CWARMOR™

RANGER UNDERCOVER

Ranger Plate Carriers are designed and manufactured in the USA according to strict quality guidelines using state of the art manufacturing equipment and processes. Built to exceed military and law enforcement standards, the Ranger Plate Carrier is high quality and the most cost effective solution on the market today. Look no further, there is no comparison to the Ranger Plate Carriers when it comes to cost, performance and weight.

Ranger Plate Carriers are designed to protect the operator from shrapnel threats of all types, high velocity handgun and/or rifle threats based on the level of armor insert chosen. These carriers are manufactured to hold various shapes, sizes and curvatures of CW Armor™ brand hard plates and soft armor panels. Ranger carriers are available with or without level IIIA soft panels. The primary design is for basic ballistic protection with an option to deploy a rifle plate for short periods in situations where more ballistic protection is needed. Ranger Plate Carriers are manufactured in a variety of unique designs for fire, rescue, training, covert, tactical and everyday operations or deployments.

The Ranger Undercover, is a covert carrier designed to hold CW Armor™ brand level IIIA soft panels that provide a virtually undetectable protection against ballistic and shrapnel threat based on the level of protection while being worn under a uniform or other over shirt. A combination of ballistic materials provides multi-hit protection with minimal trauma to the wearer.

Features

- Level IIIA soft armor panels are not included
- Front, back and overlapping side protection
- Full freedom of movement
- Additional armor pocket included in front that can hold up to 10"x12" hard armor plates
- Moisture wicking removable / washable cover
