TECHNICAL BULLETIN

SUBJECT: Update to Apeks First Stages & Service Kit

PRODUCTS AFFECTED:

- All Apeks Yoke First Stages (excluding Flight)
- AP0241/AA First Stage Service Kit

Dear Aqua Lung Dealer,
Apeks is in the process of updating the first stage filter used on all yoke models of their first stage (excluding Flight). The new filter AP1406 is a flat white disc type filter (Porvair) and should not be confused with the plastic filter guard AP1406/1 that has been in use until now.

The Porvair filter has passed adiabatic testing and is approved for nitrox/EAN to 40% or with additional cleaning to 100% oxygen.

The filter guard has been removed from all new service kits AP0241/AA and has been replaced with the white Porvair filter. The conical filter will continue to be provided in the new kits for use with DIN connections. You can identify the new service kits by the yellow color of the card.

You can continue to use the conical filter and filter guard that is provided in any service kit you may have in stock until depleted.
