◀ PLANAR DIRECTLIGHT LED VIDEO WALL SYSTEM

The Planar DirectLight LED video wall system is a family of seamless, ultra-fine pitch direct view LED video walls that provide a superior visual experience, simplified installation and maintenance, and 24x7 reliability for indoor environments. Planar DirectLight LED video walls are available in four pixel pitches from 1.6 to 3.1 millimeters. Planar DirectLight LED video walls feature a mounted depth of less than 4 inches, making it the thinnest direct view LED video wall in the industry today, according to the company. Using the Planar DirectLight LED Video Wall Calculator, a free online tool designed to simplify the video wall selection process, custom-

ers can design and preview a Planar DirectLight LED video wall in advance of purchasing. For more information: www.planar.com

◀ CHRISTIE THREE NEW FLAT PANELS

Christie is launching the Christie FHQ552-T, Christie FHQ842-T, and Christie FHQ981-L flat panels. The three panels are designed for meeting rooms, offices, lobbies, and architectural displays, and can be banded with Christie Brio, Christie Spyder, and the Christie Pandoras Box media server.

The Christie FHQ552-T features 10-point touch capabilities, built-in speakers and an Open Pluggable Specification (OPS) slot. The Christie FHQ842-T is replacing the FHQ841-T — an 84-inch display, meant for large-format presentation and collaboration applications. With built-in 10-point multi-touch capability, the Christie FHQ842-T can be used in interactive applications or whiteboard and meeting room scenarios.

The Christie FHQ981-L 98-inch flat panel is geared toward business, education, houses of worship, small control rooms, and digital signage applications. It provides an alternative to traditional 2x2 tiled 46-inch displays. The FHQ981-L is equipped with built-in speakers, multi-window capability, along with an OPS slot for compatibility with digital signage devices and pluggable media players.

All three Christie flat panels have a 3-year warranty backed by Christie service and support.

PEERLESS-AV RELEASES VIDEO WALL MOUNT APP

Peerless-AV is launching the Peerless-AV Video Wall Mount Locator app. The app is designed to support Peerless-AV's line of SmartMount Full-Service Video Wall Mounts (DS-VW755S, DS-VW765-LAND, DS-VW765-LQR, DS-VW765-POR and DS-VW765-PQR).

The Peerless-AV Video Wall Mount Locator app aims to minimize the needs for large construction crews and decreases installation costs. With the addition of the Peerless-AV Video Wall Mount Locator app is supposed to allow integrators to determine the best location to place display mounts to create a seamless video wall. The user manually inputs the display orientation, the dimensions of the display, and the distance from the floor and wall, and the app calculates the location to begin installation.

Peerless-AV's line of SmartMount Full-Service Video Wall Mounts have been upgraded to feature a top center keyhole slot to help plot out and hang the video wall mounts.

The Peerless-AV Video Wall Mount Locator app is currently available in the United States for free via the iTunes store and Google play store.
