

SHYIELD™ WIPES

SHYIELD™ Wipes effectively clean and disinfect surfaces in just 3 minutes. They provide an easy and convenient approach to cleaning and disinfection to prevent cross-contamination. They are non-irritating to eyes and skin. You can be confident knowing it's gentle for people, surfaces, and the environment but tough on pathogens of concern.

APPLICATIONS*

Scales, countertops, handheld equipment, office areas and other high-touch surfaces.

CONTACT TIME OVERVIEW

Fungicidal	3 minutes
Bactericidal	3 minutes
Virucidal	3 minutes
Tuberculocidal	3 minutes
Broad-spectrum sanitizing	30 seconds

SURFACE SHOULD BE WET FOR ENTIRE CONTACT TIME

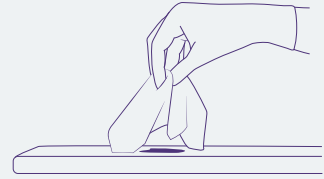

HOW TO USE SHYIELD™ WIPES†

STEP 1

Pre-clean heavily soiled areas when necessary

If required, remove all plants or debris, clean the area, and rinse with potable water prior to disinfection.

STEP 2

Wipe surface until thoroughly wet

Wipe all surfaces and equipment. Avoid contact with plants.

STEP 3

Allow surface to remain wet for 3 minutes

For disinfectants to be effective, they must remain wet on the surface for their entire contact time as per label directions.

STEP 4

Allow to air dry

Allow surfaces and equipment to simply air dry.*

SUCCESS & TROUBLESHOOTING TIPS

CLOSE THE LID.

SHYIELD™ Wipes have a shelf life of 2 years. Make the most of that time by remembering to close the lid of the canister after each time you pull a towelette.

WIPE AND WALK AWAY.

Always follow the required contact time when disinfecting a surface for a particular pathogen. The best practice is to simply apply the product and walk away while the surface air dries.‡

* Applications provided are not an exhaustive list.

† Refer to product label and reference sheet for full list of claims, contact times and use-directions.

‡ Only food contact surfaces or equipment that may come into contact with plants or cannabis require rinsing with potable water.
