PENTAIR
EVERPURE • SHURFLO

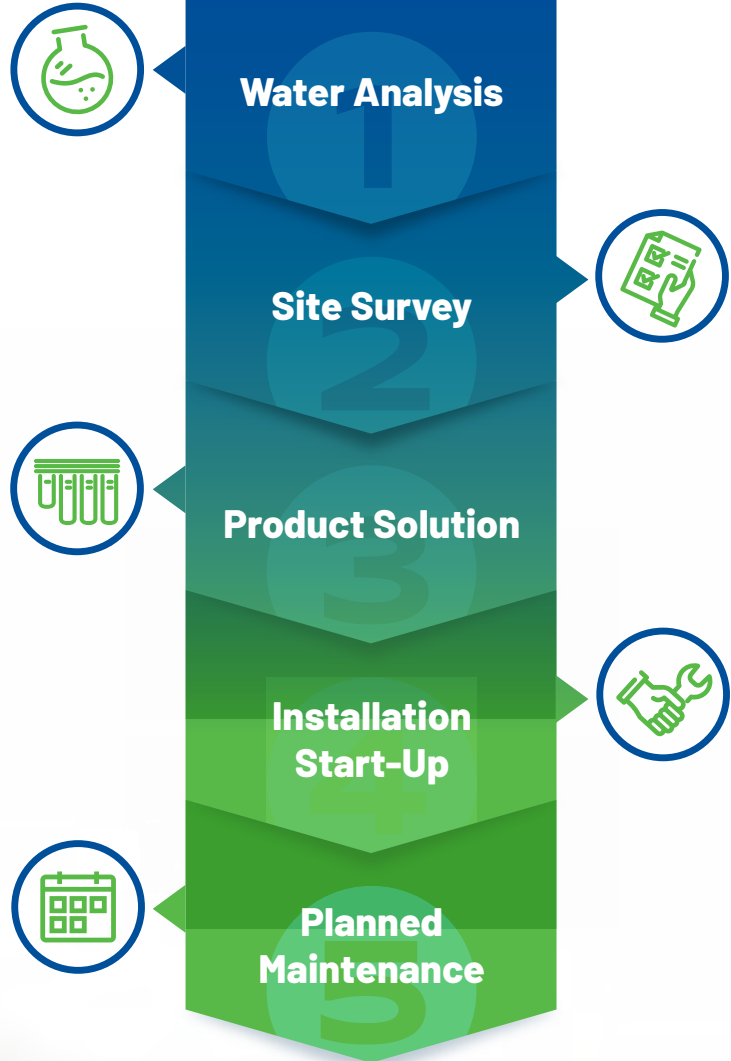

WORRY FREE WATER FOR EVERY STEP OF YOUR BUSINESS.

Make managing your water easier and more cost-effective than ever before. As your end-to-end custom water treatment solutions provider, you can count on our team of Pentair water experts and network of service providers to help support your water-using equipment needs.

Simply put – we offer water expertise and peace of mind.

It is essential to consider the impact water can have on your equipment, products, customers and success. The chemical characteristics of water affect the quality and consistency of beverages, operating efficiency, and life of equipment. In many cases, water is the cause of expensive repairs, shortened equipment life, and poor beverage quality.

5 easy steps to Total Water Management
Pentair water filtration service supports your business.

Peace of mind.

Your water and your business can run smoothly and safely.

TOTAL WATER MANAGEMENT PROGRAM

PRICE LIST

PART NUMBER	SERVICE OFFERING	DESCRIPTION	LIST PRICE	PRICE
Water Testing				
180-80193	Basic foodservice water analysis	H ₂ O Express Test (sold in cases of 6) - Analysis for 10 basic contaminants. Pentair specification and equipment recommendation	\$73.50	List Price *multiplier
DEV701373	Standard foodservice water analysis	Analysis for 30 contaminants. Pentair specification and equipment recommendation	\$319.50	List Price *multiplier
DEV980015	Standard foodservice + organics water analysis	Analysis for 30 contaminants + TTHMs, VOCs and bacteria. Pentair specification and equipment recommendation	\$391.00	List Price *multiplier
Perform Site or System Evaluation				
SITESURVEY	Pre site survey (EV7016-89 Rev A)	Single POU visit (<5000 ft ²) for rough-in guidance or readiness pre-installation - execute water test if needed (as an additional purchase)	NA	\$193.00
SVCCALL	Reactive service call or system inspection	Dispatch of ISP for system with performance issues or assessment of a system after install (done by others)	NA	\$362.00
Perform Installation of Purchased Equipment				
EVNTW0000	Single POU filter & head	Single POU filter, head, inline filter or prefilter - QL3-BH ² , QC7I-MC ² , Insurice-I2000 ² , TKO Endurance, LVPO, FX (single), CGS (single) and other inlines	NA	\$254.00
EVNTW0010	Filter system	Filter system manifolded head with prefilter - Coldrink/Insurice (single, twin, triple), Kleensteam, Endurance, High-flow CSR, FX (multi), CGS (multi)	NA	\$676.00
EVNTW0020	Filter system & softener	Filter system manifolded head, prefilter & softener - Coldrink/Insurice (single, twin, triple), Kleensteam, Endurance, High-flow CSR, FX (multi), CGS (multi) and softener	NA	\$1,345.00
EVNTW0080	Small reverse osmosis system	Small RO (less than 175 GPD) - Conserv 75S, E, LT-S and LVRO-75HE, BWS100-175, OPS70-175	NA	\$561.00
EVNTW0083	Medium reverse osmosis system	Medium RO (175-350 GPD) - Plate mount MRS, R0mate tank, tank kit and EBV (EV999998), OP175	NA	\$1,087.00
EVNTW0086	Large reverse osmosis system	Large RO (350-1200 GPD max) - MRS-600 HE/HE-II, BWS350-1500, OP350 w/R0mate tank, tank kit, water boost and EBV (EV999998)	NA	\$1,811.00
EVNTW0090	Medium reverse osmosis & softener system	Medium RO (175-350 GPD) - Plate mount MRS, R0mate tank, tank kit and EBV (EV999998) & softener (pre assembled softener), OP175	NA	\$1,534.00
EVNTW0093	Large reverse osmosis & softener system	Large RO (350-1500 GPD max) - MRS-600 HE/HE-II, BWS350-1500, OP350 w/R0mate tank, tank kit, EBV (EV999998), water boost, pre-filter w/softener	NA	\$2,324.00
Perform Water Treatment System Service of Installed Equipment				
EVRTW0070	TWM single POU filter service	POU & basic filtration service - filter cartridge change and restart (cartridges sold separately)	NA	\$242.00
EVRTW0073	TWM combination filter system	Combination filter system service - cartridge change, replace scale stick, flush and restart (cartridges sold separately)	NA	\$332.00
EVRTW0080	TWM small/medium RO system service	RO system service - cartridge change, flush, adjustments and performance check (cartridges sold separately)	NA	\$380.00
EVRTW0083	TWM large reverse osmosis system service	RO system service - cartridge change, flush, adjustments and performance check (cartridges sold separately)	NA	\$664.00
EVRTW0090	TWM reverse osmosis system & softener service	RO & softener service - cartridge change, flush, adjustments, performance check & softener sanitization (cartridges sold separately)	NA	\$815.00
Installation of Additional Products (other operations)				
EVNOP0300	Additional small tank - installed while on-site	Installation of supplemental tank (> 15 gallons) for capacity (includes install of shut-off valve sold separately)	NA	\$60.00
EVNOP0400	Additional large tank - installed while on-site	Installation of supplemental tank (< 15 gallons) for capacity, (includes install of pressure-relief valve kit sold separately)	NA	\$103.00
EVNOP0600	Earthquake strap - installed while on-site	Installation per local code - price is PER strap to be installed (typical is 1 or 2 straps per tank or softener sold separately)	NA	\$78.00
EVNOP0800	Water boost system - installed while on site	Installation to assure sufficient pressure supplied to treatment system (for dynamic pressure > 50 psi, 804-064 sold separately)	NA	\$151.00
EVNOP0100	Upgrade to 2nd membrane kit, for MRS-600 HE-II	HE-II only, RO upgrade to double production capacity (EV997000 sold separately) Note: kit requires soft water feed	NA	\$242.00
EVNOP1000	Installation of emergency bypass valve	Installation of emergency bypass valve on medium or large RO system (EV999998 sold separately)	NA	\$242.00
TEMPVALVE	Tempering valve	Install with five (5) feet of pipe for hot and cold water. (Recommended for installs north of 37th parallel due to low water temperature)	Special quote	
MILEAGE	Additional mileage charge < 50 miles	First 50 miles covered at no charge for service calls - 25 mile radius	NA	\$1.20
LABORSTD	Hourly labor rate (Normal operating hours rate)	Pentair ISP - additional hourly service charge, should there be a need for additional work	NA	\$190.00
TARGETED	Equipment disposal	Disconnection, removal and disposal of old system: some regions/locations require proper environmental disposal of equipment and used cartridges	NA	\$302.00
FALSESTART	False start	Service agent shows up on-site and site is not ready for one (1) trip install and work completed - see Site Survey options above to help avoid this	NA	\$604.00

NOTE: Pricing is for Pentair service and labor only, NOT equipment. Contact your Pentair sales manager or partner for equipment pricing.

ADDITIONAL INFORMATION:

- Water (at dynamic pressure of at least 50 psi), electric, and drain must be within 5' of install location.
- To assure site readiness for installation, a readiness checklist will need to be completed and photos of install location are required.
- Assumes 50 miles or less travel for ISP (Independent Service Provider).
- Based on local water conditions, additional equipment and services may be required.
- Local codes may require special and additional work, which may add additional cost. For example, painting copper pipes upon install in Las Vegas, NV is a local requirement.
- Please contact Pentair TWM at 800.842.6193 or TWM@Pentair.com for any site questions and expectations. Pentair technical service and our Regional Operations Managers will answer your questions.

See pages 124-127 for the list of systems that can be installed and/or serviced through the Total Water Management program.

WATER TESTING KITS

Water itself isn't just H₂O; dissolved in it are tiny amounts of minerals, organic matter and other particulates with a huge impact on the quality, safety, and taste of the food and drinks offered to customers. Additionally, water quality can affect expensive foodservice equipment maintenance frequency, life-span, and down-time.

Since water quality varies from location to location, testing water at each one is critical. Pentair offers several water testing options, including the new H₂O Express Test Kit.

