

Flashing 3<sup>rd</sup> brake light

Tools needed 20 torx.

1-Remove 2 torx screws from housing

2- Pull brake lamp assembly out and disconnect main plug

3- Connect the Gen5DIY harness to the brake lamp and into the original harness.

Step 4: Tuck harness into pocket and reinstall light.

Step 5: Step on brake pedal and light will now flash 3-4 times.

Thank you
