

20FT CURVE - Quick Instructions

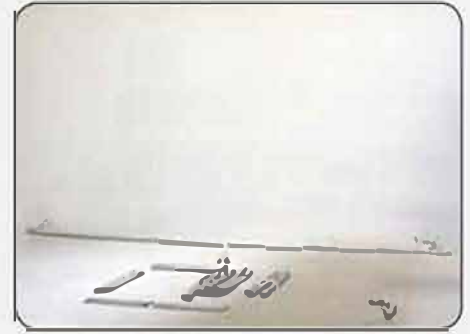

Kit Includes

- Qty2 8 Piece Pole Sections (for top & bottom)
- Qty2 3 Piece Pole Sections Medium (for left & right side)
- Qty1 3 Piece Pole Section Large (for center)
- Qty2 4 Piece Skinny Poles (for additional center support)
- Qty4 Arch Corner Pieces
- Qty1 Carry Cases with Wheels

Note

All the poles are bungee together in separate sections.
2 People recommended putting this together.
The poles are numbered making real easy to figure out what connects to what.

Step 1

Lay both your 8 piece pole section down on the ground. These are represented as your top and bottom section of the frame. Connect each of the poles together.

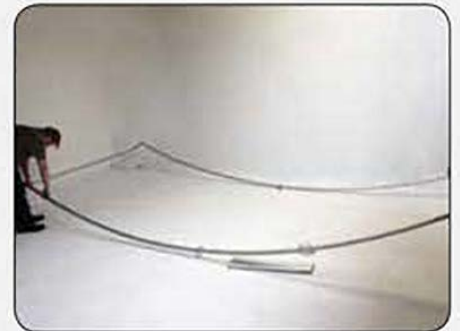

Step 2

Take your medium sized 3 piece poles and lay them down to the side of your frame, these are represented as your side poles. Connect the poles together.

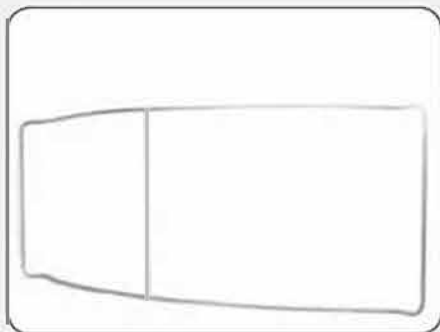

Step 3

Using the number guided system connect the arched poles with it's corresponding number to the 8 piece pole sets.

Step 4

Connect the 3 piece medium poles together using the same number system connecting them with the arch poles.

Step 6

Take the thin 3 piece poles and put them together. Once together place them inside the holes on each side of the frame.

Step 7

Laying the frame with curve facing up, slide your graphic facing up over the frame until it is a snug fit. Zip it all together and your done.

Step 5

Lift your frame upright. Connect the last 3 piece large pole kit together and place it in the center of the frame for added support.
