

Ranger Plate Carriers are designed and manufactured in the USA according to strict quality guidelines using state of the art manufacturing equipment and processes. Built to exceed military and law enforcement standards, the Ranger Plate Carrier is high quality and the most cost effective solution on the market today. Look no further, there is no comparison to the Ranger Plate Carriers when it comes to cost, performance and weight.

Ranger Plate Carriers are designed to protect the operator from shrapnel threats of all types, high velocity handgun and/or rifle threats based on the level of armor insert chosen. These carriers are manufactured to hold various shapes, sizes and curvatures of CW Armor™ brand hard plates and soft armor panels. Ranger carriers are available with or without level IIIA soft panels. The primary design is for basic ballistic protection with an option to deploy a rifle plate for short periods in situations where more ballistic protection is needed. Ranger Plate Carriers are manufactured in a variety of unique designs for fire, rescue, training, covert, tactical and everyday operations or deployments.

The Ranger Uniform, is an armor carrier that is designed to have the appearance and feel of a uniform shirt. It is manufactured to fit Level IIIA soft armor panels that offer ballistic protection in the front and back with overlapping sides. The Ranger Uniform carrier can also accommodate up to a 10"x12" hard armor plate in the front for added protection.
