Introduction

Hello! My name is Kimber and I couldn't be happier to be meeting you.

If I've just arrived, please be sure to read through this guide and make sure that all steps are understood to keep me in the best possible condition.

Assembly

Written by Kimber herself...

I can't wait for all the fun we're going to have!

First thing you should know, in order for me to ship safely and efficiently, my head needs to be attached before I'm fully assembled.

This process is very simple, thanks to a large thread with fittings at both ends of the connection in my neck region.

Simply line both parts up and rotate clockwise, being careful to avoid the two layers of skin from catching on each other. Vaseline can assist with reducing any unwanted chafing.

Once I'm fully assembled, feel free to see how I look in the provided lingerie, or perhaps something else you had in mind?

Lastly, a quick reminder that you should always use a high-quality water-based lubricant with me and to store me in a relaxed position. This means that my arms and legs are rested in a straight position to avoid unwanted stretching or stress to the flesh material.

Care

To take best care of the Kimber Doll, we recommend the following:

- Clean thoroughly after each use
- Allow water to drain after cleaning
- Store in a rested position to avoid any stretch marks
- Keep in a cool environment that has minimal temperature change
- Use the USB probe heater for a maximum of 10-15 minutes at time with Kimber's legs in a straight, rested position
- Keep the wig regularly brushed to avoid tangles

Taking these steps and will increase the lifetime of your Kimber Doll and maintain your experience to a high level of satisfaction.

Powdering is also a great way of keeping the TPE fresh.

Other steps can be taken to care for your Kimber Doll which can be found on the Longevity page in this guide.

Cleaning

It's important to clean the Kimber Doll after each use for reasons, including the following:

1. To maintain proper hygiene
2. To increase the longevity
3. To maintain performance and enjoyment

For regular cleaning, we recommend using fresh, warm water and the provided douche to flush out all orifices. This process should remove any lubricants or bodily fluids if done correctly. Depending on the use, you should flush each orifice 5-10 times, while allowing drainage in between each flush.

To allow water to full drain from all orifices, we recommend leaving the Kimber Doll in a seated position on a clean towel for 30-60 minutes. After this, Kimber should be returned to a rested position.

Cleaning all general skin surface areas should be done gently with a warm wash cloth or towel. This should be done very gently to avoid marking Kimber's flesh. Full body cleaning should be done every 2-4 weeks to avoid any bacteria build up.

Storage

When storing the Kimber Doll, care should be taken to increase the longevity of the doll and maintain its performance.

In between uses, the Kimber Doll should be kept in a suitable environment. Steps and suggestions include the following:

- Keep Kimber in a rested position (arms and legs straight)
- Store Kimber in a cool environment that has minimal temperature change (15°C to 25°C).
- Keep Kimber dry and clean at all times.
- Keep Kimber undressed to avoid colour transfer or markings.
- Keep Kimber out of direct sunlight to avoid colour change or fading.
- Be aware of TPE oil release. Powdering reduces this risk.

To keep the Kimber Doll secure and discrete, you can use the provided shipping carton as a means for storage, ensuring the care blanket is used to protect the Kimber Doll from the cardboard edges.

Transporting

When transporting Kimber, this should always be in the provided shipping carton with packaging materials, such as foam or bubble wrap.

Removing Kimber's head, it is also advised, to apply the protective face mask that's included with the original packaging.

For shipping that involves security checks such as international travel, we recommend including contents details such as the name and purchase invoice to be fully compliant.

Details of your shipping contents are kept 100% private and secret by all professional couriers or freight companies.

Longevity

Your Kimber Doll can last a long time with the appropriate care. We recommend regular cleaning and also some suggestions to increase the longevity. These include:

- Regular cleaning, allowing orifices to dry completely
- Careful storage, including steps listed on the previous pages
- Applying talcum powder or corn starch to the skin (monthly)
- Storing in a safe, stable environment

Other steps to keep your Kimber Doll in good condition include:

- Removing clothing or lingerie between uses
- Avoiding excessive force and/or aggression to Kimber
- Avoiding metallic accessories or equipment such as handcuffs
- Avoiding any lubrications that are not water based
- Avoid dropping or mishandling Kimber
- Wash all new clothes before Kimber wears them
- Avoid dark coloured apparel
- Use the USB probe heater for a maximum of 10-15 minutes at time with Kimber's legs in a straight, rested position
- Apply Vaseline (or similar) to Kimber's movable areas, (shoulders, elbows, hips, knees regularly

Warranty

The Kimber Doll is protected against manufacturers defects that include the following:

The Kimber Doll warranty does not include wear and tear, damage or decrease in performance such as:

- Wear and tear associated with general usage
- Damage that has been caused by excessive force or inappropriate use
- Damage caused by condoms (this material can create unusual friction, heat and damage to entrances and their aesthetic details.
- Damage caused by improper care that goes against the suggestions in this care guide
- Damage from transport or mishandling
- Damage from objects or accessories used on or to the product
- Damage caused by clothing or chemicals
- Damage caused by natural events such as flooding or fires
- Damage caused by pets or animals

A full list of warranty terms and conditions can be found on the Kimber Doll website.
