

## PENTEK® PS SERIES SPUN-BONDED POLYPROPYLENE CARTRIDGES

WIDE RANGE OF SIZES AND MICRON RATINGS

Pentair® Pentek® PS Series Cartridges are manufactured from spun-bonded pure 100% polypropylene fibers. The depth filtration cartridge construction offers greater performance flexibility in a broad range of solutions.

In water applications, polypropylene media will not impart taste, odor or colors into the solution. For industrial applications, polypropylene offers superior chemical resistance and is not prone to bacterial attack. The thermal bonding process of the media eliminates the need for a core support while offering resistance to collapse. This process also greatly reduces fiber migration.

PS Series Cartridges are available in a wide range of lengths and micron sizes to accommodate a broad range of vessel sizes and applications.