Product	Part No.	Description	Pack Size	List Price
Digital Pocket TDS Meter	EV6500-20	0-9990 ppm TDS; temperature reading 32-176°F [0-80°C]; reading "hold" function with soft case	1	\$85.00
Claris™ Test Kit	EV4339-40	Titration test for carbonate hardness, necessary for properly setting the bypass dial on Claris systems	1	\$74.50
H ₂ O Express Test Kit	180-80193	Includes water bottles and lab analysis of 9 common contaminants	6*	\$73.51
Standard Foodservice Water Analysis	DEV7013-73	Includes water bottle and lab analysis of 30 contaminants and characteristics	1	\$319.50
Standard Foodservice and Organics Analysis	DEV9800-15	Includes water bottle and lab analysis of 30 contaminants plus TTHMs, VOCs and bacteria	1	\$391.00

* List price each, only sold in packs of 6.

Claris™ is a trademark of Aquis, GmbH.

Digital Pocket TDS Meter: EV6500-20

H₂O Express Test Kit: 180-80193

FOODSERVICE WATER SPECIFICATIONS

Quality water is important for taste, brewing, carbonation, steaming, equipment protection and more. Water used to make coffee, espresso beverages, fountain beverages, drinking water and ice must be potable under local requirements and USEPA drinking water standards. It is also recommended that water quality meets the attributes specified in the following table by food service application:

APPLICATION	Attribute	Specification
 <p>Coffee & Espresso</p>	Turbidity	Must not exceed 0.5 Nephelometric Turbidity Units
	Taste & Odor	Free from off-tastes and odors
	Total Chlorine	<0.05 ppm
	Iron	Not more than 0.25 ppm
	Total Alkalinity	Not more than 100 ppm
	Total Hardness	17 - 85 ppm
	Total Dissolved Solids	70 - 200 ppm
	pH	6.80 - 7.40
	Sodium	At or near 10 mg/l
	 <p>Fountain & Drinking Water</p>	Turbidity
Taste & Odor		Free from off-tastes and odors
Total Chlorine		<0.05 ppm
Iron		Not more than 0.30 mg/l
Total Alkalinity		Not more than 150 mg/l
Total Hardness		Not more than 100 mg/l
Total Dissolved Solids		Not more than 500 mg/l
Sulfates		Not more than 250 mg/l
Chlorides		Not more than 250 mg/l
pH		6.50 - 8.50
 <p>Ice</p>	Turbidity	Must not exceed 0.5 Nephelometric Turbidity Units
	Taste & Odor	Free from off-tastes and odors
	Total Chlorine	<0.05 ppm
	Iron	Not more than 0.25 ppm
	Total Alkalinity	<150 ppm
	Total Hardness	<85 ppm
	Total Dissolved Solids	70 - 200 ppm
	pH	6.80 - 7.40
	Chlorides	≤80 ppm

Water used on inlets to steamers or warewashers should meet quality requirements as specified by the equipment's manufacturer or as listed in the following table:

APPLICATION	Attribute	Specification
 <p>Steam</p>	Turbidity	Must not exceed 0.5 Nephelometric Turbidity Units
	Taste & Odor	Free from off-tastes and odors
	Total Chlorine	<0.05 ppm
	Iron	Not more than 0.25 ppm
	Total Alkalinity	Not more than 100 ppm
	Total Hardness	17 - 85 ppm
	Total Dissolved Solids	25 - 75 ppm
	pH	6.80 - 7.40
	Chlorides	≤30 ppm

OZONE DISINFECTION PRODUCTS

ICE AND INDOOR AIR SOLUTIONS

Ozone products have been used in the food industry for decades and can play a critical role in combating food pathogens in water and air. Approved by the FDA as an antimicrobial agent, ozone can support your efforts to improve the safety, quality, and longevity of your products.

PENTAIR® EVERPURE® OXIDICE

Oxidice is a disinfection system that treats your entire ice machine from the inside, attacking biofilm at its source. It helps reduce the growth of bacteria, molds, yeast, and other contaminants by treating the air, water, and surfaces within the machine without leaving any residues or off-tastes. Especially effective in cube ice machines, it extends the time between maintenance and cleaning while producing high-quality ice for you and your customers.

Applications

- Bakeries
- Breweries
- Cafes
- Grocery Stores
- Hotel/hospitality
- Nursing Homes
- Restaurants
- Schools

Features • Benefits

- Variable ozone output
- LED status indicators
- Fast and simple installation
- Fits most ice machines
- Microprocessor controlled
- Unique application method that treats the water, air, and internal surfaces
- Universal power supply
- Automated service timer
- No chemicals - nothing to fill or recharge
- Only by-product is oxygen*
- 6' (1.8 m) grounded power cord

System	Part No	Power Cord	Air Flow	Ozone Level	Ambient Conditions	Outlet Connection	Input Power	List Price
Oxidice	CD385A	120V US/Can	0.5-2.0 (14-56.6 L/h) SCFH, back pressure 2 PSI (13.8 kpa) max	150 mg/hr (56.6 L/h) @ 2.0 SCFH on ambient air	32 - 95°F (0-35°C) 10-75% RH non-condensing	3/16" barb	90-265 VAC 50-60 Hz 0.38-0.17A	\$999.00
	CD390D	US 240V US/Can						

Clean Starts With Your Ice Machine

Oxidice uses a unique ozone disinfection process that uses both aqueous and gaseous oxidation simultaneously to help reduce contaminants in the air and the water.

* -Any ozone that does not react with another compound will break down to oxygen. In water, half of the unused ozone will revert back to oxygen in 20 minutes at 68°F (20°C). In air, half of the unused ozone will revert back to oxygen in 3 days at 68°F (20°C).

PENTAIR® COMAIR 20T

Commercial Whole-Building Indoor Air Treatment

The ComAir 20T is a powerful, commercial-grade HVAC sterilization system designed to reduce indoor airborne contaminants and unwanted odors, leaving behind fresh, cleaner air. Installed in the centralized HVAC system of your commercial space, the ComAir 20T provides "double-layered" protection with two specially-designed lamps.

- Adjustable output
- In-duct installation and operation
- Ozone and UV lamps
- Stainless steel construction
- Covers up to 10k square feet
- Microprocessor controlled
- Boost function for extreme odor control
- Universal power supply
- Connected ozone sensor ensures system effectiveness and safety

Part No	System	Power	Ozone Output	List Price
HVAC45	ComAir 20T	150W at max output setting at 120V	0.08 ppm; max @ 3500 CFM; depends on load in air	\$3,129.00

Ozone Lamp Specifications

- Maximum Service Capacity: 20T, 8,000 CFM or 10,000 sq. ft. per unit
- AC Unit Size: 20 tons (maximum)
- 25W, Hot filament, instant-start, hard quartz, glass construction –*unaffected by number of startups*
- 185 nm wavelength output
- Rated Life: 20,000 hours (2-3 years continuous use)
- Maintenance: annual cleaning
- Ozone output settings are adjustable based on need (low, medium, high, and boost)

Germicidal Lamp Specifications

- Maximum Service Capacity: 20T, 8,000 CFM or 10,000 sq. ft. per unit
- AC Unit Size: 20 tons (maximum)
- 90% of output at 254 nm wavelength
- Rated life: 20,000 hours (2-3 years continuous use)
- Maintenance: annual cleaning
- Easy lamp service requires
- Output (measurements taken at 70°F)
 - 300 micro watts per sq. cm at 39.37" (1m)
 - 2,400 micro watts per sq. cm at 12.00"
 - 7,450 micro watts per sq. cm at 6.00"

* Harmful cyst and microbial reduction by mechanical means. For further information concerning FIFRA registration, see product specification sheets.

† Based on 10 grains of hardness (with Claris, a bypass setting of 4).

‡ Estimated. Actual capacity may vary depending on volume of particulate in incoming water.

§ Grains Hardness Reduction.

|| For direct injection combi ovens; capacity based on influent water TDS of ppm, hardness of 180 ppm and chloride 60 ppm with standard bypass settings.

¶ For espresso; capacity based on influent water TDS of ppm, hardness of 180 ppm and chloride 60 ppm with standard bypass settings.

Note: See individual system specification sheets for performance claims and FIFRA registration information.

Water Makes up 98% of

Coffee, Tea, and Espresso

The chemical and physical properties of water have a significant impact on achieving the right body, balance, flavor, and finish of coffee, tea and espresso.

- Low TDS water causes too many coffee oils to be released, resulting in a bitter, oily flavor.
- High TDS water causes too few coffee solids and tea flavonoids to be released, resulting in weak flavor.
- Excessive TDS and water hardness cause scale build-up and corrosion in equipment resulting in costly repairs and downtime.
- High chloride and sulfate levels are detrimental to coffee balance and flavor and can be corrosive, even to stainless steel equipment.

Everpure Coffee Filtration Systems

- Reduce sediment and chlorine, taste & odor off-taste
- Contain 0.5-micron precoat filtration by mechanical means* with scale control
- Reduce harmful cysts by mechanical means*
- Effectively inhibit bacteria growth on filter media that can decrease product life* with proprietary Micro-Pure® II filtration
- NSF certification

System sizing guidelines

Our system sizing guidelines are approximations based on properly installed equipment, average usage at normal operating flow rate and average water conditions. These guidelines are designed to give you approximately six (6) months of use between filter cartridge changes. Variations in equipment usage and/or incoming water conditions may produce different results.

EVERPURE SOFTENING, FILTERING & BUFFERING ESPRESSO SYSTEMS

Everpure Blending Systems - ESO and Claris™ Ultra

ESO and Claris Ultra both offer

- Salt-less ion exchange provides excellent scale prevention
- Integrated carbon filtration improves off-taste & reduces odor for beverages
- Blending of filtered water with softened water to optimize mineral content

What's the difference?

- ESO - fixed blend of about 40% filtered water
- Claris Ultra - adjustable blend for custom mineralization content (pages 19 - 21)

Everpure® Claris™ Systems

for Coffee, Tea, and Espresso

Everpure Claris Systems have been specifically developed to remove a range of contaminants from water while minimizing operation costs.

EVERPURE CLARIS FILTRATION SYSTEMS

These systems remove impurities that can contribute to unwanted tastes and odors in beverages and food as well as harm equipment. Using unique water purification and softening technology, these systems are able to effectively combine hardness reduction, mineral stabilization and corrosion inhibition by maintaining a controlled low carbonic acid level in the water.

Applications

- Drip Coffee
- Espresso
- Coffee Machines
- Direct Injection Combi Ovens

Benefits of Claris Filtration Systems

- Optimal use of ingredients allows for best appearance and taste of hot food and beverages
- Scale inhibition prevents frequent downtime and maintenance costs to descale
- Corrosion protection from mineral-induced contaminants extends life of equipment
- Enhanced energy efficiency helps lower cost of operations
- Smaller footprint allows flexibility in limited spaces

Claris™ is a trademark of Aquis, GmbH

EVERPURE® CLARIS™ FILTRATION SYSTEMS

Everpure offers two lines of Claris systems - Claris Ultra and Claris Prime

Claris Ultra was designed in several different sizes for customizing specific applications and water treatment needs. The cartridges reduce limescale and harmful contaminants that affect water taste and odor by employing ion exchange technology to remove carbonate hardness and lower alkalinity, preventing scale formation on equipment.

