

OVERLORD PLATES

TRAUMA INSERTS

Overlord Trauma Inserts are designed and manufactured in the USA using state of the art manufacturing equipment and processes. Built to exceed military and law enforcement standards, the Overlord Trauma Insert is superior to others on the market today. When it comes to weight, performance and cost there is no comparison. Overlord Trauma Inserts can be used in a variety of CW or a competitor's carrier with soft armor and/or hard plate armor. Overlord Trauma Inserts are versatile and help to reduce trauma when worn by operators from military, law enforcement and other security personnel wearing ballistic protection.

Overlord Trauma Inserts are designed to help reduce trauma effect while worn in conjunction with ballistic rated armor vests and are not designed as a standalone or solitary ballistic threat insert. Trauma inserts can be used in a variety of carriers including soft armor carriers, hard plate carriers, hard plate carriers with soft armor, and various EOD type suits. Overlord Trauma Inserts are versatile and designed to be worn by anyone wearing a ballistic armor vest.

Design

The Overlord Trauma Inserts are designed and available in soft (KTI), hard (PTI), and steel (STI) options depending on user preference. Trauma inserts are lightweight materials made from various Aramid, Polyethylene and steel components to help reduce the trauma from ballistic impacts.

- Protection: none – NOT considered a ballistic resistant product
- Made from recycled Kevlar, Polyethylene or Steel
- Exterior Cover: 1000D Cordura®, Textured Nylon
- Available in Full Cut or Shooter Cut
