

TRIBÙ

DUNES

YABU PUSHELBERG

The Dunes low & coffee tables have a simple shape, resembling an unpretentious piece of sculpture skillfully carved in solid teak from East Java. Its rounded, central base, with natural cracks that add to its charm, supports a smooth circular tabletop. Simple, yet elegant, Dunes adds a touch of sophistication to your outdoor space. The Dunes are defined by the elegant pattern of the wood grain. Chiseled out of Tribù's plantation-grown teak, every detail, every knot, every crack is proudly on display.

MATERIALS

MATERIALS

Teak

Because Tribù makes no concessions when it comes to quality, we only use carefully selected, fully grown teak, which is harvested in accordance with the strictest environmental standards from the three highest quality Indonesian plantations in the East of Java. The local productions are checked all year round by subsidiary Tribù Asia, based in Semarang and led by a European management. Tribù designs its furniture in the way that the wood is used as efficiently as possible.

Teak is classed as the most premium wood on the planet and therefore the most suitable species for outdoor furniture. Beyond its beauty, teak possesses some natural properties that other woods don't have. It is extremely durable, stable, water and weather resistant. This is due to the high levels of natural oils which result in minimal moisture absorption, giving it great stability. Moreover, the wood is extremely resistant to fungi, as well as against parasite attacks and insects.

A tree is mature after 75 to 80 years. The trees are ringed, which means that the lower band of the bark is removed. The tree then loses most of its sap. About two years later it is felled and sawed up. Tribù selects each log based on its structure. Drying the wood is a very important phase and determines how it reacts later on. The time and speed of drying depends on the thickness of the material. Ideally the level of moisture lies between 8 and 12%.

Terrazzo by Tribù

Comprising natural stones or other aggregates in a binding agent like cement, terrazzo is a versatile and enduring material, fusing art with functionality. Tribù's innovative terrazzo-inspired products are made of natural stones set in lightened concrete with a blend of fibres which enhance durability, setting them apart from traditional terrazzo.

Although polished by hand, the composite exhibits a distinctive speckled appearance with open structure. As a result, our terrazzo-inspired material evolves over time, displaying subtle changes in colour and surface structure.

HOW TO MAINTAIN YOUR FURNITURE

MAINTENANCE

Teak

Treat new teak with Teak Protector 4 to 6 weeks after installation. Teak Protector applies an invisible film that prevents stains and green deposit. Soiled teak can be cleaned with Teak Super Cleaner. Leave the furniture to dry completely and then apply Teak Protector. To avoid labour-intensive cleaning, you can treat the wood with Teak Sealer. A simple cleaning with water and a ph-neutral soap will do for many years. Teak Sealer contains UV protection to slow down the graying from the sun as well as a fungicide to prevent the growth of mold and mildew.

Terrazzo by Tribù

For daily cleaning, dip a soft, clean cloth in a solution of warm, clear water and a pH-neutral liquid detergent. Rinse thoroughly and let dry. Stains should be wiped off immediately, especially acidic substances (juice, coffee, red wine, balsamic vinegar,...) since they may cause permanent stains. Also bird droppings and leaves may cause permanent stains if not removed immediately. Oil, grease and wax stains can be removed by using Tribù Oil, Wax and Grease Remover. Do not use corrosive or acidic detergents.

To protect your table, we recommend to use Tribù Lightened Concrete Conditioner regularly. However, this product does not protect against acidic substances. It can also be used for removing stains. Depending on the type of stain and its age, the stain can be completely removed or its intensity reduced.

PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.