Claris Prime was developed for use in specialty coffee and direct injection combi oven applications and goes a few steps beyond Claris Ultra by reducing chlorides and sulfates and offering adjustable total dissolved solid (TDS), chloride, and sulfate levels.

CLARIS ULTRA AND CLARIS PRIME DIFFERENCES

Features	Filter Head	
	Everpure Claris Prime	Everpure Claris Ultra
Number of cartridge sizes fit one head	1 Size - XXL	5 Sizes - 250, 500, 1000, 1500, 2000
Combined mineral adaptation and stabilization	Yes	Yes
Bypass accuracy over velocity and pressure	Very stable - DuoBlend®	Very stable - DuoBlend®
Adjustable bypass valve	Yes	Yes
Bypass level stages	7 Positions	7 positions
Corrosion Inhibition	Yes	Yes
Inhibition of metal migration from machine parts	Yes	Yes
Chloride and sulphate reduction	Yes	No
Adjustable chloride and sulphate level	Yes	No
Adjustable level of entire TDS minerals	Yes	No
pH value / pH fluctuation	Low pH fluctuation due to DuoBlend technology	Maintains pH range according to EU drinking water regulation with high accuracy due to DuoBlend technology
Capacity range of filter family in Liters	XXL chosen to achieve highest capacity	Widest capacity range in market - one head fits all
Capacity on space ratio per cartridge	Excellent capacity for total demineralization technology	Widest ratio of all cartridges in market
Installation cartridge in head	Quick - bayonet	Quick - bayonet
Horizontal use	Yes	Yes

Claris Ultra 2000

Claris Prime

Operator Savings Benefits

The financial impact of machine downtime, repairs and full replacement can be burdensome to operators. Unplanned costs and time-consuming repairs, especially during peak operating hours, can negatively impact business. The Claris™ Prime technology helps lower the impact of most of these problems by providing lower operating costs and promoting long equipment life. The result is both happy operators and satisfied customers.

EVERPURE® CLARIS™ FILTRATION SYSTEMS

Claris Filter Head Features

- Fits all Everpure Claris Cartridges
- Bypass settings tamper proof
- Bypass level stages in seven (7) positions
- Very stable DuoBlend® Bypass accuracy over velocity and pressure
- Quick and easy bypass with provided key
- Easy-to-read clear marks on bypass setting key
- Easy and secure bypass setting function with use of bypass setting key
- Shut-off valves standard inlet / outlet
- Non-return (check) valve-in-head standard in 3/8" JG inlet connector
- Automatic shut-off - rotation type inlet and outlet
- Flexible modular head- different connection types
thread or 3/8" BSP, 3/8" NPT and 3/8" and 8 mm JG, two-sided connection
- Easy and secure cartridge replacement - just a 45 turn

* Based on 10 grains of hardness and a bypass setting of 4".

[†] Cartridge and head sold separately (although product pictures above show both).

[‡] Not shown.

[§] For direct injection combi ovens; capacity based on influent water TDS of ppm, hardness of 180 ppm and chloride 60 ppm with standard bypass settings.

[¶] For espresso; capacity based on influent water TDS of ppm, hardness of 180 ppm and chloride 60 ppm with standard bypass settings.

^{¶¶} Requires BSP Head EV4339-90.

Fountain Beverages are 83% Water

The chemical and physical properties of water have a significant impact on achieving the right balance and flavor of fountain beverages.

- High TDS and mineral levels in water cause bitter taste and objectionable odors in fountain beverages
- Water with high sediment cause beverages to be cloudy
- High levels of chlorine and chloramine in water cause poor flavor and inconsistent beverage quality
- In certain conditions, chloramine can cause damage to equipment

Everpure fountain beverage filtration systems

- Have inlet water shutoff valve in manifolds with optional integrated sediment prefilter, flushing valve and water pressure gauge(s)
- Reduce chloramine, chlorine, sediment, and foul taste & odor
- 0.5-micron filtration by mechanical means*
- Reduce harmful cysts by mechanical means*
- Inhibit bacteria growth on filter media that can decrease product life* with proprietary Micro-Pure® II filtration
- NSF certification

System features include

- NSF certifications
- Manifold has inlet water shutoff valve with optional integrated sediment prefilter, flushing valve and water pressure gauge(s)
- Harmful cyst reduction by mechanical means*
- Chloramines, chlorine, taste & odor and sediment reduction
- 1/2 micron filtration by mechanical means*, featuring Micro-Pure® II filtration media effectively inhibits the growth of bacteria on the filter media that can decrease product life*

Ambient carbonation versus cold carbonation

- If a carbonator is placed before the water is chilled using a cold plate, the associated term is ambient carbonation. When it is placed post-chilling, it is cold carbonation. Water that is cold absorbs CO₂ better so drinks will have more fizz.

See page 57 for RO systems designed to tackle high TDS issues

System sizing guidelines

Our system sizing guidelines are approximations based on properly installed equipment, average usage at normal operating flow rate and average water conditions. These guidelines are designed to give you approximately six (6) months of use between filter cartridge changes. Variations in equipment usage and/or incoming water conditions can produce different results.

Carbonation Type	Carbonation Only			Carbonated and Non-Carb [†]		
	System: Part No	Number of Carbonators	Flow Rate GPM/LPM	System: Part No	Number of Carbonators	Flow Rate GPM/LPM
Ambient Carbonation	Coldrink® 1: EV9328-01	1	1.67 / 6.32	Coldrink 2: EV9328-02	1	3.34 / 12.64
	Coldrink 2: EV9328-02	2	3.34 / 12.64	Coldrink 3: EV9328-03	2	5.01 / 18.96
	Coldrink 3: EV9328-03	3	5.01 / 18.96	QC7I Quad: EV9336-11 / EV9612-56 [§]	3	6.68 / 25.30

Cold Carbonation	Coldrink 2: EV9328-02	1	2.10 / 7.95	Coldrink 2: EV9328-02	1	3.10 / 11.73
	Coldrink 3: EV9328-03	2	4.20 / 15.90	Coldrink 3: EV9328-03	2	5.20 / 19.68
	QC7I Quad: EV9336-11 / EV9612-56 [§]	3	6.30 / 23.85	Coldrink 3-7FC: EV9328-73	3	7.30 / 27.63
	Coldrink 4-4FC: EV9328-44	4	8.40 / 31.80	Coldrink 4-7FC: EV9328-74	4	9.40 / 35.58

* See individual system specification sheets for performance claims and FIFRA registration information.

[†] Add 1.0 gpm [3.78 Lpm] for Non-Carb Beverage Systems.

[§] Head and cartridge sold separately.

Calculating Water Usage for Beverage System Selection

1. Determine bag-in-box (BIB) water usage by adding up all of the BIBs used for carbonated and non-carbonated beverages in a month and multiply by 25.
2. Estimate filtered drinking water dispensed from a post-mix valve or water fill station.
3. Add estimated drinking water dispensed to BIB water usage. Multiply that number by six (6) to calculate total water usage for a six-month period.

Example:

75 BIB/mo x **25** (gallons) = **1,875** gallons of water/ month
1,875 (BIB) + **500** (estimated drinking water) = **2,375** gallons/month
2,375 (gallons) x **6** (months) = **14,250** gallons every six months

Note: Actual water usage should not exceed system filtration capacity

¶ Nominal filter rating 0.2 micron as tested by Pentair.

What you Should Know about Chloramines

What are chloramines?

Chloramines are a combination of chlorine and ammonia, and are used as a disinfectant to treat drinking water as an alternative to chlorine.

Why chloramines versus chlorine treatment?

Chloramines provide longer-lasting water treatment as water moves through distribution systems to end-users.

Due to stricter government regulation, specifically the USEPA's Stage 2 Disinfectant Byproduct Rules, many US municipalities are switching from chlorine disinfection to chloramines disinfection.

Chlorine Ammonia Chloramines

Chloramines are chlorine bonded with ammonia. This provides more stability for better disinfection over long distances in pipe lines. It lasts two or three days instead of just a few hours for free chlorine. Also, because it's less likely to create byproducts such as THMs, it helps municipalities meet new EPA guidelines for drinking water quality.

EVERPURE® CB20 SYSTEMS

System features include

- Cartridge(s)
- Gauge(s)
- Flush valve

Shurflo® Beverage BIB Pumps

The hydraulic pressure and strait-through flow-path design can maximize performance and minimize pressure drop.

SHURFLO® GENERAL BEVERAGE BIB PUMPS

Shurflo heavy-duty, gas-driven (CO₂ / Air) diaphragm pumps are designed for the dispensing of Bag-in-Box (BIB) syrups, teas, juices, and wines. It utilizes a technically superior, straight-through flow path design to maximize performance by minimizing pressure drop. The pumps feature an automatic demand and sold-out vacuum shutoff for ease of operation.

- Straight, short syrup path for consistent, efficient delivery
- High volume per stroke for maximized pump life
- Operating pressure to 85 PSI [5.86 bar] handles the most difficult installations, suitable for all pumping needs

SHURFLO® BEER ACE™ II PUMPS

The Shurflo Beer Ace II Pump has positive inlet pressure and is gas-operated. The pump is used to drive beer from the keg to the tap without over-carbonating the beer.

- Dispense speed can be altered without over-carbonating the beer
- Handles long and difficult runs
- Enlarged pumping chambers and long piston stroke gives desired flow rate with fewer cycles and reduced wear
- Smooth flow and longer pump life

SHURFLO VACUUM REGULATING VALVES (VRV)

The Shurflo Vacuum Regulating Valves allow beverage pumps and brix pumps to receive liquid from a pressurized source. These pumps are not designed to have positive liquid inlet pressure (except Beer Ace II Pumps). By positioning a vacuum regulator at the inlet of the pump, incoming liquid pressure is reduced to zero. This allows for the pumps to be plumbed in series for long distance pumping applications.

Part No	Description	Case Qty	List Price
94-054-02	With fittings, 3/8" [10 mm] barb elbow, EU Materials	30	\$80.50

SHURFLO® AUTOMATIC SELECTOR VALVES (ASV)

The Shurflo ASV permits two or more syrups (BIBs) to be connected at the inlet port of the BIB pump. The BIB pump draws product through one side of the ASV until the BIB is evacuated and higher-than-normal vacuum is detected. Once the “switching” level of vacuum is reached, the ASV automatically switches and begins drawing product from the BIB connected to the other side. The ASV permits uninterrupted beverage dispensing and allows store personnel the ability to replace the BIBs at a convenient time.

