SES Fiber Framework System?

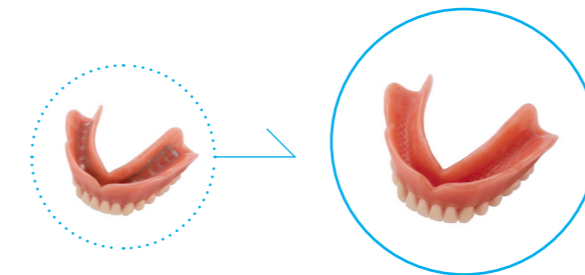

is a strong, esthetic & biocompatible, product Provides patient the best satisfaction along with comfort and low price

FULL DENTURE

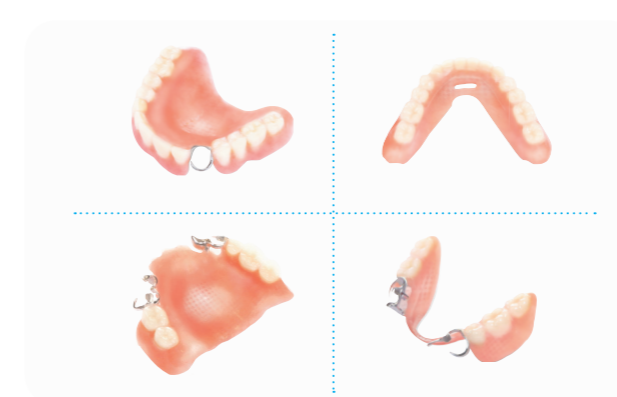

metal

SES Fiber Framework System

40% lighter than metal denture!

PARTIAL DENTURE

- If the SES Mesh is applied to partial denture, you will get more satisfaction and can make sure of more reinforced effectiveness of denture.
- Be simple to repair denture.

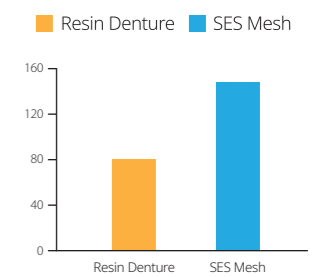

OVER DENTURE

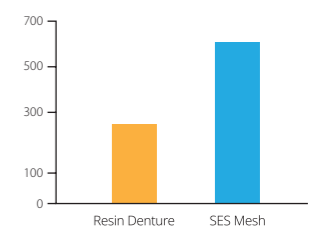

- It is more esthetic and strong by using SES Fiber Mesh

Mechanical Test

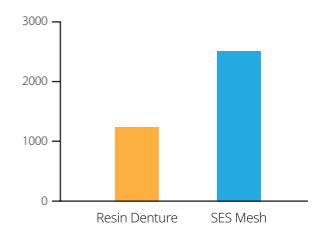

1. High tension strength

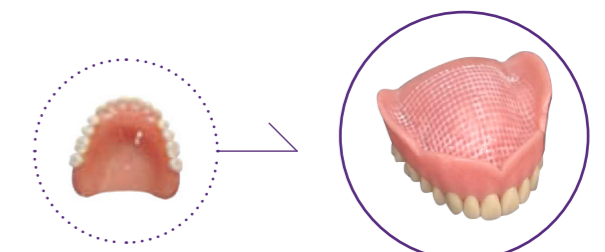

2. Excellent compressive strength

3. Good fatigue intensity

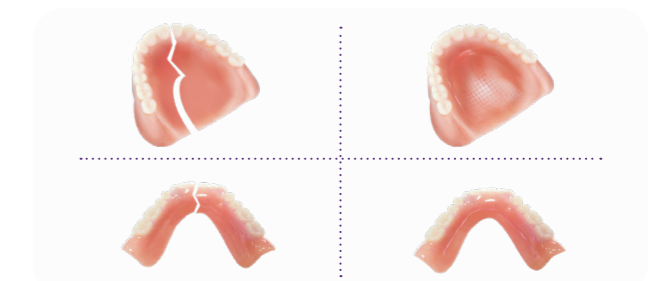

Now, can make stronger, unbroken fiber denture.

- Denture using SES Mesh is thinner and lighter, more comfortable.
- Denture using SES Mesh is not easily broken and easy to repair.

Repair of damaged denture

normal resin denture completion with SES reinforcement

- Can be easily fixed with SES Fiber I.T Repair
- Can be stronger after fixing with SES Fiber I.T Repair
