

3 TIMES WINNER OF STEREO TIMES MOST WANTED
COMPONENT OF THE YEAR AWARD

“The Ultimate Real World Tonearm”

— Hi Fi World

THE MOST ADVANCED TONEARMS

Multi-award winning Origin Live tonearms make an enormous difference to sound quality, due to their leading performance. This lead has been well documented by reviewers and owner comments.

The secret of such performance lies in an extraordinary depth of research. Origin Live designs employ high strength materials, strategic damping and unique low friction bearings. The critical electrical signal path is optimized, with extremely high grade wiring and elimination of mechanical joints.

Meticulous attention to detail, in every aspect of design yields incredible levels of transparency and outstanding “true to life” performance.

Why not experience a new level of musical satisfaction by owning one of these exemplary arms? A few review quotes on our arms are listed below but please see Origin Live web site for full copies and more information.

“So far ahead of the pack looks about to lap them.”

— **Stereo Times**

“One of the truly special products I’ve reviewed in the past 18 years.”

— **Stereophile**

“The best tonearm I’ve heard.”

— **Hi Fi World**

“The singularly most addicting piece of gear I have ever heard.”

— **10 Audio**

“Price tag is laughably low... Could probably charge five times this amount... Words can’t express how good this is - one of the designs of the decade.”

— **Hi Fi World**

TONEARMS OVERVIEW

Tonearms play one of the most critical roles to enjoy the best experience from vinyl.

It is supremely important that your cartridge is held rigidly whilst at the same time isolating it from unwanted vibration. It's been proven, no matter how good your cartridge is, it will never perform at anything like its true capability without a good tonearm. In the same way, a relatively inexpensive cartridge worth £50 can outperform one that costs £1250 simply by being installed on a better arm.

The Origin Live tonearm range starts with accessible models for those on a budget and climbs to world leading tonearms, producing incomparable performance.

Origin Live arms have won a reputation offering the best value for money and often outperform arms at over 4 times the price (just read the reviews!).

AS YOU GO HIGHER IN THE RANGE ARMS INCLUDE:

- Better and more costly materials
- Complex internal structures
- Refined components with intricate machining
- Multilayer components
- Special coatings to reduce resonance
- Conditioning processes like cryogenic freezing
- High grade finishing (e.g. diamond hard chrome nitride plating as used on Rolex watches).

These factors make the difference to ultimate sound quality.

FITTING AND COMPATIBILITY

- Fitting an Origin Live arm is unusually easy.
- They are compatible with most decks and all cartridges.
- Adaptors and various tube lengths to allow installation on Rega, SME, Linn and Technics mounts to name but a few.
- All tonearms are available in 9", 9.5", 10" and 12 inch sizes.

VALUE RANGE

ONYX, SILVER & ZEPHYR TONEARMS

These entry level arms are renowned for delivering high end performance at an affordable price. When Origin Live introduced their first tonearm, the Silver in 2002 it was hailed as the best arm ever heard by reviewers.

“There may be better value propositions around to upgrade your system but if there is I haven’t heard them A fantastic product from Origin Live and this particular audiophiles dream review tool”.

— **TNT Audio**

Since then, our tonearms have only increased their astonishing lead in performance.

PREMIUM RANGE

ENCOUNTER, ILLUSTRIOUS AND CONQUEROR TONEARMS

Origin Live broke new ground with these award winning arms. This is where ultra low friction, highly stable, dual pivot bearings are introduced along with many other significant upgrades. For those wishing to invest in extraordinarily high performance these arms are the next step up from the Value Range.

HIGH END RANGE

ENTERPRISE, AGILE & RENOWN TONEARMS

Surprisingly, an expensive precision engineered arm is no guarantee of high performance - it’s the design which counts. One reason why Origin Live arms lead the field is because we invest untold time in research and development to arrive at genuine breakthrough solutions.

Building an arm to produce supreme performance means sparing no expense. The High End Range exists for those who simply want the best.

WHICH ARM IS RIGHT FOR YOU?

A high performance arm can make at least as much difference as a better turntable or phono stage. Used in a first-class system the improvements to all aspects of music are exceptional. In the same way that an electron microscope needs a vibration free isolation mounting to produce an image, a high resolution cartridge needs an ultra-stable platform to realise its true capability. This challenge can only be met through understanding the complexities of micro-vibration.

Origin Live has spent over 30 years researching concepts that many would consider irrelevant, expensive and unnecessary. Because of this we manufacture all arms in our own UK factory to ensure the highest standards are met.

Very occasionally you discover designs which are far ahead of the rest. We offer such designs and invite you to put us to the test.