Part No	Description	Case Qty	List Price
94-350-08	General beverage, 18.0 in. [45.7 cm] Hg. switch point, 3/8" [10 mm] barb fittings	30	\$71.50
94-350-03	General beverage, 18.0 in. [45.7 cm] Hg. switch point, 3/8" [10 mm] barb fittings – elbow on outlet	30	\$78.50
165-110 High Altitude	General beverage, 12.0 in. [30.5 cm] Hg. switch point, 3/8" [10 mm] barb fittings – replaces 165-010	30	\$70.00

SHURFLO AIR VENT

The Shurflo Air Vent incorporates membrane technology to capture and eliminate entrained air/gas normally found in BIB systems. Capable of eliminating up to 2.5 BIBs [9.5 L] of air per day at 60 PSI [4.1 bar], this device has ample capacity for even high volume accounts. The Shurflo Air Vent product design life tested to an equivalent of 15 years of performance. Product changes occur quickly, eliminating waste due to flavor and color carryover.

- Air vent sealed from syrup
- Utilizes gas permeable membrane to vent gas/air
- Service flow rate up to 4.70 oz [0.14 L] per second
- No moving parts = no disassembly

Part No	Description	Case Qty	List Price
SVA00R1	With standard slide track bracket, w/o fittings	6	\$116.50

Utilizes standard BIB pump liquid inlet/outlet fittings. (See page 93 for fitting options.)

SHURFLO® BRIX PUMPS

The Shurflo Brix Pump is a unique syrup- and water-driven proportioning pump. It eliminates the brix adjustments with a set portion delivery, ensuring a consistent, repeatable ratio on every beverage. The particular ratio is determined by the pump design and is maintained, independent of system flow or pressure changes. The brix pump is driven by pressurized water. The pump operates whenever there is a difference in pressure between the inlet and outlet (water) sides of the pump. The Shurflo Brix Pump is equipped with a vacuum shutoff. This feature is designed to automatically stop the pump when the Bag-in-Box (BIB) container is completely evacuated by closing off the inlet water to the pump. When a new BIB is installed, the pump will automatically start without priming the system.

- Sold out feature
- Metal mounting bracket
- 3-way sanitizing valve
- Fittings:
 - syrup in/syrup out - 3/8" [10 mm] barb elbow, white celcon
 - water in/water out - 3/8" [10 mm] barb elbow, stainless steel

Standard Post-mix System with 3-way Sanitizing

Part No	Description	Case Qty	List Price
94-260-03	White, 4:1 ratio	8	\$537.00
94-260-05	White, 5:1 ratio	8	\$537.00

NOTE: Maximum water inlet pressure 50 PSI [3.45 bar]. Pentair recommends using a 30 or 50 PSI [2.07 or 3.45 bar] Shurflo Water Pressure Reducer Valve on the water inlet of the brix pump. See page 35 for Shurflo Water Pressure Reducer Valves. See page 94 for BRIX pump accessories.

Polyurethane Bladder for Water Boost Pumps

Benefits Over Chlorobutyl Bladder

- Same replaceable bladder design
- Improved taste profile
- 8% more capacity in 6-gal. tank: ~0.17 gallons @ 50 psi precharge and 100 psi of water in the tank
- Separate 2-gallon and 6-gallon bladder kits are backwards compatible with existing water boost systems
- Better chloramine resistance
- NSF and EU compliant

See Shurflo Water Boost Replacement Parts page 34

SHURFLO® WATER BOOST SYSTEMS

As foodservice establishments continue to expand their beverage offerings, the increased water usage can adversely impact operational performance. This, coupled with fluctuating city water flow and pressure, can lead to inconsistent drink quality, poor beverage dispenser performance and premature exhaustion of filters.

Add a Shurflo Water Boost System to boost performance of your beverage equipment. See illustration on page 35 of typical installation.

SHURFLO® WATER PRESSURE REDUCER VALVES (WPRV)

Shurflo Water Pressure Reducer Valves (WPRV) are fixed pressure, water-reducing devices (non-adjustable). The WPRV minimizes incoming water pressure fluctuations while guarding against pressure spikes. Actual pressure reduction is dependent upon input pressure and outlet flow rate.

Part No	Description	Pack Size	List Price

SHURFLO SOLD OUT SWITCHES (SOS)

Shurflo Sold Out Switches (SOS) prevent the dispensing of carbonated water without syrup by stopping water flow at the dispenser valve – a particularly useful feature for clear sodas. The SOS senses the pressure drop in the syrup line caused by an empty Bag-in-Box (BIB) and shuts off power to the valve's electric solenoid. The SOS automatically resets with the installation of a full BIB.

Part No	Description	Pack Size	List Price

70% of Service Calls are Water Related

Everpure® filters by Pentair® reduce

- Abrasion and clogging
- Scale buildup and corrosion
- Off-tastes and odors
- Harmful cysts by mechanical means*
- Particulates that result in cloudy ice

The benefits of Everpure filtration

- Best quality ice possible
- Less equipment downtime, lower maintenance costs and lower total cost of ownership
- Satisfied customers and increased profits

EVERPURE ICE FILTRATION SYSTEMS

System features include

- NSF certifications
- Proprietary Fibredyne™ media technology
- Proprietary Micro-Pure® II filtration media effectively inhibits the growth of bacteria on the filter media that can decrease product life
- Manifold has inlet water shutoff valve with optional integrated sediment prefilter, flushing valve and water pressure gauge(s)
- Chlorine, taste & odor and sediment reduction
- 1/2 micron filtration by mechanical means*
- Harmful cyst reduction by mechanical means*
- Scale control

System sizing guidelines: Our system sizing guidelines are approximations based on properly installed equipment, average usage at normal operating flow rate and average water conditions. These guidelines are designed to give you approximately six (6) months of use between filter cartridge changes. Variations in equipment usage and/or incoming water conditions can produce different results.

ASHRAE Standard 188P Compliant Systems

Help maintain that 0.5 mg/l disinfectant residual level while still delivering other important water filtration benefits.

Calculating Usage for Ice System Selection

Cube ice maker recommendations are based on water usage of 20 gallons per 100 pounds of ice and a run time of 12 hours per day. Take the number of pounds of ice per day rating for your machine for in a 24 hour period, and divide by 2. Divide this number by 100 to determine the number of 100 pound batches of ice made per day. Multiply the number of batches of ice made per day by 20 (gallons) to determine daily water requirement. Multiply daily water requirement by 180 days to calculate water usage over a six month period.

Example:

1,500 (lbs per 24 hours) ÷ 2 (12 hours) = 750 lbs per day
 750 (lbs) ÷ 100 (lbs) = 7.5 batches of ice per day
 7.5 (batches) x 20 (gallons) = 150 gallons per day
 150 (gallons) x 180 (days) = 27,000 gallons every six months

Note: Actual water usage should not exceed filtration system capacity

Everpure ScaleStick®

- Hydroblend™ compound
- Translucent housing
- SS-XL designed for locations with increased scale control needs
- SS-XL and SS-10 fit current Everpure SR-X and older AR-X Housings

Note: For increased capacity needs, use the Everpure 4FC5 or 7FC5 Cartridge and an Everpure SS-XL ScaleStick®.

* Not shown.

EVERPURE® CLARIS™ PRIME

Everpure Claris Prime by Pentair® is an innovative, quick-change, saltless softening (ion exchange) and filtration system that prevents scale and removes contaminants. Even more unique is its ability to allow you to tailor the hardness to match your specific needs.

Claris Technology offers

- Softens without salt
- Removes particles AND chemicals
- Requires no electricity or drain
- No additives to water
- Effective hardness removal
- Prevents clogged drains
- Reduces metal corrosion
- No wasted water
- NSF 42-certified cartridge
- Claris 5-stage filtration process offers
 - Prefiltration
 - Carbonate hardness adjustment
 - Fine filtration
 - Highly efficient carbon block removes harmful contaminants and unpleasant tastes and odors
 - Solid membrane filter removes particles down to 5 microns for high levels of equipment protection

Claris Prime Technology offers all the benefits of the standard Claris Technology plus the following

- Claris Prime can be applied for water that contains 30-100 ppm of corrosive salts. For levels above that use a RO system starting on page 51
- Both TDS reduction and corrosion inhibition
- Mineral hardness and anion reduction
- Tailored adjustment of TDS reduction, Cl and SO₄ levels

See page 21 for images of Claris heads, flow meter, and test kit

Operator Savings Benefits

The financial impact of machine downtime, repairs and full replacement can be burdensome to operators. Unplanned costs and time-consuming repairs, especially during peak operating hours, can negatively impact business. The Claris™ Prime technology helps lower the impact of most of these problems by providing lower operating costs and promoting long equipment life. The result is both happy operators and satisfied customers.

EVERPURE® 2SR-BW FEEDER KITS

- Helps prevent mineral scale from accumulating inside ice machines and coffee brewers, reducing potential performance issues and downtime, and extending the life of the equipment
- Controls scale formation to extend membrane life in reverse osmosis systems
- Adds an additional scale inhibitor to the Everpure Endurance® High Flow System, for when there are multiple ice machines on location
- 2SR-BW Endurance Feeder Kit to be used with the Everpure Endurance High Flow System
- 2SR-BW QL2 General Purpose Feeder Kit to be used with any Everpure High Flow System
- Sanitary cartridge replacement is simple, quick and clean; internal filter parts are never exposed to handling or contamination
- Estimated one (1) year of scale protection

2SR-BW Endurance Feeder Kit

2SR-BW QL2 General Purpose Feeder Kit

EVERPURE SR-X SCALE INHIBITOR SYSTEM

- Inhibits limescale buildup by dispensing a controlled amount of Hydroblend™ compound, ideal for high temperature locations
- Provides more consistent feed of polyphosphate and longer life
- Housing converts to ScaleKleen® Feeder for periodic delimiting
- SR-X Scale Inhibitor Feeder System includes SR-X 10.0" [25.4 cm] Housing (black) with one (1) SS-IMF Cartridge and spacer
- Everpure SS-XL ScaleStick® Cartridge (sold separately) offers up to four (4) times the scale reduction capacity of the SS-IMF Cartridge for locations with increased scale control needs; fits most standard 10.0" [25.4] cm housings and all current SR-X Housings

SR-X Scale Inhibitor Feeder

SS-10

SS-XL

Product	Part No	Pack Size	List Price
SR-X Scale Inhibitor System with Delimiting Kit	EV9797-20	1	\$412.50
SR-X Scale Inhibitor Feeder with ScaleStick	EV9798-45	1	\$363.50
SS-IMF Cartridge for use with SR-X Housing in ice applications; also compatible to legacy IMF 8" housings	EV9799-32	12	\$112.00
SS-10 Cartridge for use with SR-X Housing in coffee, combination & steamer applications	EV9799-02	12	\$133.50
SS-XL Cartridge for use with SR-X Housing for high capacity scale reduction applications	EV9799-42	6	\$442.00
Wing Bracket Assembly	EV3114-35	1	\$129.00

Right Wing Bracket Assembly (allows for easy retrofitting of SR-X system to right side of multiple head systems manufactured 9/1/2003 to present)

REDUCE SCALE TO MINIMIZE MAINTENANCE COSTS

- Scale buildup can increase energy usage and equipment maintenance costs while shortening equipment life.
- Economical Pentair® Everpure® brand solutions are available to control this buildup and periodically remove any accumulation.

