

Lightweight Semi-Electric Bed

The lightweight **ProBasics Semi-Electric Bed** provides the safety and comfort your patients expect with the reliability, durability and convenience your business needs. The pendant control provides motorized positioning of the upper body and/or knees, while the manual crank located at the foot end adjusts bed frame height for caregiver assistance.

With the heaviest piece weighing just 46 pounds, this bed is designed and manufactured for "True" single person delivery and set up while offering the ultimate in quiet, smooth operation.

FEATURES

- Strongest base frame in the industry with a welded steel split spring design and reinforced head section
- Easy assembly with motor & electronics fully removable for easy cleaning of frame
- Motor lifts head and foot section and is extremely quiet
- The head and foot sections can be raised or lowered both simultaneously or independently
- Manual crank at foot end adjusts frame height
- Easy to use and reliable hand pendant for head or foot adjustment (pendant tested to 500,000 life cycles)
- Vinyl head and footboard panels are both strong and durable
- Pivot points use self-wrenching nut system
- Trendelenberg & reverse Trendelenberg position capable
- In case of a power failure head and foot section can be lowered by inserting a 9V battery on to the motor via simple connection
- HCPCS Code: E0295*
