on 01-04-07 for each of its employees. The scheme gives the employees the right to claim cash payment equivalent to an excess of market price of company shares on, exercise date over the exercise price of ` 125 per share in respect of 100 shares, subject to a condition of continuous employment of 3 years. The SAR is exercisable after 31-03-2010 but before 30-06-10.

The fair value of SAR was Rs. 21 in 2007-08, `23 in 2008-09 and` 24 in 2009-10. In 2007-08 the company estimated that $2 \%$ of its employees shall leave the company annually. This was revised to $3 \%$ in 2008-09. Actually 15 employees left the company in 2007-08, 10 left in 2008-09 and 8 left in 2009-10. The SAR therefore actually vested in 492 employees on 30-06-2010; when SAR was exercised the intrinsic value was ` 25 per share.

Show the provision for SAR account by fair value method. Is this provision a liability or equity?

## Question 11 -

May RTP - 2012
At the beginning of year 1, the enterprise grants 100 stock options to each of its 500 employees, conditional upon the employees remaining in the employment of the enterprise during the vesting period. The options will vest at the end of year 1 if the earnings of the enterprise is 18 per cent; at the end of year 2 if the earnings of the enterprise is an average of 13 per cent per year over the two year period; and at the end of year 3 if the earnings of the enterprise is an average of 10 per cent per year over the three year period. The fair value of the options, calculated at the grant date using an option pricing model, is ` 30 per option. No dividends are expected to be paid over the three-year period.

By the end of year 1, the earnings of the enterprise was 14 per cent, and 30 employees had left. The enterprise expected that earnings will continue at a similar rate in year 2 , and, therefore, expected that the options will vest at the end of year 2 . The enterprise expected on the basis of a weighted average probability, that a further 30 employees will leave during the year 2 , and, therefore, assumed that options will vest in 440 employees at the end of the year 2.

By the end of year 2 , the earnings of the enterprise was only 10 per cent. 28 employees have left during the year. The enterprise expected that a further 25 employees will leave during year 3, and that the earnings of the enterprise will be at least 6 per cent, thereby achieving the average of 10 per cent per year.

By the end of the year 3, 23 employees had left and the earnings of the enterprise had been 8 per cent. You are required to determine the compensation expense to be recognised each year.

Question 1 -

## NOV RTP - 2008

XYZ Ltd., has a capital base of `\(5,00,000\) and it earned profits of` 50,000 . The return on investment of the same group of firms is $12 \%$. If the services of a particular Engineer, Mr. X is acquired, it is expected that the profits will raise by ` 30,000 over and above the target profit. Determine the amount of maximum bid price for that particular engineer.

## Solution

Target Profit $=5,00,000 \times 12 \%=` 60,000 /-$
Expected Profit on Employing the Particular Executive

$$
\begin{aligned}
& =\text { Target Profit }+ \text { Increase in Profit } \\

## 2009

Question 2
A company has a capital base of `1 crore and has earned profits to the tune of` 11 lakhs. The Return on Investment (ROI) of the particular industry to which the company belongs is $12.5 \%$. If the services of a particular executive are acquired by the company, it is expected that the profits will increase by 2.5 lakhs over and above the target profit.

Determine the amount of maximum bid price for that particular executive and the maximum salary that could be offered to him.

## Solution:

& \text { Actual Profit }=` 11,00,000 \\
& \text { RoI }=12.5 \% \\

Question 7
May Paper - 2011
A company has a capital base of `3 crore and has earned profits of` 33 lakhs. Return on Investment of the particular industry to which the company belongs is $12.5 \%$.If the services of a particular executive are acquired by the company, it is expected that the profits will increase by 7.5 lakhs over and above the target profit. Determine the amount of maximum bid price for that particular executive and the maximum salary that could be offered to him.

| Capital base | - 3,00,00,000 |
| :--- | :--- |
| Actual Profit | - 33,00,000 |
| Target Profit | $\ddots 37,50,000$ |

## Solution:

$$
\begin{array}{ll}
\text { Capital Base } & =` 3,00,00,000 \\
\text { Actual Profit } & =` 33,00,000 \\
\text { RoI }=12.5 \% & \\
\text { Target Profit } & =3,00,00,000 \times 12.5 \% \\
& =` 37,50,000 /- \\
\text { Expected Profit } & =\text { Target Profit + Increase in Profit }
\end{array}
$$

$$
=37,50,000+7,50,000=` 45,00,000 /-
$$

Additional Profit $=$ Expected Profit - Actual Profit

$$
=45,00,000-33,00,000=` 12,00,000 /-
$$

Maximum Bid Price $=\frac{\text { Additional Profit }}{\text { Rate of Return of Investment }}=\frac{12,00,000}{12.5} \quad \mathrm{x} \quad 100=$. 96,00,000/-

Maximum Salary that can be Offered $=96,00,000 \times 12.5 \%=` 12,00,000 /-$

## Question 14

From the following details, compute according to Lev and Schwartz (1971) model, the total value of human resources of the employee groups skilled and unskilled.

|  |  | Skilled | Unskilled |
| :--- | :--- | ---: | ---: |
| (i) | Annual average earnings of an employee till the <br> retirement age | ${ }^{{f718ff06e-435a-4bda-b0e6-0b57b2929175}} 50,000$ |  |
| (ii) | Age of retirement | 68 years | 65 years |
| (iii) | Discount rate | $15 \%$ | $15 \%$ |
| (iv) | No. of employees | 40 | 50 |
| (v) | Average age | 65 years | 63 years |

## Solution

## Computation of Value of Human Resource as per Lav and Schwartz Model:

Skilled Employees

| Age | Salary | Discounting Factor @ 15\% | Present Value |
| :---: | :---: | :---: | :---: |
| 65 | 75,000 | 0.870 | 65,250 |
| 66 | 75,000 | 0.756 | 56,700 |
| 67 | 75,000 | 0.658 | 49,350 |
|  |  |  | 1,71,300 |
| No of Employees |  | X 40 |  |
| Value of Skilled Employees `68,52,000 |  |  |  |

## Unskilled Employees

| Age | Salary | Discounting Factor @ 15\% | Present Value |
| :---: | :---: | :---: | :---: |
| 63 | 50,000 | 0.870 | 43,500 |
| 64 | 50,000 | 0.756 | 37,800 |
|  |  |  | 81,300 |
| No of Employees |  | X 50 |  |
| Value of Unskilled Employees |  | ployees - 40,65,000 |  |

Total Value of Human Resources

$$
\begin{aligned}
& =[\mathrm{A}]+[\mathrm{B}] \\
& ={ }^{`} 68,52,000+` 40,65,000={ }^{`} 1,09,17,000
\end{aligned}
$$
