STAUBER Lexus Key Shell Re... old key and chip! - Black
New

X000Z7AKU9

STAUBER
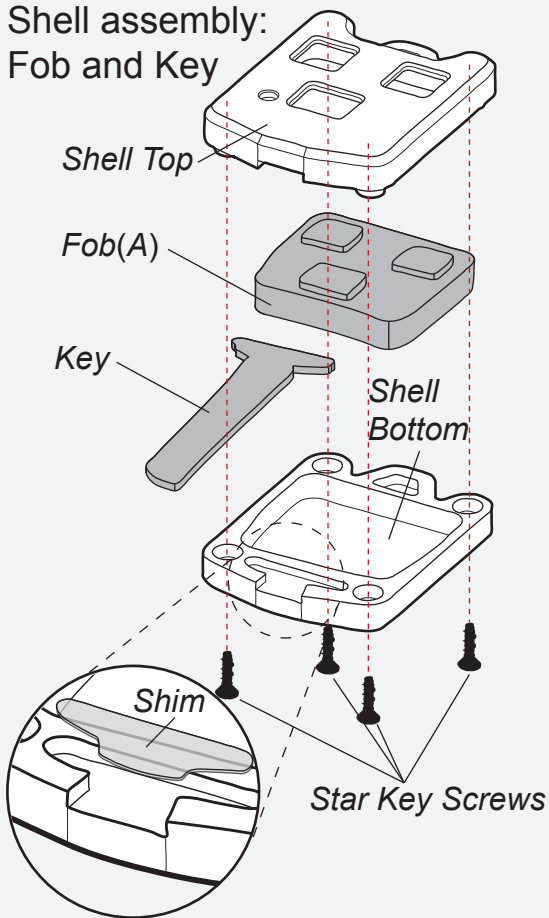

STAUBER

Lexus Key Shell Instructions:

1. Place the *Key* and *Fob* inside the shell and close it up <u>without</u> screws to make sure everything fits well.

🔍 **Important**: keys with a *Transponder Chip* have a gap in the corner of *Fob*(*B*). You will need to pry the chip out of the original shell and install as shown.

2. If the *Key* is loose, open the shell and place 1 or more of the *Shims* into the key slot. Then, close it back up.

3. Use the included *Star Key* to twist the screws into the 4 holes.

4. Tighten to a snug fit without over tightening to avoid stripping the threads.
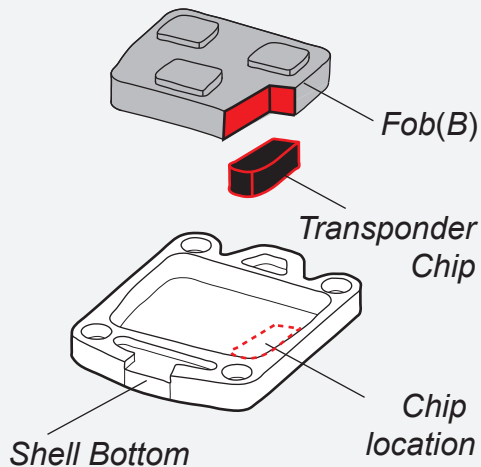

5. Enjoy!

Shell assembly: Fob and Key

Shell Top

Fob(A)

Key

Shell Bottom

Shim

Star Key Screws

🔍 **Important**: Check your original key shell for a *Transponder Chip*. You must reinstall it for your key to start your car.

Fob(B)

Transponder Chip