Everpure Deliming/Scale Removal System

HFC-10

HFC-10 plumbs into hot water line providing easy deliming of equipment and uses ScaleKleen® Scale Remover. Includes high temperature 10.0" [25.4 cm] housing, 2.2 lbs. [1.0 kgs.] ScaleKleen Scale Remover, hardness test strip and dip tube.

ScaleKleen

The smart, environmentally safe way to delime water-using appliances.

OptiClean

Non-Toxic, environmentally safe and biodegradable.

Product	Part No	Size	Pack Size	List Price
HFC-10 Deliming	EV9100-91	12.50" H x 5.50" W x 5.50" D	1	\$298.50
ScaleKleen Scale Remover (Eng/French/Spanish)	EV9798-33	7 ozs [200 grams] packets	24 packs/case	\$14.49
ScaleKleen Scale Remover (Eng/French/Spanish)	EV9798-35	2.20 lbs. [1 kg.] canister	4 canisters/case	\$56.00
OptiClean - Descaling Compound	150-50026	4.0 lbs. [1.81 kgs.] bottle	4 bottles/case	\$80.75

General Sanitizing

The Everpure JT Cartridge is the preferred way to introduce ScaleKleen Scale Remover or other sanitizing agents, into water-using appliances through an existing Everpure filter head.

Cartridge	Part no	Pack Size	List Price
2JT Flushing/Sanitizing Cartridge	EV9608-10	1	\$120.00
4JT Flushing/Sanitizing Cartridge	EV9608-00	1	\$120.00

4JT

Deliming using Everpure ScaleKleen and Everpure JT Cartridge

1. Turn off inlet water supply, remove and discard existing filter cartridge.
2. Remove TOP PLUG from JT can and pour in ScaleKleen.
 - **Small steam ovens** use 2.2 lbs. [1.0 kgs.]
 - **Large steam ovens** (>10 kW or >100,000 BTU) use two (2) JT cans
 - **Coffee makers** brewing one pot (1/2 gallon) per cycle, use one (1) 2.2 lbs. [1.0 kgs.] package
3. REPLACE TOP PLUG, insert the JT cartridge(s) into the head assembly, and turn the inlet water on.
4. When the steps below are complete, replace the JT can with a new Everpure filter.

STEAM Application

1. Flush JT until 1 gallon of water has passed through. (Note: a flow rate of 2 gpm [7.57 Lpm] equals two (2) minutes).

COFFEE Application

1. Remove filter basket and spray head and dump the coffee grounds. Place spray head in the target coffee pot.
2. Cycle coffeemaker once, vending one (1) pot. Let it sit for 30 minutes.
3. After 30 minutes, cycle coffeemaker with ten (10) pots of fresh water to flush the ScaleKleen from brewer. Check the pH of the hot water - if it's within one (1) pH unit of the incoming cold water, the ScaleKleen is flushed out.

EVERPURE® SYSTEMS FOR MULTIPLE APPLICATIONS

- 20.0" [50.8 cm] coarse prefilter
- 1/2 micron precoat filtration by mechanical means with proprietary Micro-Pure® II media[†]
- SR-X Scale Reduction Feeder featuring ScaleStick®
- Manifold has inlet water shutoff valve, flushing valve, inlet/outlet water pressure gauge(s) and dual outlets

System sizing guidelines: Our system sizing guidelines are approximations based on properly installed equipment, average usage at normal operating flow rate and average water conditions. These guidelines are designed to give you approximately six (6) months of use between filter cartridge changes. Variations in equipment usage and/or incoming water conditions can produce different results.

EVERPURE® ENDURANCE® SC HIGH FLOW SYSTEMS

The Everpure Endurance SC is a filtration platform for high volume foodservice operators. This self-cleaning model features smart, flushable, hollow fiber technology that adjusts flush cycle based on water usage.

- Right-sized for high volume operators requiring ingredient quality water
- Ideal for locations that suffer from extreme particulates in water supply
- Municipal-grade hollow-fiber membranes reduce particulates down to 0.025 micron by mechanical means[§]
- Intelligent controller automates self-cleaning flushes based on actual gallons/Liters of water consumed
- Features Everpure SEN Fibredyne™ Fine Filters with proprietary Fibredyne II media for superior contaminant reduction
- NSF listed chlorine reduction capacity allows for once-per-year changeouts of carbon cartridges
- Utilizes the Everpure 2SR-BW Phosphate Cartridge (EV9627-14) for scale reduction
- Compact, wall-mountable design

EV9437-42
Endurance SC Quad

System	Part No	Max Flow Rate		Rated Capacity		List Price

EVERPURE® RO SYSTEMS 15 TO 350 GALLONS [57 TO 1,325 L] PER DAY OF PERMEATE WATER

- Improves equipment life and performance by removing 90%+ of all dissolved solids that cause scale buildup
- Reduces limescale buildup that can cause excessive machine downtime and increased maintenance costs
- Reduces energy costs caused by scale buildup on equipment heating elements and boilers
- LVRO is a low volume RO that provides a more environmentally friendly solution
- BL Series systems feature an adjustable blend valve which allows for custom tailoring of the dissolved mineral content in the treated water
- CC-BL Series systems feature a combination of the BL Series adjustable blend along with the controlled remineralization from the CC Cartridge to create a blend water ideal to reduce corrosion and lime scale and is desirable for coffee that requires some hardness for proper extraction, and for tea brewing for the proper release of flavonoids

Product	Part No	List Price

§ Includes faucet.

Up to 15 GPD

LVRO-75HE

WATER EFFICIENT RO SYSTEM

Up to 100 & 225 GPD

MRS-100 & MRS-225 (plus CC/BL & BL)

Order tank separately.

Note:

CC/BL model includes calcite feeder cartridge which adds minerals back into water.

UP TO 350 GPD

MRS-350 (plus CC/BL & BL)

Shown with optional prefilter; order tank separately.

Note:

CC/BL model includes calcite feeder cartridge which adds minerals back into water; BL model includes blend valve and micron filter† cartridge which allows setting a blend of filtered and RO water.

When to Consider Everpure Reverse Osmosis

Any foodservice application in need of water treatment due to high levels of Total Dissolved Solids (TDS) in its water, a reverse osmosis (RO) system is a cost-effective solution. Reverse osmosis is by far the most practical and effective solution for removing TDS from water and consistently achieving high quality ingredient water.

How does one know if the TDS content in the water is high enough to require a reverse osmosis (RO) solution?

- First, test your water. The new H₂O Express Test Kit: (180-80193) is a great option
- When TDS levels are <300ppm
- Objectionable taste negatively impacts desired recipe
- Scale and Corrosion are present on expensive equipment

Note: Water production is dependent upon incoming water temperature and line pressure. Additional equipment such as tempering valves or booster pumps may be required for proper operation. Consult your Pentair Everpure representative for assistance in correct system selection and design.

EVERPURE® CONSERV® HIGH EFFICIENCY REVERSE OSMOSIS SYSTEMS

The Pentair Everpure Conserv High Efficiency Reverse Osmosis (RO) Systems provide compact, low-cost solutions for many applications.

Benefits of Conserv RO Systems

- Removes dirt, particulates and dissolved solids
- Protects against taste and odor causing contaminants
- Prohibits growth of bacteria with Proprietary Fibredyne™ II filtration media
- Saves up to 50% of water over conventional RO systems
- Reduces energy costs by decreasing energy usage by 95%+ by lessening scale-causing dissolved solids

Features of Conserve RO Systems

- Easy, sanitary quick-change filter replacement
- Compact design with storage tank included
- Proprietary Fibredyne™ II filtration media
- Blending valve to create the right balance of mineral content of the water
- Replacement cartridge kits for easy maintenance and ordering

Ideal for combi ovens, steamers and proofers

EVERPURE CONSERV LT-S HIGH EFFICIENCY RO SYSTEM

- Helps equipment heating surfaces maintain peak transfer efficiency, reducing cycle times and energy consumption
- NSF Standard 58 certified to reduce cysts such as *Cryptosporidium* and *Giardia* by mechanical means*, and TDS
- Yields the right balance of blended water for steam applications with blending valve
- Wall-mount installation
- Greater consistency by water/mineral blending in the storage tank
- 4 gallon (15.14 L) storage tank included
- 70 gpd (264.98 Lpd) capacity

Product	Part No	List Price
Conserv LT-S	EV9975-20	\$1,808.00
Conserv RO Steam Replacement Cartridge Kit (GRO-75EN Membrane, 4CC Filter Cartridge and 4FC5 Filter Cartridge)	EV9976-25	\$524.00

EVERPURE® CONSERV® RO-75S HIGH EFFICIENCY RO SYSTEM

- Helps equipment heating surfaces maintain peak transfer efficiency, reducing cycle times and energy consumption
- Delivers the right balance of minerals for optimal scale and corrosion inhibition
- NSF Standard 58 certified to reduce cysts such as *Cryptosporidium* and *Giardia* by mechanical means*, and TDS
- Yields the right balance of blended water for steam applications with blending valve
- Compact design for wall-mount, counter-top or under-counter installation
- 50 gpd (189.27 Lpd) capacity

Ideal for combi ovens, steamers and proofer

Product	Part No	List Price
Conserv RO-75S System	EV9976-00	\$2,328.00
Conserv RO Steam Replacement Cartridge Kit (GRO-75EN Membrane, 4CC Filter Cartridge and 4FC5 Filter Cartridge)	EV9976-25	\$524.00

EVERPURE CONSERV RO-75E HIGH EFFICIENCY RO SYSTEM

- Yields the right balance of blended water for optimal ingredient water for espresso machines and more with blending valve
- NSF Standard 58 certified to reduce cysts such as *Cryptosporidium* and *Giardia* by mechanical means*, and TDS
- Provides protection against off-taste & odor while removing particulates and dissolved solids
- Adapts for ice applications via prefilter inlet
- Includes accessory on-board tank for added capacity during periods of peak demand
- Compact design for wall-mount, counter-top or under-counter installation
- 50 gpd (189.27 Lpd) capacity

Ideal for coffee, espresso and ice machines

Product	Part No	List Price
Conserv RO-75E System	EV9977-00	\$2,586.00
Conserv RO-75E Replacement Cartridge Kit (GRO-75EN Membrane, 4CC Filter Cartridge, 4FC5-S Filter Cartridge and 4CB5 Filter Cartridge)	EV9977-25	\$649.00

*See individual system specification sheets for performance claims and FIFRA registration information.

