

Semi permanent cosmetic tattooing aftercare instructions

~

Following this strict aftercare regime will ensure the best possible healed results for your new brows!

Days 1-10 after treatment

What to expect:

Immediately after treatment you may experience slight redness and swelling to the treatment area. The colour of the pigment may appear extreme dark initially, however during the first 10 days the colour will lose 40-50% of its intensity.

After care procedure:

- For the first 3 hours use a clean makeup pad to wipe away any lymph fluid from the treatment area with saline or sterile water.
- Do not wet brows for a minimum of ten days !
- Apply the healing balm for the first 10 days 2-3 times with a clean cotton tip after the area has been cleaned with sterile water .
- Ensure your brows are kept clean and dry.
- Do not contact with water(a thick crust may appear and increase risk of pigment loss)
- Do not touch the scab in any other case unless you are cleaning.
- Do not apply any makeup to the brow area.
- For cleaning use only recommended liquids(sterile water, sterile saline or witch hazel) a maximum 3 times per day. Bactine may be use sparingly if itching occurs.

Days 10-15 after treatment

What to expect:

Colour will continue to settle and align with the natural tones of your skin. If the proper aftercare is adhered to, any scabbing should start to heal. Expect that yo will temporarily lose a lot of pigment to the healing process. Done worry most of these will re surface near the end of the healing process 4-6 weeks after your treatment.

After care procedure:

- Avoid swimming, sun bathing, tanning beds, sauna, beauty treatments ,intense training accompanied by sweat, contact with dust or dirt .
- Avoid apply makeup to brow area.

Days 15-30 after treatment

Healing should be fully complete within 28 days . Expect to lose around 10-25% of pigment through the healing process. At the end of 28 days, you should notice where touch ups are required for our next appointment . At your next appointment, your technician will identify where pigment has been lost during the healing process, then touch up and replace lost pigment.

After care procedure:

- Continue to be careful with brow area during this time and avoid prolonged exposure to liquids and sun or UV light.

* A second treatment is **essential** to achieving desired results and should be scheduled for 6 weeks after your first treatment. For oily or problematic skin , additional treatments may be required. Artisan beauty is not responsible for improper post treatment care and no refunds will be given. If you have any questions regarding your results our technicians will be very happy to discuss and work with you to ensure you get the results you desire. If you have any questions or concerns please call 0273639569.
