

# Arches

**A classic among inflatables, now available with new internals!**

Arches can be set up and removed very quickly, and they provide enormous advertising space. They are robust and are true eye-catchers due to the multitude of color and shape options. At sporting events, they act as a starting or *finish line* or as an entrance for events. Three shapes are available for selection in three series - round, angled, and square. For long-term use, your advertisement is printed directly on the arch.

For alternating messages, we are more than happy to create banner equipment, which you can exchange in seconds. Simply purchase ready-made banners from us whenever you need them. They are delivered within 3-4 business days.

## The EasyArch

Light and easy to operate with a 230V continuous blower

## The ProArch

Robust and washable

## The ExhibArch

Low-noise, dual-layered, and yet light and firm!

Keywords: Inflatable arch, starting line inflatable arch, finish line inflatable arch, finishing line inflatable arch, arch

# Arches

## EasyArch series

Inflatable arch, single-layered. Square, angled, or semi-round and made of nylon with (interior) continuous fan.

The **EasyArch** series consists of a simple casing made of premium Oxford nylon, which is directly inflated and tensioned by a continuous fan. This allows you to very quickly and easily set up and remove your *finish line inflatable arch*.

**All you need to do is unpack it, secure it, and plug it in!**

Depending on the size, your arch can even be equipped with an internal continuous fan, making it even more user friendly! The entire casing material can be digitally printed, even with color gradients if the customer requests it.

\* The square shape (90°) meets the minimum dimensions for clearance for emergency vehicles!

\*\*This arch meets the minimum dimensions for clearance for emergency vehicles!

### Benefits:

- Exceptionally fast and easy to set up!
- Little maintenance required
- The lightest in its class!

**Accessories:** Includes transport bag, setup instructions, securing rope, fan, and delivery within Germany

**Optional accessories:** Exchangeable banners, ballasts, or ground anchors

# Arches

## ProArch Series

Inflatable arch, single-layered. Square, angled, or semi-round and made of fabric-reinforced PVC, air-tight or with continuous fan.

The **ProArch Series** is the heaviest of the *inflatable arches*. Made of fabric-reinforced PVC, your *finish line arch* can be delivered both airtight and with a continuous fan.

The casing material is dirt-resistant and wipeable. Fabric-reinforced vinyl is available in a multitude of standard colors, or it can be custom printed according to your needs.

## XhibArch Series

**Inflatable arch, dual-layered. Square, angled, or semi-round and made of nylon with an airtight internal vinyl layer.**

Our **XhibArch event arch** conceals an airtight hose made of vinyl film beneath its fully digitally printable outer casing made of premium Oxford nylon. It reliably stands its ground, even if it doesn't always have access to a power outlet.

Using an electric pump (please order with the item), it is fully inflated within a few minutes and - just like all our inflatable start and *finish line arches* - it provides enormous space for advertising. This gem can be customized to your needs via digital print or banner branding.

## Optional accessories

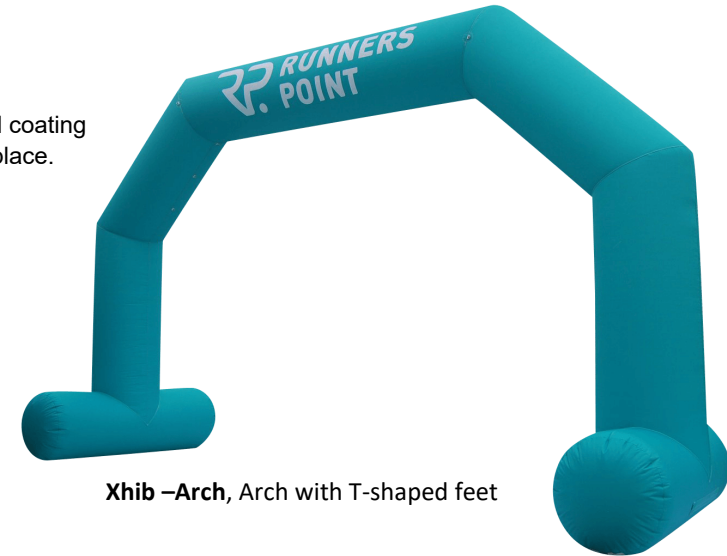

A multitude of optional accessories are available for our arches:

T-shaped feet make it easier for you to install the arch with little personnel.

Exchangeable banners draw attention at various events without having to change the arch itself. A splash guard coating near the bottom helps to keep the arch clean. Floor anchors and ballast tanks securely hold your event arch in place.

A fan upgrade makes the installation suitable for the outdoors.