EVERPURE® MRS-600HE AND MRS-600HE-II REVERSE OSMOSIS SYSTEMS

High output/high efficiency configurable reverse osmosis systems rated up to 600 gallons [2,271 L] per day nominal. Depending on model selected, delivers reverse osmosis and/or blended filtered water for multiple foodservice applications. For use with coffee brewers, espresso machines, steamers, combi ovens and ice machines. Also ideal for specialty coffee.

MRS-600HE High Efficiency Reverse Osmosis (RO) System

Featuring dual headed pump and integrated 6.0 gallon [22.7 L] tank

MRS-600HE requires the addition of a remote submicron sediment and carbon filtration system. The Everpure Coldrink® Series, CB20-302E or CB20-312E are suitable pretreatment systems.

Dual-output design provides both low TDS water (pure RO water) and blended water (filtered tap water and RO water mix)

6-gallon total capacity RO water storage tank provides ample reserve volume for instantaneous demands

Unique, dual-headed pump boosts output and overall system efficiency

2SR-BW Cartridge inhibits scale formation, extending the life of the MR-600 RO Cartridge

MRS-600HE Without Cover

MR-600 RO Cartridge delivers two (2) times the daily production volume of conventional RO membranes of similar size

Microprocessor-based control with digital display provides system status and operator interface

MRS-600HE-II High Efficiency Reverse Osmosis (RO) System

Featuring on-board filtration and inlet and permeate boost pumps

MRS-600HE-II includes submicron sediment and carbon filtration, but does not include a storage tank. Contact Pentair® Everpure for assistance when configuring a complete system package.

Permeate boost pump reduces back pressure on RO membrane and maximizes system output and efficiency

Microprocessor-based control with digital display provides system status and operator interface

Inlet boost pump increases supply pressure for consistent water production

Triple bank of prefiltration cartridges reduces sediment, oxidizers and scale, offering maximum RO module protection

MRS-600HE-II Without Cover

MR-600 RO Cartridge delivers two (2) times the daily production volume of conventional RO membranes of similar size

Dual post-filtration cartridges remove sediments, taste, odors and other undesirable water attributes prior to exiting the system

RO SOLUTIONS CAN BE GREENER WITH EVERPURE MRS-600 SYSTEMS BY PENTAIR

Water Savings per Gallon of RO Water Used

Conventional RO

For every 1 gallon of RO water used, 4 gallons of water goes to drain as waste.

Everpure MRS-600 Systems

For every 1 gallon of RO water used, 1/4 gallon of water goes to drain as waste.

80% savings with this system over traditional ROs

UP TO 600 GPD

System	Part No	List Price

EVERPURE® BWS AND OP/OPS REVERSE OSMOSIS SYSTEMS

The right choice for foodservice water treatment applications when

- TDS and hardness levels are too severe for scale inhibition or basic filtration
- Equipment manufacturer's minimum water quality standards for warranty must be achieved
- Consistency of product is required regardless of location or differing water characteristics

Pentair offers different styles of reverse osmosis systems which include systems with mineral addition (OP & OPS) and systems with mineral addition plus blending (BWS). Note: BWS100 line does not include mineral addition.

- OP/OPS systems utilize mineral addition to ensure you always have a specific balance of minerals in your water regardless of your incoming water quality. Ideal for steamers and combi ovens
- BWS includes mineral addition and a precision blend valve to adjust your TDS level as desired for espresso machines, specialty coffee and ice machines

Ideal for coffee, espresso and tea

BWS BLENDED REVERSE OSMOSIS SYSTEMS

- Significantly reduces scale and corrosion problems related to high TDS, water hardness and chlorides
- High capacity prefilter takes out sediment and chlorine and protects the RO membrane
- Precision blending valve allows the user to accurately and precisely blend a calculated amount of filtered water with the RO product water
- Digital TDS meter for push-button monitoring of membrane performance and optimized water quality
- Built-in pressure gauge allows visual monitoring of operating pressure
- All consumables are easy to change Qwik-Twist cartridges
- Simple design is easy to service and maintain

EVERPURE® OP / OPS REVERSE OSMOSIS SYSTEMS

Compact design offers a high-value choice with 16 models to meet your specific requirements.

- Significantly reduces scale and corrosion problems related to high TDS, water hardness and chlorides
- Ideal for combi and steam oven applications where TDS, hardness and chloride reduction are necessary to meet manufacturer’s warranty requirements
- Integrated mineral addition cartridge provides TDS needed for conductivity sensors and optimal mineral content for steam equipment applications
- High capacity prefilter reduces sediment and chlorine and protects the RO membrane
- Operating pressure gauge allows visual monitoring of system production and prefilter condition
- Optimized water line to equipment is ½" I.D. hose; a ¾" Garden Hose Thread (GHT) connector is provided for connection to equipment when applicable
- Simple, easy-to-install and service design

Ideal for combi ovens, steamers and proofer

Replacement Cartridges

REVERSE OSMOSIS (RO) ACCESSORIES

Our high performance, high value Pentair® RO Storage Tanks are specifically designed for foodservice and light commercial reverse osmosis applications. These small vessels offer distinct advantages over competing tanks via their 100% seamless, composite construction, and the ability to discharge in any position.

Both Pentair RO Storage Tanks and Pressure Relief Valve (PRV) Kits are an important part of a reverse osmosis system installation. Storage tanks ensure there is an ample supply of treated water to meet the demands of a specific application. PRV kits ensure that the water pressure after the tank remains within the ideal operating range. These kits are often necessary to meet plumbing code.

Pentair® RO Storage Tanks

Storage Capacity* (Nominal Tank Size)		Part No	Inlet/ Outlet	List Price

EV3141-17	Universal, 1-1/4"	1	\$645.00

Adjustable Thermostatic Mixing Valve (TMV) For Ro Systems

- Controls the blending of hot and cold water producing a controlled (tempered) outlet water temperature
- Typically used in cold climates to regulate the water temperature to an RO system, which in turn allows the RO to maintain its rated output at 77°F [25°C]; instead of up to 50% loss of water production due to cold water

Product	Description	Part No	List Price
Thermostatic Mixing Valve	Controls the blending of hot and cold water.	EV3114-79	\$366.00

SHURFLO® REVERSE OSMOSIS BOOSTER PUMPS

- Helps boost water pressure prior to a reverse osmosis (RO) system to help make it run more efficiently
- Boosts water pressure on long line runs
- Increases filter life

SHURFLO 80 Series RO Booster System

- Features a high quality, continuous-duty pump
- Reliable pump head and motor
- Safe, low-voltage motor
- Safe, constant pressure to RO systems
- Quiet, continuous operation
- Includes full tank shutoff switch
- Can be wall mounted

Part No	Description	Pressure		Flow		Amps	Pack Size	List Price
		psi	bar	gph	lph			
80-121-18	Without enclosure, flow up to 50 gpd [189 Lpd] (8010-101-200 pump configuration). Booster pump with tank switch and transformer, 115/24 VAC/VDC, 120 PSI [8.3 bar], 3/8" [10 mm] FPT ports	20	1.4	7.52	28.00	0.21	6	\$398.50

SHURFLO 8075 High Performance Brushless D.C. RO Booster Pump

The Shurflo 8075 Series High-Performance Brushless D.C. RO Booster Pump pushes the envelope in the market. The pump head provides reliability with its high efficiency, long life, brushless D.C. motor, making it a versatile workhorse. The motor is robustly built to handle the demanding requirements of commercial RO systems. With its unique two-speed switch, one pump meets the performance requirements of 150 or 200 gpd [570 or 760 Lpd] with a quick flip of a switch.

- Versatility, high efficiency and long life
- High flow rate supports 150 - 200 + gpd [570 - 760 + Lpd] systems with two speed switch at standard recovery rates
- Quiet operation at any flow and pressure range
- Extended motor life with brushless technology
- Pressures up to 140 PSI [9.6 bar]
- Power supply see page 62 for 60-044-00

Part No	Description	Pressure		Flow		Amps	Pack Size	List Price

Shurflo® 8075 Gold Series RO Booster Pumps

Shurflo 8075 Gold Series Pumps provide the ultimate in performance, reliability and quality for RO pumps. The precision bypass maintains a constant, safe outlet pressure regardless of changes in incoming city water pressure. These pumps offer quiet performance and long operational life.

- Ultra-quiet operation
- Long life
- Flow rates up to 150 gpd [570 Lpd]
- One-piece, solid diaphragm reduces leak points
- Built-in bypass
- Power supply required - see page 62

Shurflo 82 Series Low Voltage Delivery System

- Delivery pump system can be used to boost water to the faucet after the RO tank. Ready to use... simply plumb, plug in and you're in operation
- Flow rates up to 0.90 gpm [3.4 Lpm]
- Self-priming up to 7.0 feet [14.9 m]
- Low-voltage 24 VAC/VDC
- UL-listed transformer
- Select models include a low-pressure switch that shuts off the pump when the pressure is 3 PSI [0.2 bar], and turns on when the inlet pressure is 8 PSI [0.5 bar]

SHURFLO ELECTRIC BEVERAGE PUMP SYSTEM

The Shurflo Electric Beverage Pump System is designed to deliver liquid at a range of flow and pressure. Products such as a Bag-In-Box (BIB) or non-pressurized systems are a fit for this pump. The pump will run automatically or until the valve is closed within the system. The automatic reset button indicates when the pump or system is primed and pressurized at an accurate level for consistent fluid delivery.

- Features Shurflo 8010 Series Low Voltage Pump, 60 PSI [4.14 bar] shutoff
- Approvals: NSF-listed, UL/CSA-recognized components
- Ports: 3/8" [10 mm] barb
- Mounting board
- Flow up to 0.95 gpm [3.60 Lpm]

Part No	Description	Pressure		Flow		Amps	Pack Size	List Price
		psi	bar	gpm	lpm			
94-437-00	8010-252-736 100/240 VAC Pump, 24 VAC/VDC, w/ switching power supply transformer, 3/8" [10 mm] barb fittings.	60	4.14	0.95	3.60		1	\$737.00

SHURFLO ELECTRIC BEVERAGE DELIVERY PUMP SYSTEM

Shurflo 8000 Series Delivery Pumps are ideal for applications that require high pressure with flow rates up to 1.5 gpm [5.7 Lpm] and low amp draw. They can be mounted in any position, are compact and designed for long, trouble-free life. Spherically-shaped valves and diaphragms are available in a variety of materials to meet a wide range of applications.

