

# LED FLASHLIGHT WITH UVC FUNCTION

## USB RECHARGEABLE POWERFUL SANITIZATION

The Parmida LED Technologies™ Flashlight with UVC is a useful, everyday tool that helps you to keep your most frequently used items sterile and safe with just the click of a button. UVC light works to kill invisible pathogens, and may also help to neutralize viruses and bacteria on surfaces and other household items. Suitable for use on a variety of household and work-place items. Great for travelling, this everyday essential offers an eco-friendly alternative to disposable wipes. The device comes with a useful flashlight to assist you in your everyday tasks, and is protected by a silicon rubber case, with a Quartz lens and an aluminium alloy body.
