

POSITION DESCRIPTION

Job Title:	CNC Programmer/Setter/Operator
Location:	Twyford
Department:	Manufacturing
Position Reports to:	Manufacturing Manager

Background

Bremont is an award-winning British company producing beautifully engineered chronometers at our Headquarters in Henley-on-Thames.

Time began for Bremont in 2002, when we embarked on a journey to make beautifully crafted pilot's watches of exceptional quality. Inspired by a love of flying historic aircraft, of watches and all things mechanical, our timepieces had to be tested beyond the normal call of duty. The watches in our core range are all chronometer rated and we are one of the few companies offering a 3-year warranty on every product. Immensely precise, reliable and durable, Bremont watches are hand built in limited numbers. Each is designed to appeal to those who share our passion for - and appreciation of - the innovation and mastery behind a beautiful mechanical wristwatch.

Purpose of Position

We are searching for an experienced CNC Programmer/ Setter/ Operator to program/set and manufacture complex watch components to tight tolerances in our spotlessly clean manufacturing facility in Twyford using our multi axis machining centers.

The successful applicant will be:

- Programming, Setting and Operating our CNC multi axis machining centers
- Programming, Setting and Operating our CNC finishing machines
- Developing manufacturing processes for new components

The Candidate

We are looking for an experienced individual who is keen to work hard and maintain the highest quality standards at all times, within a team environment. A 'Can Do' attitude is a must, together with strong self-motivation.

You will:

- Have experience as a CNC Miller/Turner for a minimum of 3-5 years
- Be conversant with FANUC control and programming
- Have experience in using CAD/CAM software
- Receive full training on all equipment