- Great for water boost systems, misters and sprayers
- Self-priming up to 8.0 vertical feet [2.4 m]
- Can run dry without damage
- Flow rates up to 1.5 gpm [5.7 Lpm]
- Pressures up to 150 PSI [10.3 bar] available
- Corded pump: UL-listed; non-corded pump: UL-recognized
- Built-in check valve
- 12 or 24 VAC requires customer provided low voltage power supply

SHURFLO® 2088 SERIES PUMPS

Shurflo 2088 Series Pumps are high flow, low pressure pumps ideally suited for beverage and water applications such as city water pressure boost, portable cart water delivery, batch and transfer of product. These pumps activate automatically as line pressure drops and turns off when a preset pressure is achieved.

- Self-priming up to 12.0 vertical lift feet [3.7 m]
- Used in delivery and transfer applications up to 3.0 gpm [11.4 Lpm]
- UL/CSA-recognized components
- Built-in check valve (may vary by model) prevents back flow of fluid
- Automatic turn on / shutoff
- Can run dry without damage
- Customer provided power supply required

SHURFLO CARBONATOR PUMPS

Shurflo 8005 Series Carbonator Pumps have the same features as 8025 Series Water Boost Pumps, including the run-dry capability which is so critical to carbonator pump reliability. Pumps are sized for small to medium carbonators.

- Core pump model - Shurflo 8005 Series
- Positive displacement, 3 chamber diaphragm pump
- NSF/UL/CSA-listed
- Self-priming; can run dry without damage
- Ports: 3/8"-18 NPT female
- Ground wires
- Base plate

Part No	Description	Pack Size	List Price
8005-932-260	115 VAC, 100 PSI [6.89 bar] bypass, 1.5 gpm [5.7 Lpm] open flow, 3/8"-18 NPT female ports, no shutoff switch, non-corded pump	6	\$251.50
8095-902-260	230 VAC, 100 PSI [6.89 bar] bypass, 1.5 gpm [5.7 Lpm] open flow, 3/8"-18 NPT female ports, no shutoff switch, non-corded pump	6	\$306.50
8095-902-290	230 VA=C, 100 PSI [6.89 bar] bypass, 1.5 gpm [5.7 Lpm] open flow, no shutoff switch, no motor baseplate, non-corded pump	6	\$192.50
8090-791-260	24 VAC, 100 PSI [6.89 bar] bypass, 0.7 gpm [2.6 Lpm] open flow, 3/8"-18 NPT female ports, no shutoff switch, non-corded pump	6	\$578.00
8095-951-269	230 VAC, 100 PSI [6.89 bar] bypass, 1.0 gpm [3.8 Lpm] open flow, 3/8"-18 NPT female ports, no shutoff switch, non-corded pump	6	\$232.00
8095-951-299-BW	230 VAC CE Compliant, EU Materials, 100 PSI [6.89 bar] bypass, 1.0 gpm [3.8 Lpm] open flow, 3/8"-18 NPT female ports, no shutoff switch, non-corded pump	6	\$287.00

EVERPURE® DRINKING WATER FILTRATION SYSTEMS

Pentair® Everpure has a wide array of water filtration solutions that reduce or remove undesirable or potentially harmful contaminants to ensure fresh, clean, great-tasting drinking water for your customers.

From standard drinking water capabilities of the AC2 to 4FC-LS which has high capacity, lead reducing, bacteriostatic control filters, and more, you are certain to find a filter that meets your needs within our vast solutions portfolio.

WATER APPLIANCES

Everpure Polaria® Water Chiller

- Chills to an ideal temperature of 50°F
- Produces 1.3 gallons (4.9 L) chilled water per hour
- 0.7 gallon (2.6 L) internal tank
- Whisper quiet, hermetically sealed, and maintenance-free compressor
- Uses ozone-friendly refrigerant
- Consumes only 155 watts of electricity when compressor is cycling
- Stainless steel components and lead-free design
- Accessory power cord included
- UL listed

¶ Approved for use in California.

EVERPURE® WATER SOFTENING SYSTEMS

Pentair® Everpure offers a full line of commercial point-of-entry water softeners for small food and beverage operations up to large retail superstores.

System capacities include

- Hardness removal: 30,000 to 750,000 grains
- Flow rate: 10.0 to 165.0 gpm [37.9 to 624.6 Lpm]

Feature control valves from an industry leader

- Everpure systems feature Pentair Fleck® brand control valves – recognized worldwide for reliability and performance. Available in both mechanical and electronic configurations.

Tested-tough tanks by Pentair

- NSF-certified, fiberglass-reinforced pressure tank endures up to 250,000 cycles without leaking.

All-around savings

- Precision flow meter efficiently regenerates the system, saving on salt, water and the cost of electricity.

Never without softened water

- Available in duplex alternating configurations for a never-ending supply of soft water.

Five (5) years worry-free

- A complete system has a five-year limited warranty.

EVERPURE WS SERIES WATER SOFTENERS

- Advanced, user-friendly controls incorporate time-tested, hydraulically-balanced piston, seal and spacer design to pilot service flow and regeneration.
- Fiberglass-reinforced resin vessels with NSF®-approved polyethylene liners eliminate worries about corrosion.
- Pentair Fleck® 5600-SXT meter-initiated control valve monitors water usage and minimizes salt, water and electrical costs.
- Single-tank designed for simplicity, economy and space savings.
- Large capacity brine tank maximizes time between salt replenishments.

EV9980-11	WS-45, 115V/60 HZ	45,000 grains @ 22.5 lbs. (10.2kgs.) salt	\$3,011.00

EVERPURE ELECTRONIC SOFTENING SYSTEMS

- Easy, user-friendly programming with LCD back-lit displays
- Networking capability for same programming on multiple softeners
- Self-diagnostic service and indicators
- Continuous-operation design and test-proven delivery for up to 27 years of uninterrupted daily use

Visit www.pentair.com for more softener product information and additional mechanical softener system skus.

High levels of dissolved (ferrous) iron and manganese (>5 ppm) can damage your resin. To prolong the lifespan of your water softener when these materials are excessively present, Pentair Everpure recommends a prefilter. Also, use salt that contains an iron-fighting additive or use a resin cleaner on a regular basis.

EVERPURE® BOWL SOFTENING

- Ion exchange resin technology
- Reduces hardness that can cause mineral buildup
- Reduces calcium and magnesium
- May be used on water with up to 30 grains hardness per gallon

EVERPURE® SIMPLIFLOW® WATER MANAGEMENT SYSTEMS

The Everpure SimpliFlow System rescues your backroom from the typical tangled mess of water lines that worsen as your water needs grow and change. This adaptable, simple-to-use beverage line management system provides quick and easy identification of water lines, and helps you organize and manage fluid movement throughout your store.

- Organize backroom water lines
- Manage water-by-water quality profiles and applications
- Easy to install
- Compact footprint
- Easily identify water lines using labels included with each manifold
- Multiple connection options available
- Inlet can be oriented from left, right or bottom of manifold
- Flexible manifold can be rotated 90 degrees within bracket to allow for elbow connections
- Reduce service expense

System	Kit No	Description	Pack Size	List Price
SimpliFlow Single Standard Manifold	EV9961-00	Three (3) inlets and six (6) outlets Manages a single water quality	1	\$278.00
SimpliFlow Single Split Manifold	EV9961-50	Features three (3) valves on each side Allows for two (2) different water qualities	1	\$305.00
SimpliFlow Twin Standard Manifold	EV9962-00	Two (2) manifolds for a total of six (6) inlets, and up to 12 valve outlets Allows for two (2) different water qualities	1	\$500.00

EV9961-00

EV9961-50

EV9962-00

Water lines can be difficult to identify and trace to water-using equipment, increasing service time and costs.

Water line organization made simple with Everpure SimpliFlow.

FLOOD PROTECTION

Eltek® Water block

- Overflow safety device for coffee brewers, coolers, chillers, heaters, vending machines, ice machines and more
- Automatically shuts off if preset volume is exceeded
- Automatically resets if water volume preset is not exceeded
- Ten-position dial sets maximum flow volume
- No external energy source required
- Not recommended for reverse osmosis (RO) or ice flaker installation as an RO system by nature can produce permeate water for long periods of time which will unnecessarily trip the Water Block
- Water Block Reset Device is optional for use to manually reset device

EVERPURE® MANIFOLD SYSTEM CONFIGURATIONS ORDERING GUIDE

Everpure Manifolds by Pentair® are available in a variety of preconfigured setups. You are able to mix and match between our wide range of cartridges and various manifolds to create a Single, Twin, Triple or Quad System that meets your specific needs. Follow these four quick and easy steps to determine the best fit for your application.

STEP ONE: Identify your application and corresponding filter cartridge.

At right are some of the typical Everpure applications and corresponding filter cartridge options. For additional assistance, please contact Pentair Everpure Technical Service at 800.942.1153 or tech-support@pentair.com.

Application	Fountain/Combination	Ice	Coffee	Espresso
Everpure Filter Cartridge Options	MC ²	i2000 ²	BH ²	ES06
	XC ²	i4000 ²	4H ²	ES07
	4CB5 / 7CB5	4CB5-S / 7CB5-S	4CB5-S / 7CB5-S	–
	4FC5 / 7FC5	4FC5-S / 7FC5-S	4FC5-S / 7FC5-S	–
	4FC / 7FC	4FC-S / 7FC-S	4FC-S / 7FC-S	–

STEP TWO: Select your flow rate or capacity requirements.

Configured System Flow Rates

Determine the flow rate you require and then match to the head and cartridge. Examples:

- If you need a flow rate of 1.67 gallons per minute (gpm) [6.32 Lpm], you can use a single head with one (1) filter cartridge as long as the filter cartridge is designed for 1.67 gpm (such as the Everpure MC²) or greater.
 - If you need a flow rate of 3 gpm [11.36 Lpm], you will need a twin head with two (2) filter cartridges as long as the total flow rate of the two (2) cartridges equals or is greater than three (3).
- To get a 3 total flow rate, you could use two (2) Everpure MC² Cartridges (total flow rate 3.34).
- If you need a flow rate of 1 gpm [3.79 Lpm], but the filter cartridge you require is only 0.50 gpm [1.89 Lpm] (such as the Everpure BH² Cartridge), then you would need two (2) cartridges in a twin head.

