

Lubrication Sytems

The bulk lubrication dispensing market is Fireball's original area of expertise. Growing from a one-man operation in its beginning, to the industry leader in comprehensive lubrication systems, Fireball Equipment Ltd. is a step above the competition. Sporting the title of being the #1 North-American Graco Lubrication Distributor, Fireball will deliver you the best system. Lubrication systems can be as small as grease tote setups, to as large as steel frame racks dispensing over a dozen fluids.

Graco Matrix is a wireless in shop fluid tracking system designed to track the dispense of oil and other maintenance fluids in a repair shop, service center or dealership. The system tracks every dispense and each one can be assigned to a specific work order so they can be properly billed. This automatic tracking of fluids not only saves money in terms of inventory shrinkage but also in man hours for tracking fluid transactions. Typically these systems pay for themselves in labor hours and inventory savings in under a year.

About Fireball

Fireball Equipment Ltd. is a market leader in providing fluid management systems and dispensing equipment. We provide solutions for fuel, lubricants and related products. This means an end to end solution for all fluid handling requirements, everything from tanks to store your product, to the nozzle that dispenses it. We also integrate products that track and monitor fluids so you know exactly what you have and where it goes.

In operation since 1992, Fireball Equipment has developed a reputation as the "do it all" people in the industry, as we work with everything from the smallest automotive shops to some of the largest mining projects in the world. We offer a full range of equipment and solutions to facilitate the needs of all industries. We have the knowledge and experience to design, supply and install systems and equipment to meet our customer's specialized needs.

Industry Leaders in Fuel and Fluid Handling Equipment

Fireball Equipment provides a variety of fluid handling solutions for the demanding needs of mobile equipment maintenance. Our equipment delivers lubricants to your equipment in an ergonomic, efficient and cost effective manner. Fireball has become the industry standard in the fluid handling industry.

Municipal projects have included:

- City of Edmonton
- City of Red Deer
- City of Saskatoon
- City of Lloydminster
 - BC Transit
- County of Lethbridge
- County of Minburn
- Town of Vegreville
- · Special Areas Board
- County of Lacombe
- County of Vermillion River

Our system design knowledge, coupled with experienced installation technicians, full time project managers, and an attentive service division ensures that your project will get done right - the first time!

Product Offering

Pneumercator

Fireball is the Canadian distributor for
Pneumercator Tank Level Management Systems the best and most rugged system available. With
products ranging from full multi-tank inventory
and monitoring systems, to point level controls Fireball will ensure complete fluid level awareness.
Through visual and audible alerts, as well as real
time remote monitoring, the remote tank level
management will provide automatic overfill
protection, leak detection and tank refill warnings.
Designed for industrial installations,
Pneumercator is the only product of its type to be
rated for NEMA 4 and NEMA 4X.

Fireball's close working relationship with Pneumercator since 2006 allows the customization of the system to meet virtually any tank configuration. With trained and knowledgeable technicians, Fireball Equipment Ltd. is the right contractor for you

FuelMaster

Syn-Tech's award winning FuelMaster system is the global benchmark for fuel accounting systems. Fireball Equipment is the exclusive Canadian distributor for this product, which is the standard system globally for the US Military. The ruggedness and durability of the FuelMaster system allows functional use anywhere in our demanding Canadian environment.

The system is composed of a Central Controller PC, a fuel management unit (as seen in photo below), and a secure access device such as a smart card, credit card, or a programmable key. Depending on what information your organiza-tion needs to track, FuelMaster will provide custom reports to suit your needs.
