## Display Enclosures

Peerless-AV announced the launch of its Ligature Resistant Display Enclosures (K62232-S-GR01 and K65225-S-GR01). Ideal for hospitals, medical centers and prisons, the Ligature Resistant Display Enclosure is designed and manufactured with safety in mind, to protect both patients and facility equipment. The sloped top design, the preferred design for mental health wards, is mounted flush to the wall and prevents tampering, theft and damage to displays. Additionally, the cover can protect electrical and cable TV outlets, keeping wires and cables away from patients.

## Durable Seating

Forté is the new furniture series from Norix that is engineered for comfort, flexibility and extreme durability. With a variety of colors to choose from, this series is made to humanize intensive-use environments and includes a lounge-chair option with a seat and base made of one-piece, high-impact rotationally molded polyethylene. The molded seat and base are easy to clean, compliant with CAL TB 133 and are made for the toughest environments. Additionally, the chair can be ballasted for extra security or ganged together to create in-line seating configurations using optional hardware. The upholstery option adds a nice touch for appropriate spaces.

## Control Station

Winsted Corporation offers the E-SOC Control Station — part workstation, part console and completely adaptable. The E-SOC Control Station includes ergonomic enhancements to improve operator performance, resulting in greater situational awareness when monitoring complex systems. Designed for comfort and adjustability, E-SOC Control Stations feature Winsted's innovative Versa-Trak monitor mounting system, which allows users to easily modify sight lines and monitor viewing angles based on individual needs. By incorporating a hinged corner, Winsted has eliminated pre-defined angles and made it possible to easily design a control station that fits into virtually any space. E-SOC Control Stations also feature integrated cable management, including a cable channel with lacing loops and lift-off access panels for easy access to cables, electronics and CPUs. E-SOC Control Stations come standard with Winsted's proprietary Endurance Plus work surface. Comfort Edge and Marmoleum work surfaces are also available.

## Network Camera

The new DCS-2210L from D-Link replaces the current DCS-2210 and doubles the frame rate to 30 FPS, increases the field of view to a wide 103 degrees, doubles the SD card storage capacity from 32GB to 64GB and adds support for the mydlink cloud service, allowing convenient remote viewing of the camera from a mobile device or computer. The new camera offers 1920 by 1080 resolution, a built-in microphone and speaker, and integrated infrared illumination for seeing in complete darkness. Other features include a PIR (passive infrared) sensor for enhanced motion detection and PoE (Power over Ethernet), allowing for convenient single cable installation. The DCS-2210L is mydlink-compatible, allowing for convenient and free remote access via web browser or mobile apps for iOS and Android.

## Bed/Storage Unit

Institutional furniture designer Max-Secure Detention Products offers its Lower Bed with Storage, a solid unit designed with two storage compartments below the sleeping surface to accommodate personal belongings and provide easy access during inspections. Constructed of a proprietary composite material called Herculite, the unit has passed rigorous durability tests and reduces maintenance costs, according to the company. The bed is available in a variety of colors and comes with an optional 10-year warranty.

## Security Locker

Lyon's Valor lockers are engineered to meet standard requirements for the law enforcement field. Featuring chrome-plated handle cups with padlocks, the lockers contain vents to air out vests and boots, keeping them cool and dry. Other compartments include full-width top shelves for hats and badges as well as electrical cutouts for laptops and cell phones. Not only do the lockers accommodate rods and coats, they also have pullout drawers with an auto-lock feature for larger and important gear and items.