		Typical Everpure Cartridge Flow Rates in GPM [LPM]			
HEAD		0.50 [1.89]	1.00 [3.79]	1.67 [6.32]	2.50 [9.46]
Number of Cartridges	1(Single)	0.50 [1.89]	1.00 [3.79]	1.67 [6.32]	2.50 [9.46]
	2(Twin)	1.00 [3.79]	2.00 [7.57]	3.34 [12.64]	5.00 [18.93]
	3(Triple)	1.50 [5.68]	3.00 [11.36]	5.01 [18.96]	7.50 [28.39]
	4(Quad)	2.00 [7.57]	4.00 [15.14]	6.68 [25.20]	10.00 [37.85]

Configured System Capacities

		Typical Everpure Cartridge Capacities in Gallons [Liters]					
HEAD		3,000 [11,356]	6,000 [22,712]	9,000 [34,068]	12,000 [45,425]	15,000 [56,781]	25,000 [94,635]
Number of Cartridges	1(Single)	3,000 [11,356]	6,000 [22,712]	9,000 [34,068]	12,000 [45,425]	15,000 [56,781]	25,000 [94,635]
	2(Twin)	6,000 [22,712]	12,000 [45,425]	18,000 [68,137]	24,000 [90,849]	30,000 [113,562]	50,000 [189,271]
	3(Triple)	9,000 [34,068]	18,000 [68,137]	27,000 [102,206]	36,000 [136,274]	45,000 [170,343]	75,000 [283,906]
	4(Quad)	12,000 [45,425]	24,000 [90,849]	36,000 [136,274]	48,000 [181,699]	60,000 [227,125]	100,000 [378,541]

EVERPURE® MANIFOLD SYSTEM CONFIGURATIONS ORDERING GUIDE (CONT'D.)

STEP THREE: Determine if you need prefiltration or postfiltration.

When Do I Need Prefiltration?

- Prefiltration is always recommended to ensure you receive the best performance from your Pentair® Everpure filtration system. But in areas where there is little concern around suspended solids, turbidity or particulates, you may choose to opt for a system without a prefilter.

When Do I Need Postfiltration?

- Postfiltration is designed to reduce the likelihood of scale buildup. You should consider postfiltration any time your system is delivering water to more than one application. Postfiltration is highly recommended when you are running pieces of equipment that either heat water (such as coffee or espresso), or chill water (such as an ice machine, or drinking water and fountain drink equipment).

Pick the desired number of cartridges/heads.

Prefiltration →
Available in 10.0" [25.4 cm] or 20.0" [50.8 cm] system sizes

Examples:

STEP FOUR: Make your final product selection.

Everpure Manifolds

What's YOUR FILTER SIZE?

Pentair® Everpure Replacement Filter Cartridges are manufactured in five (5) different height configurations. Each cartridge has a size designation of:

- 2-size = 10.25" tall
- 4-size = 14.50" tall
- 6-size = 17" tall
- 7-size = 20.75" tall
- X-size = 25" tall

* The EV9256-19 is a "reverse flow direction" head

EVERPURE® MANIFOLDS

A parallel head

- Flow rate and capacities of all cartridges are combined to determine total system flow rate and capacity.
- Inlet water passes through all filter cartridges simultaneously.

QC7I/Insurice®
Single Head

QC7I/Insurice
Twin Parallel Head

QC7I/Insurice
Triple Parallel Head

QC7I/Insurice
Quad Parallel Head

Product	Part no	Shutoff Valve	Mounting Bracket	Connection	Flushing Valve	Pressure Gauge(s)	Pack Size	List Price
QC7I/Insurice Single Head	EV9272-41	Y	Y	3/8" NPT	Y	Y	1	\$367.00
QC7I/Insurice Twin Parallel Head	EV9272-22	Y	Y	3/4" NPT	Y	Y	1	\$647.00
QC7I/Insurice Triple Parallel Head	EV9272-23	Y	Y	3/4" NPT	Y	Y	1	\$918.00
QC7I/Insurice Quad Parallel Head	EV9336-11	Y	Y	3/4" NPT	Y	Y	1	\$1,307.00

Twin Series Head; Series Plumbed

A series head

- Water flows through each filter in a linear fashion so the total flow is limited to the filter with the lowest flow rate and capacity

QC7I DIO Manifold

DIO manifold

- Provides two water qualities - the first outlet is from two (2) filter cartridges in parallel, the second outlet is from three (3) filter cartridges. EV9278-41 (right) is an example of this system.

EV9278-41
QC7I 7CLM+/7SI DIO System

Product	Part No	Shutoff Valve	Mounting Bracket	Connection	Flushing Valve	Pressure Gauge(s)	Pack Size	List Price
Twin Series Head; Series Plumbed*	EV9272-24	Y	Y	3/4" NPT	Y	N	1	\$332.00
QC7I DIO Manifold	EV9278-91	Y	Y	3/4" NPT x 2	Y	Y	1	\$1,300.00

*Twin Series Head required when the Everpure 7S0, 7T0, 70F and 7NE Cartridges are used with an Everpure MC² Fine Filter Cartridge.

The Risk of Counterfeit Filter Cartridges

- Pentair® Everpure® heads and cartridges are certified as systems by NSF. Using counterfeit filters results in a loss of this valuable industry certification.
- Without NSF certification, there is no assurance of performance and quality could be suspect.

System Tested and Certified by NSF International against NSF/ANSI Standards 42 and 53 for the reduction of:

Standard No. 42 –
Aesthetic Effects
Chemical Reduction
Taste and Odor
Chlorine
Mechanical Filtration
Nominal Particulate Class I
99.2% reduction of particles one-half micron and larger in size
Standard No. 53 –
Health Effects
Mechanical Filtration
Turbidity
Cyst

- For over 89 years, Pentair Everpure has been providing quality filtration products for customers around the world, and today we're a leading brand of water treatment for foodservice. We're trusted by many of the world's largest foodservice and specialty beverage chains, as well as hundreds of thousands of independent operators.
- The majority of our cartridges are certified by NSF. This provides assurance that the system has been independently evaluated to confirm its performance.
- Certified Everpure filtration products have been submitted for testing under NSF/ANSI Standards 53 and 42.
- The certification is displayed on the cartridge's label along with the applicable NSF claims.

For further information on NSF certification, please contact Technical Service at 800.942.1153/630.307.3000 or consult the NSF website, www.nsf.org.

The importance of NSF Certification

There are important reasons to look for NSF Certification when purchasing a water filter:

- **Performance claims may be based on internal testing only.** Do you have access to all the testing procedures used? Was testing done to industry standards?
- **Sometimes stated capacities are misleading** because they may be based on only chemical (chlorine) reduction and don't take particulates into consideration. Particulates have an important role in how long a filter will last. Most often, a filter plugs from dirt before the chemical capacity is used up.
- **In capacity claims, it's not always clear what percentage** of chemical contaminants are actually reduced. For example, if there is only a 50% reduction in chlorine then higher capacities can be claimed. But is removal of only half the chlorine acceptable for quality beverages?

NSF Certification ensures that:

- The contaminant reduction claims certified are true and accurate.
- The materials of construction do not add anything unwanted to the water such as lead.
- The system is structurally sound.
- Advertising claims are true and accurate.

What is NSF?

- Founded in 1944, NSF International is a not-for-profit organization that provides public health and safety risk management solutions to companies, governments and consumers around the world.
- Its main business is to bring together experts in public health, manufacturing, and sanitation from government, industry, academia and the public to develop and administer performance standards for products which have some impact on sanitation and public health.
- NSF maintains state-of-the-art laboratories where products can be tested according to set standards.

For water filters, look for these certifications:*

- **NSF/ANSI Standard 42:** Aesthetic Effects
For water treatment systems designed to reduce specific aesthetic or non-health-related contaminants (chlorine, taste & odor, and particulates).
- **NSF/ANSI Standard 53:** Health Effects
For water treatment systems designed to reduce specific health-related contaminants, such as *Cryptosporidium*, *Giardia*, lead, volatile organic chemicals (VOCs), MTBE (methyl tertiary-butyl ether).

*It's important to read the small print when evaluating a product certification. Within Standards 42 and 53 there are different classes and contaminant removals to consider. Even though a filter is certified for a standard, it may not be certified for all of the reductions possible within that standard.

A background image showing water splashing into a glass, with bubbles and ripples visible. The water is clear and bright blue.

FILTRATION BENEFITS FOR OPERATORS

A few of the ways that water filtration benefits foodservice operations:

Beverage quality

- **Coffee:** better extraction for less bitterness or astringency
- **Espresso:** smooth and rich flavor, perfect cream
- **Iced Tea:** clean taste, no cloudiness
- **Drinking Water:** no chlorine taste or smell, improved safety
- **Fountain Beverage:** better fizz and flavor
- **Ice:** hard, crystal-clear cubes
- **Brewed Tea:** better extraction of flavor, perfect color

Less downtime and longer life for foodservice equipment

- **Coffee Brewers:** reduced scale on heating elements and fewer issues with valves, solenoids and reservoirs
- **Espresso Brewers:** reduced scale on heating elements, reduced stress cracking on boilers, better pressure
- **Fountain Beverage Systems:** better water pressure, improved gas pump efficiency
- **Ice Machines:** reduced scale and downtime due to freeze-up and bridging
- **Steam and Combi Ovens:** less limescale, less corrosion, and better steam consistency
- **Warewashing:** spot-free dishes and glassware, better energy efficiency

Sustainability

- **Energy Savings:** hard water and the resulting scale can reduce energy efficiency in equipment by 50% or more, costing over \$1,000 annually in higher utility bills
- **Water Waste:** high efficiency reverse osmosis from Pentair Everpure can save an operator over 100,000 gallons annually from going to drain as waste water versus conventional RO systems
- **Reduced Waste:** eliminating bottled water in favor of on-site filtered tap water can reduce the 22 billion water bottles going to landfills today

Pentair® Everpure® is water. Whether you need filtration, softening or reverse osmosis, we have a solution. Our entire existence revolves around providing the best, most consistent water anywhere. That's why so many foodservice operators depend on us to solve their water problems. Pentair Everpure has been a leading global provider of quality water solutions to the foodservice industry for more than 85 years.

PENTAIR EVERPURE SOLUTIONS OFFER:

Consistency. Remove or reduce unwanted minerals, particulates and chemicals so your water is sparkling clean, every time.

Confidence. Pentair Everpure products are proven effective. That's why you can find our products in foodservice operations around the world.

Solutions. Our Total Water Management Program can solve your water problems. We'll analyze your operation, provide recommendations, and install the right products so your water is problem-free. And we'll help you stay that way with our maintenance program.

Satisfaction. Everpure water is better all around, which means you'll have a more cost-efficient and high performing operation, and your customers will have a superior overall experience.
