

# *The String Caddy™*

*Spare line storage for your string trimmer*

## *Assembly Instructions*

***The String Caddy™ is designed to be clamped to your string trimmer's shaft.***

***To assemble, place the nest against the shaft. Apply the provided Vibra-Tite thread locker to the lower area of the provided 8-32 x 1-3/8" phillips head screws as shown above. Tighten the clamp to the backside of the shaft with the screws until The String Caddy™ is secure on the shaft.***

***Coil up to 16' of trimmer line inside The String Caddy™, so you have plenty of extra string with you when your string trimmer runs out!***
