

RING SIZE CHART

To verify the measurements of this ring size chart, it should be printed at 100% and the line below should measure 125mm.

To determine a ring size, the ring should cover the circle so that the black circle touches the **inside** of the ring.

Please note that although you may use this ring sizer to get a fairly accurate measurement of your ring, it is always advised to have your ring sized by a professional jeweler using a professional tool to determine the exact size of your ring.
