

# Experience your development before it's built

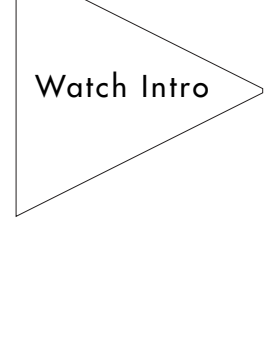

walk around your digital 3D model real size in the real world

Try Now

Watch Intro

Augmented Reality is MORE than simple Virtual Reality...

Get it on Google Play

Download on the App Store

## It's simple to place your 3D digital model into the real world, real size

VISTAR converts your 3D models into AR

2 hour turnaround

Tap the map to place your model where you want to build

Walk around and into your model as if the project were already built

Message anybody a quick link, and they can view your model (adjust privacy settings)

Super productive for discussion and iteration

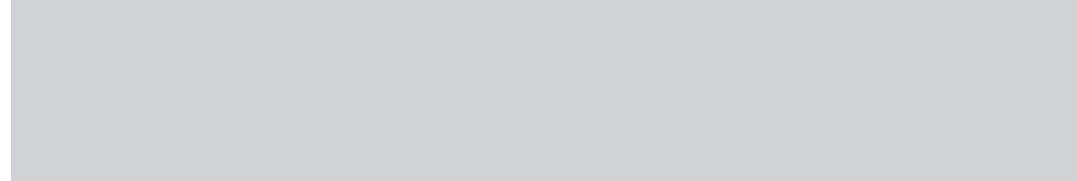

Capture the imagination of stakeholders

No goggles or headset - just use your phone or tablet

## With a captivating AR experience...

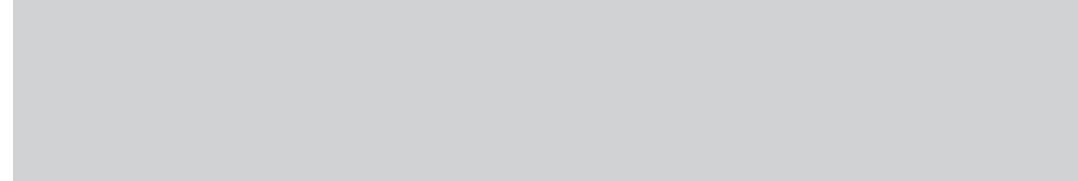

Anybody 'gets it'. And even highly visual people get more insight

Promote projects to communities, and enable people to experience solutions that answer objections

Smoothen the approvals process - officials experience your proposal in 3D Augmented Reality

Show design alternatives and update plans quickly. More efficient value engineering. Simple massing or highly detailed finishes

Buyers and tenants get to see different versions of the interior before it's done. Sell more units sooner, with less marketing budget

The most disruptive technology in urban and real estate development since 3D modeling

FAQs & About VISTAR >>

## Success Stories

"Exploring ideas on site and giving customers insights - this is a new game."

LOGO

>>

"I've never got approval for a development quicker..."

LOGO

>>

"I think we can do away with physical mockups now..."

LOGO

>>

"Return on investment is off the scale. The benefits are far-reaching..."
