MOMA Solar Flag Lighting

Zero emission operation

No ongoing energy costs

Low impact autonomous unit

Flag Lighting is used to improve night-time visibility on roads, particularly at intersections or areas with changed traffic layouts.

Improved visibility increases driver awareness of other vehicles and road conditions.

Kit Includes:

- LED Light
- Solar Panels
- Battery
- Battery Pits
- Gear Tray
- Cable Kits
- Pole/Ragbolts

Applications:

- Blackspot areas
- T or X junction roads
- Mine sites
- Highlight raised islands
- Areas with pedestrian access
- Rural/Developing Areas
- Unusual traffic layouts

**Contact MOMA Solar for project-specific design and specifications*
