Way of locating studs within the wall (see hardware store for advice)

**Assembly video**

Visit [designbydelta.com/downloads](http://designbydelta.com/downloads)

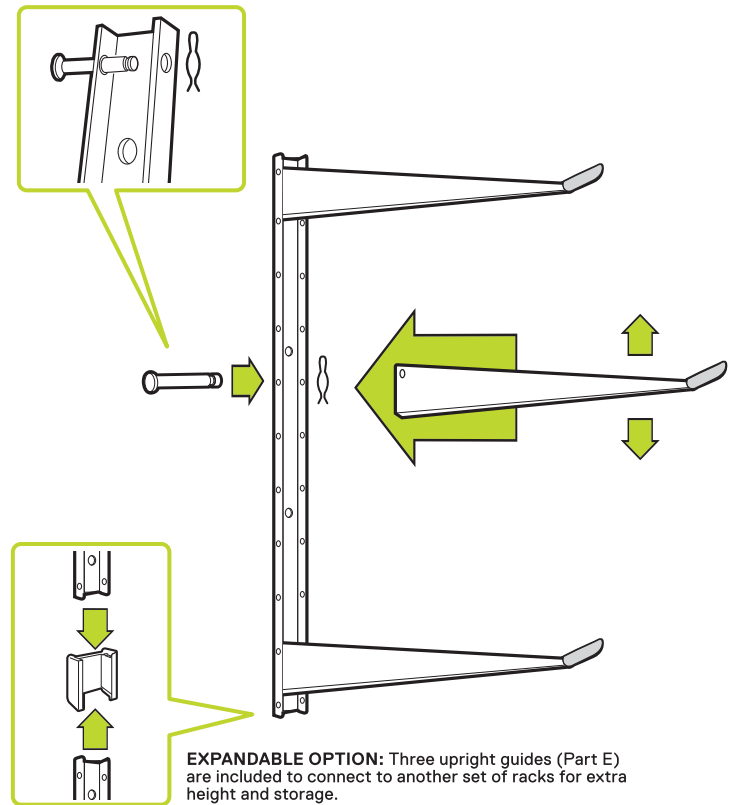

- 1** Place uprights against located stud on wall and mark location for holes. Ensure uprights are horizontally aligned. Drill pilot holes. Then secure uprights to wall using bolts provided.

**IMPORTANT SAFETY NOTE**  
Beware of drilling into electrical wire or pipes within wall!

- 2** Position arms as desired. (Arms can be positioned in 2" height intervals for maximum storage capacity). Secure with pin and spring clip.

**EXPANDABLE OPTION:** Three upright guides (Part E) are included to connect to another set of racks for extra height and storage.
