

RING SIZE GUIDE

OPTION 1. Match Your Ring

To find your ring size, simply grab a ring that fits you perfectly and match the inside of that ring with one of the circles below.

After finding your right size, you should only see the white circle without any gray space inside the ring. If your size falls between two circles, we recommend that you choose the larger size in order to comfortably get it on and off your finger.

OPTION 2. Use The Ruler

After printing this page, carefully cut out the line to create a slit. Wear the ruler around the finger you want to measure at the base and pull the end through the slit. For best results, measure your knuckle as well.

We recommend choosing a size that goes on and off your finger easily.

Note: Sizes of rings are subject to availability, although some larger rings can be sized down, and vice versa. Please be advised that Ring size may also vary slightly depending on the style of the ring.
