

CAMPFIRE

AUDIO

Satsuma - Natural, clear and balanced sound highlighting guitars, keyboards, and vocals.

A single full-range balanced armature driver provides an accurate and mid-focused sound.

T.A.E.C. boosts the high-frequency extension while keeping the top end smooth and articulate.

The ported balanced armature adds just the right amount of impact to bass frequencies, keeping them tight and tracking in the mix.

Highlights:

Focused mid-band frequencies
Tightly controlled bass
Enhanced highs without harshness
Compact body designed for comfort.

SATSUMA

Honeydew -

Powerful performance with enhanced low-frequency characteristics for an increased sense of warmth and naturalism. Ideal for producers, DJs, drummers, and bassists. Listeners of modern pop, rock, hip-hop, and EDM will appreciate Honey Dew's immersive sonic presentation.

Custom-built 10mm LCP diaphragm dynamic driver delivers clear, punchy bass on an expansive sound stage.

Highlights:

Reference Level Bass Response
Fast and Detailed Sonic Performance
Exceptional Clarity
Compact body designed for comfort.

HONEYDEW
