Home Office

The Frame Home Office collection integrates storage, technology and display into a seamless furniture solution for the home.

Frame allows a personalised solution to furniture and joinery needs by offering a wide range of functions and finishes to complement the home office. Frame is the outcome of our research into innovative connection systems that afford an exact and robust method of installation for many interior walls, from plasterboard through to masonry.

Sustainability and health are key considerations in the development of Frame, with materials free of formaldehyde, phenols, solvents, PVC or melamine. Frame defines the room by allowing the surrounding walls to express the space, making Frame much lighter than traditional wall-to-wall joinery.

Structural System

Frame's concealed structural system distributes loads vertically and horizontally across several points, utilising best in class cavity fixings. Frame has a particular advantage in the case of plasterboard walls.

Stud locations are not critical to the installation, allowing Frame to be securely positioned anywhere horizontally on a wall.

Masonry, brick or concrete walls provide ample structure for Frame to fix to.

Typical Weights

	Overall Module	Slim Metal Shelf	Cabinet
A. Magazine (250g)	A. 400 Magazines	A. 80 Magazines	A. 320 Magazines
