

# AHG Extends Cameo ZENIT Range

**BOOTH 6581** Adam Hall Group's ZENIT W600 adds a flexible LED wash light to the Cameo ZENIT range. Equipped with 40 x 15W Cree RGBW LEDs, the fixture delivers an impressive brightness of 21,000 lumens to create consistent and powerful color blends. For maximum versatility, the ZENIT W600 features innovative SnapMag technology from Cameo Light, which enables rapid changes of filter frames without any additional tools or disassembly. In addition to DMX and RDM, the LED wash light also features a built-in 2.4 GHz W-DMX transceiver from Wireless Solution Sweden AB for wireless transmission and reception of DMX commands in master or slave mode.

In order to provide event technology, corporate, and broadcast users a high degree of color fidelity and convenience, the ZENIT W600 utilizes high-resolution 16-bit technology for professional quality color changes and smooth dimmer transition.

Peerless-AV's Xtreme High Bright outdoor displays

## Peerless-AV Goes to Xtremes in Outdoor Displays

**BOOTH 3429** Peerless-AV is showcasing its line of Xtreme High Bright outdoor displays at InfoComm 2019.

Featuring an IP68 rating and a patented Dynamic Thermal Transfer system that allows the display to operate in extreme temperatures ranging from -31 degrees F to 140 degrees F, the Xtreme High Bright outdoor display is ideal for any digital signage application, including theme parks, transportation, sporting venues, retail, education, hospitality and more. Xtreme High Bright models thrive in all positions and applications, even in direct sunlight, without compromising the life of the panel or its color accuracy.

Available in 43-, 49- and 55-inch models, the Xtreme High Bright outdoor display comes with a rich feature set that includes remote and local monitoring functionality, 2,500 nits of brightness to combat high ambient lighting conditions, IK10 rated impact resistant safety cover glass for protection against damage, an updated input panel/compartments and cord cover, and IR control lockout and button board lockout for secure installations.
