TECHNICIAN'S CHOICE®

PROFESSIONAL SERIES

What is Graphene? Graphene is often referred to as the miracle material. It is considered to be one of the lightest, thinnest, yet strongest materials ever discovered. It has even been found to be one of the best heat- and electricity- conducting materials. It is an allotrope of carbon, consisting of a single layer of atoms arranged in a two-dimensional honeycomb lattice.

Introducing...

G-MAX™ G R A P H E N E

G-MAX™ Graphene Detail Spray features ceramic and graphene infusion to provide superior gloss and protection. TEC584 is the latest in exterior car care. The product takes the ease of use of a detail spray and turns the performance up to 11. Surface slickness is off the charts. Water beading is unstoppable. Gloss is eye piercing. Protection is the max.

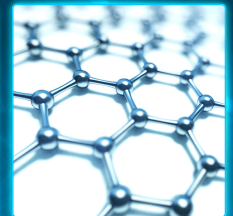

G-MAX™ Graphene Detail Spray is a versatile product which can be used on all of today's modern vehicle surfaces. Using G-MAX™ on your vehicle provides whole vehicle protection for up to 6 months with one application. Maintain that protection by reapplying G-MAX™ every 6 months. Repeated use of the product builds layers of protection and only enhances the overall look and protective qualities.
