

## Card #2: "Spring has Sprung!"

Design used: Screen divider card- original tutorial Splitcoaststampers  
(I changed the dimensions a little.)

Scored a 6" x 12" piece of solid colored cardstock at the 3"; 6"; and 9" marks then diecut the top and used a punch for the bottom panels. For the slider mechanism I used the smallest die from the Lawnfawn Slide on over die set and the pull tab from the dble.slider surprise set. I cut a strip of cardstock just wide enough to cover the opening of the slider diecut, after inserting the strip of card stock between two pieces of foam mounting tape on each side of the slider opening and also put mounting tape on the outer edges of the cloud print cardstock, I cut out the animals and attached them to the strip with 1/4" foam mounting dots. Then mounted it on to the white cardstock panels and attached the diecut pull tabs.

### Supplies:

Dies used: Magnolia Doohickey Tilda lace (for top panel)  
LawnFawn- grassy hill, slide on over set and pull-tab  
from Dble.slider surprise set.

Designer Label punch from Stampin' Up for bottom of the panels.  
Used a small circle punch to create a notch at the top of each cloud print cardstock panel.

The sentiment and arrow was computer generated on a clear Avery address label. Used a Atyou Spica clear twinkling pen on clouds and a black glaze sakura pen for the animals eyes and dogs nose.
