

Ultra Electrostatic Permanent Washable Filters

The Ultra Electrostatic Air Filter uses no electricity and requires no wiring. Air passing over the filter media generates a static charge which attracts and holds dust particles like a magnet. Because of this phenomenon, many airborne particles that pass through ordinary filters are captured by the Ultra.

- *Lifetime Warranty
- *Antimicrobial Protection
- *Easy to Clean
- *Custom Sizes Available

BENEFITS

- * Value-added product
- * Washability cleans the air of allergy triggers
- * Less house cleaning
- * No ongoing replacement costs
- * No system modifications
- * Low resistance to airflow for system protection
- * Built to last

EASY TO MAINTAIN

Spray with a mild degreaser (i.e. 409), rinse and reinstall. This is just about as easy as installing a disposable filter!

TANGIBLE SAVINGS

Reduction in storage space needed for filters
Costs of ordering and stocking disposable filters
One less vendor to pay
High cost of transporting dirty filters to landfills
Less maintenance
Adds life time to the HVAC equipment
Energy savings
